Guarding Jess Shannon Curtis

Jessica Pennington's work as an etiquette coach requires her to be polite and proper at all times, especially now that she has a book coming out. The only thing that rattles her reserve is the increasingly violent emails and texts from her persistent stalker. With the book launch in jeopardy, she reluctantly hires a bodyguard.

Noah Samuels hates stuck-up, prim people like Jessica. He's more the blunt, straightforward type. But to advance up the ranks at McCormack Security, he has to take the high-profile assignment. After a near miss on his first day on the job, Noah realizes that the stalker isn't just hype cooked up to sell books--the threat is real.

As the stalker escalates from letters to letter bombs, Noah sees a vulnerable side of Jessica that rouses more than just his protective instincts. But can she let down her guard long enough to trust Noah before it's too late?

Gotta Love Warm Milk

Etiquette coach Jessica Pennington makes a living being and teaching people to be polite and proper in every social situation. It's a surprisingly lucrative career. Perhaps so lucrative that now, just as she has her first book set to hit the shelves, Jessica has been targeted by a stalker whose threats are growing more and more dire.

The combination of his years in the military and his time with the elite McCormack Security Agency has bred a thirst for action and a need to make a difference into security specialist Noah Samuels. Just recently back at work after taking a bullet on his last job, he's going stir crazy as he rehabs his arm and waits for his next assignment. Serving as bodyguard for Miss Priss isn't even close to what he had in mind. Who in the hell would want a manners coach dead, anyway?

No sooner is he introduced to the pretty and uptight Jessica than Noah is snatching a suspicious box out of her hands and racing an explosive device away from the potential victims in her office. While he may have no idea why or who...yet, there is no longer any doubt that someone's obsession with the pretty but contained manners coach is deadly serious.

The longer he guards her and works on figuring out who is stalking her, the more Jess starts to get to him. Instead of an uptight, prissy, and demanding task master, he sees sides to Jess that are doing surprising things to areas of Noah's chest he thought long dead. Soon he's thinking that the job he originally pegged as babysitting until his arm is well enough to handle an *important* assignment may just be the most important assignment he'll ever have.

Guarding Jess was an entertaining, sexy, suspenseful surprise. I wasn't crazy about Curtis' series debut Viper's Kiss, which I felt crossed the line of believability and tread dangerously close to ridiculous in places. This second book managed to keep the quirk factor that appealed in the first book, had great characters with strong chemistry and a plot that delivered an ever-intensifying level of danger and suspense, but stayed within the bounds of plausible.

Noah and Jess were a fun couple. Noah had tall, gorgeous, and broody down pat. Perhaps he was relatively stereotypical for the genre (how many ex-Special Forces security agents does that make in the genre, now, a bazillion?), but he had a few personal issues and emotional baggage that set up some internal conflicts for the character that fit well with the storyline. Jess had layers and depth that pushed her character beyond Miss Priss into a caring, down-to-earth woman with a heck of a shy side. I loved her backstory and the details that fleshed her out into a likable, intelligent woman with flaws and insecurities.

Individually they were each strong enough for their roles as romantic leads. Together their relationship had some adorable and fun moments, plenty of sizzling-hot sexy moments, and a good number of solid story-progression moments to round it all out. The romance plot threads were woven together nicely with the suspense and their relationship evolved in a fairly realistic time frame, which was a bit of a surprise given the length of the book.

I really loved the suspense plotline, too. Curtis kicks it off strong, then builds it throughout the narrative, slowly and steadily increasing the threat level and danger until it reaches an intense climax. It lacked a little of the complexity of some of my favorites in the genre, and I had the Bad Guy pegged from the moment the character was introduced, but other story elements were a surprise and overall the storyline avoided much of the sort of cliché that drives me a little batty. It was a strong and solid, if straightforward, suspense.

This was slightly more than a four star read for me. I would have liked just a bit more originality in Noah's character, more involvement with secondary and ancillary characters, and a few more layers in the plot. Given the page count, though, and what was included in the story, this was a very satisfying read. One that was far above that of its predecessor in many ways, not the least of which was my ability to maintain a willing suspension of disbelief.

Yes, it was a little cheesy in places (nothing I found too egregious), and it had moments that were lighter in tone than others. It was, though, a good suspense and a sexy romance with two characters I enjoyed very much. If this second book is any indication of the direction this series is headed in, I will definitely be along for the ride.

Jessica Pennington spends her life instructing others in proper decorum. As an etiquette consultant, she prides herself on presenting a serene demeanor, allowing nothing to rattle her cage. Until Noah Samuels, that is. His boss enlists Noah as Jessica's bodyguard when she begins receiving ominous, nasty threats. Good thing Jess's body is one he likes guarding.

