What a fantastic series of book by David Vandyke

Just finished this book last in a long series, it was brilliant am sorry in a way that this series has ended. Mind!! May there be another book to come??

Mick Bird says

Interesting series

I have enjoyed reading this series of books. We have followed a crew of humans first looking at starting a new colony. To seeing them joining and forging a new alliance with different aliens. Together they look at freeing their world's.

A Great Series Ending

I hated to see this series end I liked it so much. The characters were like old friends. The endless battle with aliens just to survive, then to surpass and improve on their technology is fascinating. The wonderful AIs! I actually wept when one of my favorites died. David VanDyke never lets me down.
If you like good science fiction this series is for you.

Conquest and empire

Good read but didn't hold your interest as with the other books. Kind of glad the series is over. Best of luck.

I greatly enjoyed this series, and for the most part this book was a good wrap-up. The combat depictions manage to stay fresh and tense 5 books in, and there's always some new element to keep readers on their toes. There was a great focus on the characters, and I was glad to see how their arcs ended.

My lone problem with the book is that the ending felt very rushed. An entire book was dedicated to this one battle to defend earth, then only two chapters dedicated to bringing down the entire empire that was attacking

earth to begin with, and yet there still wasn't any final resolution on what happened exactly after their surprise attack? Very unfulfilling.

I know there is another series set after this one, so maybe those questions are resolved there, but if so that would feel like a slap to the face to have to read another set of books to get a resolution on the five I just read.

All in all I loved this series and absolutely do not regret reading it just because of the ending!

weird ending ,maybe he got tired

T.S. Williams says

Enjoyed the series

Looks like this is the last one for now.

Enjoyable series. AIs seem very anthropomorphic, but how else could you right about them interestingly.

Reed Shankwiler says

Super

5 stars are warranted if only on the merits of narrative longevity. The assertion of self determination as a critical component of society
is great.
