## **The End of Summer** Makeandoffer

Summer Jacobs knew full well about her town's tradition.

Every year at the end of the summer, a party would be held on school grounds without the knowledge of the parents or the teachers. It had been happening since before Summer was born and never once was anyone the wiser.

This year however, everyone was going to find out.

Summer had planned a weekend of alcohol, bad decisions and horrendous photo's which she would later untag herself from on Facebook. A whole weekend with her friends at the biggest party of the year, without any worries or parents telling her what to do.

So how she ended up trapped in the school with a deranged psycho killing her classmates off one by one, she will never know.

It wouldn't have been as bad if she was trapped on her own. She would have been happier to face the lunatic solo rather than be trapped with a guy who kept using the life or death situation to make passes at her. His theory was being so close to death should definitely loosen her up, and by 'loosen up' he definitely meant 'get naked.'

Along with his friends who between them had the IQ of a baby tree stump, an outcast who probably still had Spiderman bed sheets and the cheerleaders who were more worried about all the blood staining their new white jeans, they had to somehow make it out of there alive.

And to think, Summer's biggest worry that weekend was waking up with a brutal hangover...

Definitely kept me on my toes.

This is the last book I read in summer 2014 (yeah, I purposely chose this one because of the title) and I'm glad it was.

This book was so much more than I had been expecting, as makeandoffer's stories commonly are. It was a bit heavier than I had been expecting, but there's tons of humor to keep things from getting too depressing. I sort of feel ready now to go back for my final year if high school. If Summer and Archie and the gang can do it after all the shit they endured, so can I.

An amazing mix of creepy and hilarious meddled into one book. The ending was seriously shocking and sad, and many people died, but it was understandable that it had to happen because there was a psychotic serial killer in the mix.

First of all I would say it is for maturer audiences, but I LOVED it. I first read it a couple of years ago and always come back to it. It is hilarious, exhilarating and well thought out. I definitely recommend this book and think it would be the most hilarious/greatest movie.

This is my all time favourite Wattpad book, and probably one of my most reread books ever. The characters, the gripping plot and the writing style all make this book what it is, a true masterpiece. I know there's a lot of stigma around Wattpad, and I'm completely aware that there's a lot of trashy stuff on there, but it's when I come across books like this one that I realise why I love it. I really hope this book gets published one day, heck, I hope it gets turned into a film it's that amazing. I remember the first time I read this I was completely

in awe, and even after having read it many more times I still have the same reaction. Easily one of my favourite books of one time, it deserves so much more than what it has.

I am at an impasse, it's more like a 3.5\* read.

I should advise you that this is not age appropriate. We have 16 year old characters that act and talk like 20 something.

You should be aware that is pretty explicit and I would not recommend this story to persons below 18 years old.

That said, it was intriguing and well constructed. There was a plot twist that nobody could have guessed. And a story that tore at your heart.

I enjoyed reading this.

So I was on this wattpad app I have on my phone and I came across this book. I have read another book by the same author (Illegal My Ass) and I thought, why not give this one a try?

I am so glad I did.

Seriously, this writer is the funniest I have ever come across. She has this beautiful way of writing, and makes everything seem so relatable. At one point in this book though I nearly shat myself, not gonna lie.

It was funny, sarcastic, creepy, and made me "awww" so much I started to annoy myself.

Have you ever found a book that takes you days to get over, it's like you actually have a hangover?

Have you ever found a book that has writing so beautiful it actually changes your perspective and the way you think about things?

Have you ever found a book that can make you cry, laugh and sh\*t yourself at the same time?

This is that book.

I really hope that all of her books get published one day because they are amazing.

Funny, loads of swearwords but that's how I roll too so it's okay, and it makes you want to read it until the end because it's not only your typical 'wattpad teenage love story' but it also has a really exciting and cool storyline.

I don't really like the cover and the HEARTBREAKING ENDING(it had to happen, but still).

I did like the hilarious main character and the very handsome love interest.

I really enjoyed this book!

Well, she did it again! Makeandoffer has switched up her genre again. She went with a humorous mystery/thriller this time. Please, please makeandoffer publish already. I am the type of reader who reads downloadable books and if I love them I will purchase the actual book. So please give all of us readers, who love your writing, the option to buy a book that you have written. Okay fangirl moment over.

So, once again makeandoffer has created characters that are fun, charismatic and entertaining. Characters you wish you could be friends with. The main characters have fantastic chemistry and I couldn't wait for them to finally "hop on"!

She always does a great job with making a well thought out story. In this mystery/thriller, you may have an idea who the killer is early on (I didn't but I noticed there were some people who commented that did), but she throws a few surprises at you along the way. Like all of makeandoffer's stories, she was able to make me go through every possible emotion. I could start out completely angry and quickly move to laughing, then be completely hysterical crying and then back to laughing, all within the same chapter.

This book is amazing !!!

The characters, the plot , the writing style ,everything about this book is really good.

I have to say that this author is one of my favorites.

Her writing style is beyond lit .

Also I just love how the female lead characters are bold , realistic and not those typical wattpad girls who are "fragile" , "shy" etc etc

A few of the last chapters are poetically very beautiful .

Over all , this book ( and every other book by this author ) is a must read !

This book is full of surprises.

"I can see the headline now.

Kanye West traps and kills Kids at school. Still acted like a self-centered douche."

with lines like this I just couldn't pass up the opportunity of reading it. However, when reading this book, I never thought I would find myself finishing it, because for a long time now I've skipped out on reading anything near the thrill of a scary movie (as lame as it sounds its the truth). Even so, I can proudly say that I finished it and I really loved it.

There were a bunch of feelings I got from this book. The book was really great its just that there are too many things in this book to sum up. It was a thriller, a comedy, a romance, a piece of life, psychological but all in all a good read.

The main characters, Archie Henderson and Summer Jacobs were hilarious. However, it was Alex Henderson that took my heart.

He had me crying at, "It was the first night in eight years I slept like a fucking baby." Well, he had me crying well long before that but you know this is not a spoiler review.

I still get the chills when I read certain chapters, soo much adrenaline and its just WOW! Hands up to the writer.

I love this book; it's amazing. I love the characters, chapter names, creative plotline, interesting cover and tagline, and the suspense. It keeps you guessing who the killer is, or who the sidekick is.

There's only one thing to say about this book to sum up how amazing it is...

At this party, a hangover is the least of your worries.
