## Confusing Hearts Julie Trettel

A forbidden love. Unlikely mates. A secret romance.

Jenna Lockhardt has always been the perfect daughter. Being a princess means making sacrifices. Her responsibilities are clear. Keep the Royal lineage pure. Her future is set. She must take a compatible black panther as a mate. But a moment of rebellion has her transferring across the country to attend Archibald Reynolds College.

Chase Westin always knew he'd find his one true mate...someday. He never expected that someday to be now. When he returns to college, it's the last thing on his mind but the arrival of an exotic beauty stuns him. She captivates him. She drives him insane. Chase knows these feelings are impossible. Dogs don't fall for cats. Now he just needs to convince his heart of that too.

For Jenna, mating outside the panthers is forbidden. Sealing a bond with Chase will bring grave consequences. Jenna must decide—duty, or her heart. Can she accept the sacrifices that come with her final decision? How will she choose?

This one is by far my favorite of the Westin Pack series. I couldn't put it down. I thoroughly enjoyed the integration of other shifters (especially Chad)! :-) I did not really read much shifter until this series, now I impatiently wait for the next one!

#### **Caught off guard!**

I must admit that I was not thrilled to read the 4th book upon learning it was about Chase (wolf) and Jenna (panther). I have been cruising through this series and I was ready to halt. I have read many shifter stories and a few brooches cross species relationships and I hated it. The stories didn't jive and I was honestly going to read the first chapter, a middle chapter, the last chapter and the epilogue. That would give me bear minimum knowledge. Enough to know a little about them and I could move onto Lily's story. Well that was the plan but after the first chapter I couldn't put this book down!

I was so caught off guard! I am so glad I was wrong. Chase and Jenna have become one of my favorite storylines in this series. They were written so well and made so much sense. I loved getting to know them. Chad the squirrel was a complete surprise in this book. I even snorted when he showed up and thought, "what a joke". Joke was on me though. He is seriously funny! Total opposite can be said of Jake. We meet him and because of who he is I don't like him. He makes me want to give this book 4 stars. However, I just came through some heavy stuff at the completion of this storyline and it deserves 5 stars. More plots weaved together and more secrets are discovered. I'm looking forward to book 5. I don't see a "Cole" story (in the series) but I seriously hope that's in the works and I want some more Chad-isms please!

#### **Always a pleasure !!!**

Julie is a writing genius. I literally can't wait for her next book. I am always shocked at how much I love her books because the descriptions do NOT do them justice. I was like, "ugg, a college staged book, so not my thing." But as soon as I got into the second chapter I was in love with this book. I love how Julie does something different with the women in each book. There are too many authors that tend to do "type a" heroines...but Jenna comes off as very different. This book reminds me of the first one in the series, it's like

it's Kyle and kels if they met in college and if kels didn't go through heck when she was younger. Julie...you rock!

Confusing Hearts is the fourth book in the Westin Pack Series. You can read this book as a stand alone but you will get greater depth by reading them in order. This book features the youngest Westin, Chase. Chase is attending college at the shifter college: Archibald Reynolds College. He is your typical upperclassman, attend classes, flirt, party, have one-night stands, rinse and repeat. He belongs to a fraternity that is mostly wolves but a few cats and others. His best friend is a jaguar named Matt.

Jenna Lockhardt and her twin, Tessa are attending college far away from home. Jenna chose Archibald Reynolds College to get away from her overprotective parents. Jenna and Tessa are panther royalty, daughters to the King.

Chase meets Jenna and confusion abounds. He thinks she might be his true mate but sees her again and his wolf disagrees. He has no idea that she has an identical twin. He learns that she is a panther shifter. Can interspecies be true mates? What will Jenna's parents do if they find out?

Chase and Jenna want to be together and decide to mate despite there being consequences. These consequences could lead to war between the families and packs. There will be casualties.

Be prepared for a heart wrenching story that keeps you turning the pages. This is a sweet love story and some sadness. Through it all the Westin family shines.

Each story about the Westin Pack has been vastly different. Each Westin sibling are similar yet distinct. I can't wait for Lily's story.

#### **Confusing Hearts**

I'm so mad that Matt died. I knew wish they had punished the tigers that raped Maddie, so annoyed that Jenna's twin was dating one. Even if Jack was young he could have found a way to report what happened , I guess her being dead was the better option. He was lucky Maddie had a forgiving heart. I love how each book still includes people from the previous one, so we know what is going on in their lives.

This instalment of the Westin pack is packed full of emotions. Suspense, intrigue, joy, sadness and love. What a lovely story and message this book delivers. Really enjoyed it. Can't wait for the next one.

**More More more more!**

I absolutely love this series. Please keep them coming. I want to see Lily go through her mating. I believe that will be wonderful! I have to admit; I want to see Tessa and Anita meet their mates. I want to see the Westin pack grow and grow and grow. I can't wait to read your next installment. Loyally a Westin pack fan! Werewolf reader for life! You do them well!