If you know what I mean.

But I'm ahead of myself. And I'm certainly ahead of Shannon Curtis, who keeps us waiting a LOOOONG time for some headboard rockin' in this book. And even then, it isn't the headboard that gets rocked.

Before Jessica and Noah engage in carnal adventures, they have to overcome the negative preconceived notions they have about each other. OF COURSE they have negative preconceived notions, because, COME ON, this is a Hot Romance Novels, and we all know that in Hot Romance Novels, the happy couple must work to be together. Jessica thinks Noah is a bit obtuse and lacking in social graces, while he thinks she's a snob. His nickname for her? Miss Prissy.

When Jessica lets down her guard, though, and confides in Noah just how upsetting this stalker business is, he softens toward her. Well, maybe internally he softens. Externally, he's all hardness.

If you know what I mean.

Noah stared at her, his mouth open. He couldn't ignore the thread of hurt underlying her words, as though his remarks had cut her deeply. Her eyes were flashing and the color was high on her

cheeks. Her chin was up, her shoulders back. She was defiant. She was scared, and she'd just undone him completely with her impassioned argument.

Put a fork in him, because he's done. And as an aside: Jessica squares her shoulders very, very frequently in this book. Very frequently.

Jessica, too, is attracted to her protector. He's built like a linebacker, and she, while petite, has legs that make Noah growl.

The thing is, though, *Guarding Jess* gets pretty dark and violent. While on the one hand, it's the story of a romance, on another level, it's about the twisted mind of a stalker. There is a body count in this book, and Shannon Curtis is unflinching in selecting her victims.

This book has a story that hooks you, characters who make you care, and some decent sexy times. I would have liked more of the latter, but that's just me. The mystery was well done, and it's a quick book to read, making it a good selection for the beach.

When you first begin this book you have a feeling it is the same old same old story of the strong but silent type man protecting the “proper” woman. She has to be proper and polite and he just wants to “ruffle her hair to see her messed up a little” and honestly it is but it is a fun read. Noah is the type of guy who does not say much but when he does you want to cry for him or laugh at him. And Jessica is just a woman who wants to please everyone but never seems to be happy with herself.

While there was not a lot different in this book from practically every other book about a bodyguard guarding a celebrity I enjoyed the read a lot. The characters are enjoyable. I love how Noah puts his foot in his mouth more often than not and with Jessica you want to yell at her to loosen up and go for it with Noah. The book is very well written and was a great suspenseful story. I will say while I had the who figured out I certainly did not have the why figured out and the ending had some interesting twist. I found this book very enjoyable to read.

Anna says

Guarding Jess is yet another quite entertaining but not at all unique or memorable romance title I read this year... There was absolutely nothing wrong with *Guarding Jess* but I'm afraid it lacked most of those elements that would make it a story that could stand out among all the other romantic stories that one can choose from. On the other hand it was fun and quick and in its entirety an enjoyable read.

Let's face it, I'm a sucker for romantic suspense stories, especially those that have a sexy and hot bodyguard in them. Granted, I like my heroines strong and not a damsel in distress in need of a knight in shining armour, but once in a while, I crave for a good alpha male that saves the heroine a couple of times. And Guarding Jess, had exactly what I was looking for: a delicious alpha male who was more than able to save the heroine, Jess. And Jess in turn, may have been a damsel in distress but she wasn't weak at all. And I really liked that about her. Even when she was scared and her life was in danger, she was strong, she tried to mask her fear in a veil of stubbornness and didn't run and hide when facing a dangerous situation. All those things made me really enjoy this story.

But, as I said in the beginning, there was nothing quite memorable about anything in Guarding Jess. Even if the story was well executed and interesting, the recipe is well known and even more well used. I can't even count how many similar stories there are out there, and even if Shannon Curtis did a good job with her writing, in the end of day, I'm quite certain that I will forget everything about this book sooner rather than later.

I can't pinpoint exactly where those feelings come from. Maybe because both Jess and Noah didn't possess that certain quality to make me really feel them and invest on them. They were nice characters but nothing extraordinary. No matter how hard I tried, I couldn't really love them, I couldn't care for them. I just read their story, which might have been interesting, but that's it. As soon as the book was finished, I moved on, forgetting all about them.

The clipped sentences, didn't help matters either. They just made the narration seem forced. All those short sentences just distracted me a bit I guess.

