Pleasure Satellite (The Pleasure Chronicles, #1) Danielle Monsch

Nevan's life is nothing but duty and honor. The eldest son of a prestigious House, he has a life mapped out ahead of him, including mating a woman for whom he feels nothing but brotherly affection. But then one night he discovers a woman who makes his blood boil and his body hard.

Seena has known nothing but blood and pain in her life. A fighter for the BloodRing, she is nothing more than spectacle, her life and death meaningless except as entertainment for the masses. Then one night a male comes to her in secret with a bargain the likes of which she has never been confronted with. The ultimate fight, which will lead her either to freedom...or to his bed. Nevan will allow nothing to stop him from possessing the human.

On the Pleasure Satellite anything is permissible, and to the strongest goes everything.

Diana says

I really enjoyed this book. If you have read any of her other stories this one was a lot sexier but the core of her writing was just as amazing. She writes some of the best women out there. I love warrior women and the men who love them and aren't threatened by their strength. Nevan falls for Seena at first sight and the battles between them are very erotic but not over the top. I really wished this story was longer. I wanted to know what was going to keep happening with the characters which I feels is what you want out of a good book. I highly recommend this book to anyone who likes books about aliens, warrior women, sexy fun time, and happy endings.

Elizabeth/snoopeach says

Seena and Nevan's story had great dynamics even though it was a fast paced short story. I loved Seena's strength and perseverance and the fact that she gave as good as she got. Nevan got me frustrated at times with his conflictions between what he felt for Seena and his duty, but he was an engaging character. The chemistry between the two characters was sensual and at times scorching. I have read two other books by this author and have yet to be disappointed, each time I see a new world different than I would have imagined and vastly different than most of what is out there on the market. This was a great read!

Fairy Tales and Ever Afters: (twists on fairytales)
LOVING A FAIRY GODMOTHER Tiernan/Reina)
LOVING AN UGLY BEAST (Benton/Nissa)
LOVING A PRINCE CHARMING (Seth/Kira)

Entwined Realms: (Hot gargoyles)
Stone Guardian (Terak/Larissa)
Coming: Stone Embrace

Others:
Pleasure Satellite (Nevan/Seena)

Jess the Romanceaholic says

Super hot, interesting (and angsty) plot, lots of drama, and a satisfying HEA.

Full review to follow.

4.5/5 Stars

AnnMarie says

So I get an email recently from Kathy telling me about this book. She was raving about it and wanted to know if I wanted to read it. Now she very rarely does the "rave". She may love a story, but to actively seek out other reviewers, even with stories she edits or is involved with, no, she just doesn't do it, not her style.

I read the premise and was like, really, smut? And sci-fi smut no less.

This was very un-Kathy like. We are very alike when it comes to smut. There has to be a story line, it can not be gratuitous, there must be a driving element, and a flow.

Very rare for these types of stories. They usually are just sex chapter after chapter. I get bored and start skipping around for the the actual story.

But she raved so I took notice and agreed to read it.

Well...WOWZA! She was right!

This really is just one of those rarities that will knock your socks off...maybe some other things too!

Quick fun read. Complete story line which I love in any novella. Author ties everything up very nicely not leaving you wondering or with the "huh" that's it?

Nice characterizations and for sci-fi, which I do not read much of, I definitely got on board with the "creatures".

Nevan and Seena are from two different worlds and stations in life. But really not so different as they soon find out.

Lot's of smexy hot scenes that drove the story line, another big plus needed for erotica, or yep, I lose interest.

Was a bit nervous as the ending was approaching hoping against hope it would end the way I wanted, and you know what? It did!!

Thanks Kathy for the rec!!!

Kathie (katmom) says

I love Stone Guardian by this author. LOVE IT. When she recently offered an early copy of Pleasure Satellite, I jumped at the chance to get a copy.

WOWZA...this one is steamy. It edges into erotica for sure. BUT...it has a plot and I like that in my steamy romances. Definitely for the over 18 crowd.

