## **Dojo Daycare** Chris Tougas (Illustrations)

One morning, six young ninjas are dropped off at Dojo Daycare. As soon as their ninja moms and ninja dads have left: KABOOM! KAPOW! The ninja boys and girls kick, push, punch, and quickly turn the place upside down in a full-blown ninja riot. Try as he might, the hapless master can't control the children, and the disaster plays out through lunchtime and story time. No one heeds the master's repeated mantra of *honor, kindness, and respect* — until one little ninja steps up and rallies his ninja pals to undo all that they have done, just in time for pickup.

This is one of the cutest books I have read so far this year. I love the illustrations, the rhyming and the sound effects (kaboom, kapow). The poor master has a hard time controlling these ninjas and he tries to teach them respect but things get out of control until one small ninja corrals the other ninjas into showing respect to their master. Now I want to think of a ninja theme to use in storytime. I loved everything about this book and could read it over and over again.

Very cute book about some naughty little ninjas who wreak havoc at their daycare. But, in the end, they show remorse and help set things right. Great book to illustrate respect.

Age: Preschool-1st grade

A dojo master attempts to teach a group of ninja children about respect and kindness and all they want to do is fight--until the children realize how emotionally defeated the master appears. A nice twist in a tale about kindness and respect where the children finally decide to follow the rules based on empathy towards their master instead of being forced to help by an adult.

### **Dylan McHenry says**

Honestly this book could be very useful in a classroom because it speaks to the power of all the good that can happen if children take responsibility for their actions. The classroom becomes more respectful and everyone encourages and helps one another. A powerful, fun message in a fun and engaging format!

I loved this book - great illustrations with wonderful rhythm to the tale. Mischievous children, spinning out of control and a Master trying to get them "...to all reflect on honor, kindness and respect". Wonderful

Review: Dojo Daycare is a Buckarooo Award Winner and its easy to see why. This book is colorful and imaginative, and would be perfect for getting younger students excited about reading. Afterall, who wouldn't want to be a ninja?

Content Areas: This book would be a great tool if you had a class that was a little loud and rambunctious, and you wanted to show them how they should behave in a classroom setting. The Master Ninja, tells his students "It's time for you to all reflect on honor, kindness, and respect." It would be a great little story to show them that they must all ways be kind, and to think of others.

Comprehension:

Q: Why does the Ninja Master tell his little ninjas that they must reflect on honor, kindness, and respect?

A: Because they kept kicking and punching each other, and they kept starting a riot.

Q: When a young ninja says "Quiet!" what happens?

A: All the little ninjas listened and stopping destroying their classroom.

Q: And why do you think the young ninja did that?

A: He was leading and following the example of the Ninja Master.

Wonders:

1. What do the ninja parents do when they drop the ninja kids off at daycare?
2. How can a goldfish be a ninja?
3. Does the teddy bear ninja know how to fight?

Dojo Daycare is an adorable look at the destruction that can be wrought by little ninjas at daycare who forget to show, "honor, kindness, and respect." Children ages 3-6 will giggle through this brightly illustrated humorous title. They will also pick up on the refrain, "honor, kindness, and respect," which may create a "teachable moment." Read. Giggle. Share.

Pity the poor Master at the Dojo Daycare where the kids literally bounce off the walls. Although he tries very hard to instill in them some basic values of respect, his six charges cause problems during lunch and story time. Finally, one voice of reason causes the youngsters to calm down--at least long enough to straighten up. Who knows what will happen tomorrow? The best part of the book would be those illustrations, especially the last ones in which the children dream of tomorrow's adventures and the Master has a nightmare of his own. Young readers will enjoy reading this one and laughing as they read and plot their own ninja moves.

### **Rebecca says**

Funny rhyming story about little ninjas at the dojo daycare. The poor master has problems getting the group under control. But in the end they all come together and help clean up. Granted it's not much of a plot but the rhyming is clever and flows smoothly and the pictures are a lot of fun. Lots of ninja kicks and poses and I'm betting there will be some parents out there who will complain about the kicking and non-sharing but it doesn't bother me.

Where do the children of ninjas go when Mom and Dad go to work? To the Dojo daycare of course! The Dojo Master looks exasperated and you can hear the noise and mayhem as you read the book. Recommended to me by a young patron. Thanks!

Dojo Daycare instantly grabbed my 5-year-old son's attention. The illustrations were adorable, the rhyme made it fun to read, and I liked the lesson of honor, kindness and respect. It's a book that I wouldn't mind

reading over and over.
