## **Two Silent Cries** T.N. Tarrant

Micah Valery is hearing impaired and unable to speak. As if that didn't make life interesting enough, he also suffers from a panic disorder that regularly disrupts his life. With a wonderful assistance dog named Goldie, however, he manages to live independantly, and comfortably.

When something goes wrong with Goldie, he meets Dr. Santiago Cruz, a veteran veterinarian with issues of his own to cope with. Still, the attraction is strong enough to explore, and a new romance blooms.

Enter Micah's estranged family, attempting to deprive him of his inheritance.

## Leaundra says

I enjoyed this one. I loved Micah and Santiago. I always love reading books with deaf characters I love their culture and the language. I loved the animals in this book. They were extra sweet ;- ) I have to say I've had panic attacks they don't come as often as they used to but man I've never had them as bad as Micah. Bless his heart. They're the worst. I'm really glad he had his dogs to help him out through his day to day life. I learned how dogs help really bad suffers. Great read. Another thing the cover is beautiful <3

---

## Heller says

2.5

I read this story and I guess I was mistaken in thinking it was related to The Healing of Idrys in some way? If it was I missed the connection.

The animals were adorable and the characters not bad. They related well to each other and had a nice chemistry but it was too instalovey for me and overly sweet in some places. The storyline was too melodramatic and over the top and even though I liked Santiago's history I found Micah's just kept getting crazier and crazier.

---

## Phaney says

The premise is interesting, its execution rather meh.

Especially the use of ASL confuses me a bit, since the dialogue given does not really sound like something transcribed from Sign.

For example the nicknames. Those work differently in sign language, as far as I know. A little too much emphasis on the hands only, as well. ASL is almost a full-body language. At the very least facial expressions are part of it. Oh well.

This is not a stellar book, nor is it terribly exciting, but it's worlds above the other by this author that I've read and, overall, I sort of liked it by the end. The story certainly felt tighter (if clichéd) and less haphazard. Sure, the animals are completely unreal, and the villains simple-mindedly evil. And I shake my head at the main issue the two guys have with each other at one point.

Still. Perhaps I'm in a mellow mood or the heat melted my brain, but by the end I'm comfortable with this book.

## **V says**

You won't find here cute pictures, flawless English or a wonderful review, so bear with me with my simple thoughts

I really like this story and I'm very surprised that I like it so much because I'm not an animal lover at all.

For those who are, you are going to love this story because the animals (so cute though) are full part of the plot.

This story has two characters in big need to find someone who accepts them as they are, with all their physical and mental issues.

Also it has family problems that in my opinion didn't spoil anything about this wonderful story.

This is my personal opinion, and if you want to give this story a go you may find that you like it as much as I did.

---

## **Mandy\*reads obsessively\* says**

Micah is deaf and mute, and despite his disability and all that entails he has managed to become a successful transcriptionist.

Micah also has very severe panic disorder, medications don't help him. But his wonderful therapy dog Goldie does, she helps alert him to things he can't hear but also herds him into a closet when his panic attacks start.

When Micah starts noticing Goldie having trouble following his commands he takes her to the Vet's office where he meets Santiago under less than ideal circumstances.

Santiago has his own issues, he is a war veteran with the scars inside and out to prove it.

I don't want to give any of the plot away, but I will say the animals, and there are quite a few in this book, totally steal the show. They are sweet and cute and adorable and take up a lot of the story.

There is also quite a bit of drama, Micah's panic attacks are numerous and difficult, his family treated him horribly and I was very sad at how cold and cruel they actually were to their own child and brother, there is a lot going on in this story and I felt it distracted a bit from the romance between Santiago and Micah. The love between them grows slowly and it's nice to see two such vulnerable people find each other, Santiago knows sign language and understands panic attacks, so he never makes Micah feel 'less' and since the war he has his own trauma and insecurities to live with which Micah and the pets help him with.

Kelly is Micah's best friend and she plays a great supportive role and I appreciate when the female in the

story is positive and helpful and not a negative force and I was happy to see she got a little side story of her own.

This is definitely a story that falls into the hurt comfort category with a dash of family drama and a few surprises and lots of cute animal goodness.

If you are looking for a sweet story about overcoming obstacles, falling in love and lots of furry friends this one could be the one for you.

### **Mary Mary says**

blergh.

i am not sure, but it is possible that it is.my fault i didn't like it. the fact is, i was disappointed with every book i've read in last week or sth like that.

I love books with disabled main character, but it wasn't as good as i thought. again, it can be just me, i have had this book for some time now and i waited for the right moment to read.

I like animals in the story, Micah's dogs and cats are adorable.I liked how protective Kelly was. I hated his siblings and parents for everything they did to poor Micah. on the other hand there was too much drama, panic disorder, being deaf and mute, homeless, with horrible family and lovely dog who is getting too old..., oh, plus veteran with terrible nightmares, so called domestic violence, money defraudation and so on and so on. TOO MUCH. it made it unrealistic and weird.