In these few pages (about 80) Ms. Monsch builds a world somewhere out there. It's full of aliens, and it

makes sense. Well done for a novella! Nevan was totally alpha and Seena was full of sass. She surprises him at every turn, something no female has ever done. There is instant lust when he "buys" her for the week, but Ms. Monsch makes us hope that they will find a common ground.

While she has other ideas for more in this series, *Pleasure Satellite* stands alone. She gets many points for that! Thank you! Although when she comes up with another idea, I'll be ready to read it.

If you are looking for something short, but steamy, to enjoy for an hour or two, this is the novella for you.

*Thank you, Danielle Monsch, for the opportunity to read *Pleasure Satellite*

Lisa says

This a little more erotic than I usually read but I enjoyed the characters in Monsch's *Stone Guardian* so much I gave it a try. I'm a huge fan of the way she draws you into liking the characters. They are each distinct and different with their own personalities.

Francesca says

wish there was more.

Mary Lou Hoffman says

Series: *Pleasure Chronicles* #1

Category: Romance, Sci Fi

Received from: a gift from the author

Recommended for: 18+ due to sexual content and violence

Grammar/editing: A – near perfect

This is a stand-alone book at this time, with the intention that it eventually be a series of interconnected stand-alone stories.

In a galaxy far, far away.... I've always wanted to say that! On a vacation resort satellite, there are no limits. This is a neutral zone for all species to relax, gamble, shop, and meet for treatise. Soon, Nevan will have to announce his Intention for Farana and join their two houses. Farana is the epitome of the expected wife of their planet, quiet, demure, and deferring.... and boring as far as Nevan is concerned. One glimpse of the human, Seena, in the *BloodRing* as a fighter sets his blood to boiling.

That was fun – and hot! Sometimes, it does feel as though you have to fight everything and everyone in order to claim the one that completes you. What would you give? Who would you fight to declare your love? The *BloodRing* made me think of animal fighting. A true abhorrent practice that is unfortunately still practiced.

Imagine sentient beings placed in that pit with primal beasts. This was the life that Seena was used to living. She has never known anything different.

I absolutely loved Nevan and Seena individually, but together their chemistry was explosively lustful. Ms. Monsch once again builds a world that is real. I swear at times I thought the very air around me felt different while visiting the Pleasure Satellite and I hope I soon get to visit again.

Laura says

It was pretty hot. I wouldn't have minded it being a bit kinkier at times, but it was hot enough that I was pleased with my purchase. It was definitely erotica as promised and so I was happy.

Marianne says

In a universe where humans are nearly extinct, Nevan, the heir to a prestigious and powerful house, is shocked to find a human woman as a participant in the blood games in a pleasure satellite. And even more shocking, unlike the demure women from his world, she is not afraid to look him defiantly in the eyes. The pleasure satellites are equivalent of Las Vegas, and what happens on a pleasure satellite, stays on a pleasure satellite. What Nevan wants is *her*, the enslaved human woman, so he proposes a deal: one fight, if she beats him, she will gain her freedom, if he wins, she must willingly and eagerly become his bed companion for the duration of his stay, before he returns to his duties and an arranged marriage.

I found their relationship hot and sexy for such a short novella, and wouldn't mind a continuation of their story. In fact, I would welcome it;-) Seena and Nevan were a good match, as sparring partners and in bed. The only drawback was how easily Seena accepted her defeat and her role as a prize fighter that would soon be killed off. Being that close to freedom, experiencing true passion, only to be brought back, knowing how dreadful her future would be, sounds improbable.

However: All's well that ends well, and I was happy for them both:-)

Amyiw says

4 1/2 stars- Too bad this is no longer available as it is a very good erotic novella/short. Pretty hot sex, an insta-lust vs no lust for intended story. The woman is strong as a fighter and attractive to a warrior. She is a slave but he will have her agreement. Quick erotica with a pretty good scifi back story. Will the author republish it? Or does Ellora's Cave still have the rights? Have no idea.