And Noah and Jess I'm afraid weren't the definition of a hot couple. I couldn't feel the spark between them and in cases, I felt that the way they were brought together was a bit forced once more. I couldn't feel their connection, their feelings towards each other. And the sex scenes lastly, were just okay. Or maybe I felt they were just okay because I just couldn't invest in the main couple. Don't know exactly what to blame for this one.

All in all, Guarding Jess is a cute and quick read that you will have a good time while reading it, but other than that there is nothing special about it. But it is not a bad book, not by a long shot.

Rose says

Well-paced and wonderful romance with a suspense/mystery edge. "Guarding Jess" was my first read from Shannon Curtis, pertaining to a no-nonsense bodyguard - Noah - falling for his client, an etiquette author named Jessica (Jess). Jess isn't sure why she would ever have a stalker in her line of work, and she's not happy about needing a bodyguard to hinge in her daily activities. Between threatening letters, a package that detonates, and mysterious strangers following her, Jess is in the line of fire and Noah - in so many words - just wants to keep his client alive.

I enjoyed getting to know both Noah and Jess, and found their back and forth exchanges interesting to watch. The story toggles between harrowing moments where Jess's life is at stake and it threatens the well-being of herself, her family and friends. Notably there are losses in this that don't come across without weight. Yet, the story also had very cute moments (like when Jess coughs milk onto Noah when he startles her one night) and nicely accented intimate moments between the characters. It's a quick read, realistic and well drawn for

both the main characters as well as the secondary ones. Despite it being a short read, I connected with them as the narrative went on. I did think the reveal of the stalker was surprising, though odd considering the reason given over why they stalked and threatened Jess in the first place, but the surrounding developments and lead-ins up to the point of the reveal were done well.

I would certainly recommend this for a quick, thrilling and romantic read, and I'm not hesitating to try more of Curtis's work in the future.

Overall score: 3.5/5 stars

I love my romantic suspense, and the blurb for this book sounded so great. A bodyguard, a stalker and a prim and proper heroine... it just sounded like a recipe for success, and I enjoyed it very much!

Jessica has a book launch, a business and multiple social events to manage, all while trying to live without the fear that today will be the day her stalker tries something new. She is stressed and under insane amounts of pressure, and somehow, just barely, manages to keep her cool. That is until Noah walks in the door and saves her from a bomb within five minutes of shaking hands.

Noah is desperate to get back to work after a shooting, and taking a babysitting job is something he can do to prove he's ready to go back to work. But after the bomb on day one, Noah soon realizes that this is not the average stalker. He sticks close to Jessica at every turn, and despite their attraction, is willing to do anything for the woman who keeps getting more and more under his skin.

I was really surprised by how much I enjoyed the suspense in this book. I've found that very few authors can do a really good job of doing a romantic suspense in less than 200 pages, but Curtis did an amazing job with keeping the suspense alive and moving the story forward, and even slowing things down too. I will definitely be looking forward to reading more from this author in the future.

I really liked Noah, from the second he came on the page, kicking butt as he went. He was surly and opinionated and although he wasn't super happy about taking a bodyguard position, was one hundred percent dedicated to his job. Watching him struggle with falling for Jessica, someone who was the complete opposite of what his "ideal" woman was like, was great fun. I've always been a fan of books that can do this trope well, because it creates so much tension and angst and fulfillment once the characters finally come together.

Jessica was a wonderful heroine as well. Her character is peeled back layer by layer and as more was revealed to the reader, the more I liked her. She comes across as this very calculated woman, one who weighs every action and processes every move she makes. But as her backstory is revealed, I was left thinking nothing but positive thoughts about her: how she was so positive and caring and sweet and sincerely dedicated to the life she carved out for herself.

While the relationship between Jessica and Noah is smoking hot with sexual tension, it wasn't without its

faults. There were times it seemed like they were on the same page emotionally, only to take a giant step back from one another, shut one another out, and do silly things to push one another away. That annoyed me a bit, especially when Jessica forced Noah to leave, putting her own body in harm's way of the stalker. It felt a little like a TSTL move, and I wanted to yell at her for making that decision, especially when it cost her so much more than she expected.

Again, I can't say enough good things about the suspense in this one. Especially when it came to the mystery of who exactly the stalker was, I was so surprised by the end. Curtis did a wonderful job of keeping the mystery going, keeping me on the edge of my seat, and leaving me guessing up until the very last minute. Bravo!

All in all I really enjoyed my first ever Curtis read. The suspense was so incredibly well done, the characters were developed in a way that engaged me more than I could have ever hoped for. While the romance wasn't my favorite, it was filled with sexual tension that kept me rooting for them. I would definitely recommend romantic suspense fans pick up this book and give Curtis a try!

