The Humans have destroyed 2,000 Alliance Warships and now they are taking the war to the worlds responsible for attempting to destroy Earth. The Alliance still has more than 48,000 Warships but the way things are going, they may not be enough. A Queen has come to power and her impact on the struggle will be monumental.

The Annihilation Trilogy continues in the second book and the adventure intensifies as the forces arrayed against humanity are coming en masse. Hang on. The ride gets more intense.

However, when the Protagonist asks the Alien spaceship artificial intelligence which he has befriended to fill him in on current details about events occurring in the Alliance, I was wondering how the Alien artificial intelligence could possibly have access to those details. I personally don't find the motivational speeches to be all that motivational, nor convincing, nor do I particularly agree with their sentiments entirely; but it was a good effort...

#### **A good sequel**

Another well written book. I would recommend this book. The story develops nicely and the characters evolve. I am very happy with this series so far. The next book is downloading as I write this review.

### **Jay Abraham says**

#### **Repetitive and a Disappointment**

First book in series was excellent but then became more cliche as TAG and Danielle become more powerful and take over the entire galaxy. It borrows a lot from David Weber series without the depth his books have.