Linda says

Wow! I thoroughly enjoyed this short, sci-fi novella. It was definitely different and a far cry from my normal reads of late! It had a good plot, interesting characters including quirky, macho aliens and a warrior human,

and sizzling HOT sex. It's a stand-alone book and not part of a series.

My full review is posted at Reading Between the Wines Book Club. Check it out here:

Cynjin says

It is shocking that such a small book, a novella, was so good, but it really was. It made me long for more, like how alien are the aliens? And, tell me more about the fighting - I love stories about fighters. The emotion between the two characters just begged for a deeper conflict, and more to get through before we got to the HE. But, we got we got, and what we got was excellent, even as a short story. :)

Netanella says

3.5 stars rounded up to 4 because I like a good futuristic erotic romance and this one fit the bill. I will definitely look for more by this author.

Ni_kii says

At pleasure satellite, anything goes. When Nevan arrives on the planet, he knows the reputation of the infamous rock. As the eldest son of a prestigious house, he has responsibilities that don't allow him much freedom to enjoy the sins that he can buy there. He is destined to marry a woman previously picked out for him, to run his family's house. Life is mapped out. All that changes when he goes to see one of the satellites famous fights and sets eyes on the most beautiful specimen of female he's ever seen. Too bad she is one of the contestants and is contracted to a slug of a promoter.

Seena has never known life beyond the Blood Ring. One of the satellites best fighters, she attracts visitors from far and wide. When the handsome and rich Nevan comes to her room after a fight, he offers her a bargain of which she has to take notice. Her offers her freedom; if she wins she gets to go free ever, but if she loses he becomes his bed mate. Seena has never agreed to be sold for sex before, but this is different. This is something she wants badly and Nevan stirs things inside her, so the alternative may not be so bad either. When she loses to him, she has to resign herself to becoming his willing sex slave. What transpires between them is not the mindless sex that either them expected. But what happens on Pleasure Satellite stays on Pleasure Satellite...

I really enjoyed this little read. I'm always a little dubious about sci-fi reads (too many scary alien stories have been read with massive/double peens) but this one was very different. The world building was the big difference here as the "alien species" didn't really sound dissimilar to our own. The concept of the pleasure satellite made me giggle though; a place where anything goes and no one judges? Sounds like an extreme Las Vegas! That what they chose to do was gamble, use prostitutes and fight was quite depressing but probably quite accurate.

Nevan was a man forced into a situation by his family circumstances. I didn't seem to be particularly bothered by it so I didn't pity his predicament. He saw Seena and he wanted her so he bought her time and

made her an offer. It was a rather arrogant thing to do and this, along with his treatment of the woman that was destined to be his mate, didn't really warm me towards him. He did show character growth over the course of the book because he became someone worth drooling over a little, but it was too short a read for me to forgive his earlier sins. I liked the way he stood up for himself and the way his "challenge" to her showed he respected her as more than just a sex toy that he wanted to use. It was a different tactic for an Alpha male.

Seena was probably the most interesting thing in this whole story. She was a rough, tough human who had fought to get herself in a position of safety because her handler was not going to get rid of such a valuable commodity. She didn't seem fazed by Nevans intended Sexual exploitation of her. She was attracted to him and wanted her freedom; to her this was a win win situation. She didn't shy away from anything he threw at her and embraced it all. I really enjoyed reading her back story as it enhanced my opinion of the strength of her character. To have gone through all that she had at the hands of her "owners" and still come through as a whole person who kept me engaged was impressive.

At its core, this I thought this story was going to be about sex. There is lots and lots of smutty sex, but I'll confess I was expecting more from a woman who had allegedly been trained in giving sexual pleasure. What I was surprised was how much the sex progressed the story...as much as this was an erotic book, the sex wasn't there simply to titillate.

Overall, a sexy short story which kept me turning the pages until the end. Maybe I'll stop being so snobby about Sci-fi now ?