I give *Guarding Jess* a B+

WOW! That was an amazing emotional roller coaster and I loved every minute of it! Jessica is an etiquette coach, so appearances are everything for her. Noah is ex-military (Green Beret) and now handles personal security. Noah's new assignment, protect Miss Manners from a stalker. First impressions are everything and they both got it wrong when they first met. Over the next few weeks, they slowly fell in love with each other. But will Jess survive the stalker?

I really enjoyed this story and was sitting on the edge of my seat the entire time. The story flowed and I loved the characters. I would have liked to have more of Noah's story. His story seems a little stilted. However, this is the first in what appears to be a series of McCormack Security Agency series, so I still may get to know more about Noah in the future.

My heart bled for Jessica as we heard her story. She had such a difficult time growing up and she's tried so hard to make things easier for herself and other around her. It's apparent that she's become a wonderful person and tries so hard to give back to those around her.

The mystery was well written. Even though I did figure out who the stalker was early on in the story, I was quite impressed in how the stalker accomplished the things they did. There was one aspect I never did get answered when it came to the stalker. How did they get the intimate details about Jessica's clients? That was one question I would have liked to have received an answer for.

The budding romance between Noah and Jessica was pretty typical for these types of stories. Even though it followed the typical pattern, I still enjoyed it and found it to be very enjoyable. The tension between them kept building and building until they exploded! The sex scenes between them were very tastefully done and not extremely graphic. Even without the graphic nature of the scenes, it was easy to feel the passion they were feeling and get sucked into it right along with them.

The ending was in no way disappointing. Shannon Curtis didn't pull any punches when it came to the ending. Things happened that I didn't want to happen, and people died that I didn't want to die. This upped

the ante on the suspense in the final show down.

Overall a very good book and I can't wait to read more in this series.

I was pleasantly surprised by Guarding Jess... The characters were great, granted Jess got under my skin a few times because she was so proper and kept everything inside but then again that was who she was, her appearance and personality reflected on her business and she was determined to succeed for a reason that just warmed my heart. I didn't feel a connection with Noah in the way that I do with most heroes but I still had a little crush on him and when he played the talking ball with Jess at the end... I couldn't help but smile and sigh.... Definitely a good little read!

I liked the story well enough but you see what killed it for me was the fact that the plot was so predictable. Half way into the book I knew who the stalker was. Romance between Jess and Noah as I read it was like I was writing a mirror copy of the scenes in my mind, that's how predictable the plot was. Very formulaic now I understand romance of any genre follows certain tried and true formulas because they work. But there is a difference between tried and true and lack luster. Sure there were some steamy scenes in there that were a heart beat away from "heaving bosoms and flaming manhood" status but just, giggle. And even though the stalker character throughout the entire story comes across as this mind f%\$@ once confronted lifetime movie style the confrontation is disappointing.

As part of my campaign to read other genres I don't usually read I picked this romance, because I was intrigued by the synopsis and wanted to see if the story could hit all the right notes. Be a romance but still manage to throw in some twists the reader doesn't see coming. Alas that was not the case in this instance. But if you are a romance junkie and just want to disconnect from the world for a few hours then Guarding Jess will be perfect for you. As for me it wasn't my cup of tea. The pacing was pretty good, the writing wasn't the great works of Shakespeare but I don't think it was meant to be. Characters are cookie cutter, examples the injured warrior and the woman that calms his restless heart and restores his faith in love again. The friend that provides a little comedy relief, there is even a handsome playboy. So for those saving graces I gave Guarding Jess a three out of five. Due to some steamy scenes I would recommend this book for the adult set sorry kiddies no room at the inn for this one. Read Guarding Jess and maybe you'll disagree with my rating post your comments below and let me know what you thought of the story.

Ruth says

This romantic suspense provided by netgalley was OK.

What I liked:

- The author managed to make the heroine, despite being an etiquette expert, something of a likeable person
- The plot was good enough to hold my attention

What I didn't like so much:

- The hero was almost completely one dimensional. Now, I don't mind the old green beret-becomes-bodyguard trope, but the hero has to have more to his character than a set of fab biceps. If I actually met him in Real Life, he would probably be one of the most boring people I'd ever met.
- I'll be honest, this book offered nothing new on the bodyguard trope. I was actually a bit disappointed, because I did quite enjoy the first in the series, Viper's Kiss, which was a pleasant little romantic suspense. This one felt like I'd read it, or something too close to it, several times before. You know, Perfect Bodyguard meets Perfect Stalking Victim, they save each other, fall in love, get married, have 16 children and found a leper colony... The ending was so Perfect I felt a rather unpleasant wave of nausea that made me skim a few pages until the feeling passed. Likewise, halfway through I found myself wandering whether there was any way in which the heroine is not perfect (apart from being TSTL on a couple of occasions, but this seems *de rigueur* with Perfect Heroines), well, at the end, I learned that, no, she is perfect in every way.
- And lastly, the cover is not as hot as Viper's Kiss, the first in the series, which has a super hot coverboy in just the most deliciously lickable pose...