#### **This was a really good book!**

This is so well written. It deals with racism in a different w. Who can say who your one true mate is ? Are they only a one true mate if they are the same color or species? Or does it have to do with what is on the inside that matters most? Are you truly willing to die to defend that belief?

I have really enjoyed each book in the series so far. However this might be my most favorite! I am happy and sad at the ending. I highly recommend this book!

#### **Cat Vs. Dog???**

If you've been keeping up with this awesome series about the Westin Pack, then you know that they have never had an inter-species mating, as a matter of fact it's never been heard of in their world of shifters.. They have mated powerful witches and they are not racist by any means, but never different type of shifters.. There are still those shifters that believe in keeping the species pure though.

Chase Westin is the youngest of the Westin siblings, he is away at college for shifters (ARC where he has quite the reputation as the ladies man. Better they call him that than geek, if they find out, after all that's why he keeps his geekiness a secret cause girls don't lust after geeks. One night when on the prowl for his next conquest at the new sorority house, he is slapped with the scent of his one true mate, but how can that be possible there?

Black Panther princess Jenna Lockhart has put her foot down for the first time in her life and asked to go to ARC where all the species of shifters can intermingle even though her father the King is a purist through and through... After all ARC has the best department on her passion Photography. There is one hitch though, the king has her twin and all the other females of his Pride go there, but no intermingling allowed and they all know it. Jenna is taken aback when her cat starts purring in the presence of the brothers of D.O.G. when they come through the door for the party.

If you've been keeping up with this series you'll find that this story is way more intriguing and mysterious than Patrick and Elise's story and will keep you captivated till the end not knowing what will happen from one moment to the next.

### **Naomi says**

While I've been dying for Lily's story, Chase quickly took his rightful place as the 4th Westin to get his story. It was fun to see him struggle in a whole new way from his siblings.

Even though I've loved all of this series so far, I was surprised that within just a few chapters I was hugging my pillow with unshed tears in my eyes as I quickly connected to our heroine and her situation.

Absolutely LOVED Chase and Jenna.

The look at college life for shifters in this world is fun without being too quirky. Seeing Chase in a whole new light was also fun. Readers have a certain idea of him from earlier series books, but then we get to see the reputation he chose to build for himself when away from his Pack. Who hasn't reinvented themselves in college? There is also another great supporting cast of friends and family around our main characters, which I believe is one of Ms. Trettel's strongest writing skills. I felt like I was in class, studying in the library and walking the halls of this campus.

I gave the book 4 stars because the challenges came late in the book and were a little underwhelming compared to the foreshadowing, and while I never want to see anyone die, were wrapped up a little too quickly. That isn't to say there wasn't some serious heartache as a consequence of too powerful people who can't listen and wield too much might for their people's own good, because there was, and a piece of my heart was torn out.

But, overall, I highly recommend this book. It is right on par with the rest of the series, and if you don't get as emotionally involved as I do, you'll probably love it even more.

Happy reading!

I absolutely love how each Weston novel is so very unique with different personalities and differing storylines!! Each new book is such an exciting adventure, and this one was extra exciting! How does Ms. Trettel manage to make me cry with every single book? There is so much heart written into each page! I loved this book because it was not an easy boy meets girl scenario. It was messy and complicated and worrying. Different species mating is not a new concept, but I loved how Ms. Trettel took the plot and kept it fresh and made us wonder and hope for that happily ever after. Jenna really becomes a beautiful being, with individuality and sass. Chase..... well it's awfully good to see him stop his roving ways and be knocked for a loop! I love the confusion he suffered when trying to solve the puzzle. These two together are so sweet and you can't help but root and cheer for them. This just may be my favorite pack story ? It was amazing as always to get to still be reading of past characters!! Cannot wait for the next edition ?

Another good one! This was definitely different and no doubt meant to be but against all odds it came together, never knew he was such a playboy lol, and i never laughed so hard when Chad came in the picture and got in with the fight at their cabin by school lol he's so funny but a smart one, I am sad Matt didn't make it

Wow! I was blown away again, by another fantastic romantic suspense novel that grabbed me from the start & held on tight so that I read it in record time! "Confusing Hearts" is the 4th stand-alone in the phenomenal Westin Pack world of shifters! I don't know how Ms. Trettel comes up with each, brand new & different story with fantastic descriptions and surprise twists & turns, that somehow tops her previous 5 star books, but she does it! Plus, she gives us those well-defined characters that jump off the pages with witty dialogue that I know will keep readers engaged and turning pages like I did! Even tho I always volunteer to read this author's works, it is without any outside influences, and I buy books, too, when I can :) So I can honestly recommend this to all adult fans of fiction & especially those who love fantasy, PNR and/or shifters! Omg! I can't wait for more, but I will!
