## **Fate Cuts Both Ways: An Improbable Love Gives and Takes Away** Barbara L.B. Storey

A set designer and a movie star are stranded together in the wilderness after filming. Upon realizing that no one is coming for them - her car won't start and he told everyone not to bother him - they decide to rough it out together.

In an unlikely twist of fate, the little moments of smiles, flirting, openness and comfort begin to build into something more. The stranded weekend turns into a romantic fantasy.

As all fantasies do, however, it comes to an end. Jon Jacobs is a movie star, after all, and Becca is just, well, Becca. When they return to the real world, friends and family begin to doubt the longevity of the so-called fling.

How could these two people, who are so different and from different places, be this into each other after such a short period of time? Who is using who here?

In the midst of these doubts, something happens that could bring them together forever. But will it last? Will fate allow it?

### **? Kimberly says**

In the first section, Stranded With You, Becca finds herself trapped at a remote location outside of London when her car won't start. Jon, an actor on the production they were both working on awakens under an old oak to discover he too, has been left behind. Storey, shares their weekend, as they eat leftover caterer food, build a makeshift tent and awaken to each other. The two spend a magical, sexual weekend together and realize this is more than a weekend fling. Neither has had serious relationships and are skeptics when it comes to fate and love. Their banner, seeing Becca experience firsts and watching their romance bud reminding me of first love.

In the second part, Stranded With You, they head home to London and face skepticism from family and friends as they continue their relationship. Awkward first moments, hostile besties and the newness share the pages as these two enjoy many firsts before tragedy threatens to break them. The story is a unique combination of "clean romance" and heat allowing these accounts to settle in the New Adult genre minus the drama. They are heartfelt, and the characters emotions felt genuine.

The third part, Finding Our Way was emotional as these two dealt with loss, guilt, and uncertainty. I loved that family and friends (well most) were supportive, and it was nice seeing a young unjaded, naive couple grow and trust. At times tearful I became caught up in their story. The author offers a sexy and spiritual epilogue that hints at things to come wrapping up their story enough to satisfy those who need closure. ### **Ashley H says**

Fate Cuts Both Ways is a lovely read. The romance is sweet and allows the reader to step out of their own world and into the character's. While it starts off light and innocent it does delve into more substantial issues that surprised me and even brought me to tears at times. I was not expecting to go into issues that were relatable to me personally and it was truly touching to experience it through someone else's view. The story is wrapped up well for those that need peace of mind when finishing a book but it is open enough for there to be room for imagination. I highly recommend this read for anyone who loves a good romance/new adult novel.

### **Amazeballs Book Addicts says**

When I opened Fate Cuts Both Ways to read, I freaked a bit because it's a longish book but this one was manageable. It's split into three sections which made it easier to plan out my reading time. Jon is an actor and Becca a set designer. They both get left behind on a set for the weekend. These two are genuine characters. Jon is an actor but he's not cocky. Becca and Jon have a great connection and have a great weekend. After the weekend they have to deal with real life. Once back Jon and Becca want to continue what they started. Friends and family are not all that supportive at first. The third part was the part that I liked the most. In the third part of the book Jon and Becca deal with loss and struggle with their relationship after that. Their story

has ups and downs and truly fate brings both bad and good and I was rooting for these two to come out on top.
