Darkness is growing up. Now, It has new masters and they're starving.

A mysterious Plague swept through the land. Walls of Darkness now surround cities around the world. Supplies are low. Prices are high. Still, humans survive in this post-apocalyptic world. For Sciell and Miners, Lifeblood beings, the new Darkness won't let them touch their power source without punishment.

How can they draw the power they need to survive? Their Lifeblood evolves. These beings can now see auras. Connections only existed between two beings. Now, these family bonds form between most Sciell.

They can feel the other's need no matter the distance. If one is enraged, the other becomes infected with that same anger. They always have someone else in their heads. They share power.

Divine Mathews, Josephine Royal, Blea and Aliceanna Carlton's connections told them they weren't alone. The connections felt like home. These four know they're different. They can do things...see things. They don't know why. They become trapped inside Midnight Prysni- a twisted mansion created to keep them weak. Divine, Royal, Blae and Aliceanna finally meet those they're connected to. Only, they feel like they've met before.

The Merging World Series, *Chains of the Sciell* is the second book in this new series by author Auden Johnson. It is said to take place about fifty years after the first book. I have not read the first book, so I jumped into this blind, and it is a complex story, but at the same time I was able to follow the story up until the end. The concept of the Darkness and pulling power from the darkness is interesting and I wish it had been developed a little more, but overall I really liked the book and I think young adults and adults alike will enjoy this book. Especially if you like repressed memory, paranormal powers and kidnapping.

From Natural Bri

I found this series, as a whole, very complex. both books start out with a plethora of information, most of which is very important to understanding the world and what is happening. However, if you stick with the intricate details, they soon start to weave a beautifully dark and exciting story.

This book takes place fifty years later, with some of the characters from the first book. They have lost their memories, the world has changed and they struggle to access the Lifeblood they so desperately need. Throughout the story, we read as they are trying to gain their memories back and to work toward a new method of accessing their Lifeblood and conquering this new, evolved Darkness.

After a few chapters, I really found myself enjoying the intricately woven details, which painted a picture of the world. I felt involved and connected with the characters. I found myself trying to work through their problems with them and help sort out this new, evolved view of their Lifeblood and the Auras.

I like the characters in this book, and the series as a whole. They are well developed and, as an outcome of the intricate details, they are full of character and depth. I also like the differing personalities, which gives us a well rounded story.

The pace of the story was excellent. It was a great, fast past, but not so fast that you couldn't take in all the details you needed. There was plenty to create the world, as well as give you the action you would hope for in a story where they are battling for their existence.

Overall, I really enjoyed The Merging World series, thus far, and especially Chains of Sciell. I look forward to seeing more from this author.
