The Cassidy Project Christopher Cartwright

In the middle of the Pacific Ocean in 1962, at the height of the cold war, the U.S. military experimented with electromagnetic pulses created by detonating high atmosphere nuclear bombs. The project was code named Starfish Prime. The primary objective was to develop the ability to produce an EMP with enough force to knock out an entire nation's communications, rendering a retaliatory attack impossible.

The secondary objective, along with its consequences, was deemed too important to national security to ever be released.

In 1983 an American B52 Nuclear Bomber goes missing somewhere near the Bering Strait while delivering a secret cargo at the express order of President Ronald Reagan to an unmapped island. Present day, in the Weddell Sea off the coast of Antarctica, a woman wakes up on a cruise ship to discover she's the only person left aboard, despite no apparent fault with the ship.

Sam Reilly, already on a rescue mission to Antarctica to save five French scientists, may be the only person standing in the way of the completion of The Cassidy Project.

Jan Miller says

Wow! I could not stop listening to this book. I was pulled into the story from the very beginning. Christopher Cartwright does an incredible job weaving the story. It is full of suspense, mystery, science, politics, and adventure. The Cassidy Project is a standalone listen that features the character of Sam Reilly. He is a larger than life action hero in my mind, that I absolutely love. David Gilmore adds to the enjoyment of this book with his wonderful performance. Without giving away spoilers, I never saw the end coming. Well done Christopher Cartwright. I will definitely listen to more books by this author and narrator.

Anita Watson says

A floating top secret island. The continent of Antarctica and a particle colider. Except for some of the detail in the actions the characters take, that might seem too much, an amazing read. Full of mystery and suspense.

Helen Larusic says

Good Adventure

Enjoyed the latest installment of Sam Reilly, although this one was a bit far-fetched. A quick read, lots of action.

Annette says

Fantastic

Chris Cartwright is the equivalent to Clive Cussler. I am enjoying the full series, just had to buy them all

David Taylor says

Sam Reilly and crew do it again!

Another awesome Sam Reilly story from Christopher Cartwright. This is a nonstop action/intrigue experience that will have you giving up sleep to finish "just one more chapter" until the night is gone and the story is concluded - sort of because Sam is still on the trail of the Builders.

Keep these stories coming Mr. Cartwright.,

The Cassidy Project

Sam Reilly, Book 5

By: Christopher Cartwright

Narrated by: David Gilmore

This is an audible book I requested and the review is voluntary.

These Sam Reilly books just keep getting better and better! They are part Dan Brown, Indiana Jones, and James Bond but more grounded. Always lots of twists and turns, adventure, action, advanced science or a touch of science fiction, and wonderful characters. By now I feel like the crew is part family! Lol.

The narrator is great and it helps having the same one all the time. He does a wonderful job.

Steve says

Another Sam Reilly adventure with lots of action and an interesting story. An enjoyable read.

Mary Barb says

Another outstanding read...

If you're looking for an author to keep you guessing and compelling you to give up sleep to find out what happens next, well Read this book and Thank Christopher Cartwright when your blurry eyes awaken the next morning. Thank You Christopher

Couldn't put it down easily

Of the entire series so far, this is one of the best. The level of mystery in this far exceeded the rest of the others I have read. A true page Turner.

Deedra says

Awesome series!

Tulay says

Scary story.

Just think off living without electricity, scary story. Many futuristic equipment, politics and little sex. This was the perfect book to read in this hot Texas day. Shivering with them in Antarctica was fun, and learn somethings too.

Auroras Australis - the southern version of the Northern Lights.

Another Great Sam Reilly Book

I totally enjoy this series. The Cassidy Project is very well written. The characters are well developed and interesting. The plot was great and definitely thought provoking. Add a bit of romance and a lot of intrigue and you have the makings for a really good book. I would highly recommend m end the series.

Kim A. Mann says

Great!

Entertaining, fast paced and exciting as usual. Sam's exceptional team once again takes on a brilliant and destructive threat. Well written and very captivating read. Well done Mr. Cartwright

Kenn Goslin says

Deja vu!!!

I read this story some time ago and knew it sounded familiar, but I read it as a stand alone. Great to have better context!

Henry Northcott says

Great book

Fifth in the series and gripping as ever weaving real events into a brilliant story. Will be reading the sixth presently. I may as well find out what happens as I'll be waiting on a seventh book if not.