---

### **John Inman says**

TWO SILENT CRIES was a great read. T.N. Tarrant did an excellent job of making me care about the characters. It was a sweet love story between Micah and Santiago and all the animals made it even more heartwarming. Oh, and as for Micah's family, those heartless creeps -- if I had been reading this in paperback rather than on my ipad, I probably would have thrown the book against the wall a couple of times reading about Micah's creepy relatives. But happily, as they soon learned, payback is indeed a bitch. Karma, baby, karma. I loved the ending. Five stars.

---

### **Trisha Harrington says**

This was such a sweet book. I found myself falling in love with Santiago and Micah. The dogs and cat's just melted my heart. As a dog lover I can understand the feeling of joy they can bring to you. The only downside was Micah's family, but you get those characters sometimes.

---

### **Melanie~~ says**

I gave this story 4 stars because it's just so darned cute and sweet. The MCs have issues, but they work through them and learn to live with them.

It was a bit of a soap opera but nothing too egregious.

While insta-love is not offensive to me, this story had a nice slow build of the relationship even though it isn't a very long story.

---

### **Page Crusherz says**

This book did not work for me at all. I was hopeful, but it read like a laundry list of things that go wrong, any one of which could have been the central plotline (Disabled person- check, PTSD- check, anxiety- check, random acts of violence- check, dying family members- check, homophobic relatives- check, court case- check, sick animals- check, baby animals- check...) Its a short book too! WAY too much, and not enough depth that I cared at all.

I also could NOT get over the fact that this MC RANDOMLY meets a guy who can perfectly sign AND is gay AND loves him AND can help his dogs. I tried to ignore that but the way the MC "speaks" is so unrealistic. ASL doesn't have the vocabulary used in this book. The MC gives an impassioned speech at one point (in court, of course, where impassioned speeches belong) and the vocabulary that was attributed to him was SO unreal. If thats what the translator said for the MC, then that guy needs a new job-in acting!- ASAP.

I almost never give bad reviews, but this one was definitely not a good one for me. I see some people liked it but it was just too much for me. Next time I hope the author does more with less.

---

### **Alina says**

Absolutely great story!

Wonderful and touching, it has the right kind of angst for me - when MCs face it all together, supporting each other! It's so heartwarming - seeing such a strong and supportive relationship!

And as a big animal lover I enjoyed all the pets here.

Fantastic book!!

---

### **Kelly H. (Maybedog) says**

3.75 stars

Why did the lights go out?

I didn't know a tranquilizing dart could cause that much damage.

As horrible as it is, they don't usually let a person with an assistance dog keep him/her after retirement because of issues of jealousy and confusion of roles on the part of both dogs.

I can't put my finger on why but this feels disjointed. Micah feels too emotional, the vet is going too far out of his way, and Micah is taking it as perfectly normal. It's all a little weird.

I've never heard that-anxiety drugs hurt your liver?

Are you kidding me?!?! A deaf man is asking a vet if it would be kinder to euthanize his beloved dog--that he cries over when he's worried about her--because she was losing her hearing?? No frickin' way. He would not ask that. He wouldn't even think it.

They haven't had sex yet after a month of dating? These are men, right?

I haven't heard of such a severe panic attack. I've had them and my mom has them frequently but I don't pass out. I usually wish I would because I'm so petrified.

The dogs are fantabulous. Of course they're perfect which is silly but they were fun.

His parents kicked him out for being disabled??? Scum buckets.

Aren't raw potatoes dangerous? There part of the nightshade ily and I thought they were poison.

Good for him sticking up for himself.

What he describes as "sliding reality" is more similar than common PTSD than the blackouts or psychotic breaks.

I do really well in emergencies and have my issues afterwards.

Cool that there is a Latino guy as a supporting character.

Would a closet that everyone knew about still work as well? It would barely be hiding. Plus, cleaning it out would make it pretty open which defeats the purpose. He's trying to hide.

---

## **Cathy Brockman says**

Micah is a deaf man that lives on his own with his therapy dog Goldie. He also has severe anxiety/panic attacks where Goldie drags him to his safe place which is generally a closet. One day Micah notices Goldie isn't alerting him to sounds and is concerned he takes her to the vet and immediately goes into a panic attack she tries to drag him in and the vet thinks she is being attacked and tranquilizes her. He finds Micah intriguing and being partially deaf and disfigured from Iraq understands the man. They become friends. From here there is a twist a chapter or a page. Just when you think it can't get better something else happens and you're like on the edge of your seat the whole time.

I absolutely loved this story! I laughed and cried and laughed and sighed. I loved that the animals basically had their own little story going as well as the two main characters. I was a fan from the first T.N Tarrant story and each one gets better. I don't see how this one can be topped but I will be one of the first in line to see. It's a breathtakingly beautiful story. A must read!

Recommendations: If you like a story about people with disabilities, dogs, cats, more twists and turns than a twizzler, lots of angst, and some sweet, hot, sensual mansex This is a must! I highly, highly recommend this