So, 2 stars, it was OK.

3.5 out of 5 stars

Guarding Jess was the first book I'd read from Shannon Curtis, but it won't be the last. I actually got an early copy from NetGalley and plan on buying Viper's Kiss, the first book in the McCormack Security Agency series soon.

I liked Jessica from the first time we met her. I could tell there was more to her than what she showed to the public. Noah was a bit of a hard-ass in the beginning, but the more time I spent with him, the more I liked him. I could see the attraction between Jessica and Noah from the minute they met. It's not really a good thing for a bodyguard to be attracted to the woman he is there to protect, but even when Jessica seems proper and polite, Noah still wants her.

Jessica is just as attracted to Noah, although she doesn't seem to trust her own judgment with all that is going

on in her life. She will do anything to protect her business and her book launch, and that even means putting some of her trust in Noah to protect her from her stalker. I admit I did figure out early on they were off base with who they were looking at for the stalker. I didn't have the right person in mind, but I was correct in my guess in the sex of the person. The only problem I had with the book was figuring out the secret of the stalker early in the story. However, I do read lots of mysteries and romantic suspense stories.

Jessica and Noah grow closer with each passing day and their attraction only gets stronger the more time they spend together. I loved the passion between them once they finally gave in to their attraction. They really were perfect together.

I really enjoyed Guarding Jess and Shannon Curtis' writing style. I like reading about strong characters and there are many strong characters in this story. The official release date is May 14, 2012 from Carina Press.

My Review:

I really like this romantic suspense series from Shannon Curtis. Book #1 was Viper's Kiss (you can see my review of it [HERE](#)), but this book as the second book in the series, works perfectly well as a stand-alone book. On the surface, Jessica and Noah have nothing in common, but they actually are more alike than it would seem. Noah came from money/society and abandoned that world. Jessica did not come from money/society, but has learned to fit in there. They both are very protective of their place in the world because of the hurt they have suffered to get there. As a result, they are often times judging each other more harshly than warranted.

Jessica grew up on a farm where she was allowed total freedom. When her parents died suddenly, she was thrown into her Aunt's high society world where she was shunned because she didn't know how to behave. Obviously, that hurt...a lot, and she started her etiquette business as a way to help keep other people from suffering that same humiliation. Her entire goal in life is to make sure that people feel comfortable in any surrounding. In other words...she is an incredibly nice person who doesn't want to hurt anyone's feelings. To have a stalker who is threatening and vicious about their very personal attacks is a huge blow to Jessica's mental well-balance.

Noah grew up in polite society, but withdrew from that world when a woman and his father betrayed him. He didn't realize it at the time, but the woman was very shallow. She was all about her image and ways to improve it and he was incredibly hurt because of that. When he is assigned to Jessica, he immediately sees her as another society doll only out there to improve her own personal status. It takes a while for him to see past that pre-conceived notion about her. His attitude adjustment happened slowly over the course of the novel and I liked that gradual change.

This is an action packed novel with a lot of high suspense. I had some suspicions fairly early on about who the stalker was, but Shannon wound the story around very well so that it truly could have been anyone in a handful of suspects. There is another character in the story, Drew, who is another agent brought in to help Noah. I LOVED what his character added to the story especially in the few chapters where the story was being told from his point of view....so funny. I am really hoping we get his story soon. He's going to have a fun story when he falls because he is SUCH a player!

This was a great book and I look forward to more from this series!

Let me first say that Noah Samuels can be my bodyguard any day of the week. Okay, now lets get on with the review. I was hesitant at first to read “Guarding Jess” because although it had good reviews, I was in the mood for a five star book. Holy heck, I almost got it (I just wished it was longer.) I was really impressed by “Guarding Jess” and didn’t expect to be so fully pulled into its plot. I started it and finished it within a few hours. Of course, the main characters Jess and Noah start off on the wrong foot. They eventually start to fall into the same stride and get to know each other, bringing them close together and banishing the stereotypes they hold for each other. When they finally open up to each other, it changes the whole mood of the book.

I applaud Shannon Curtis for writing a strong woman who didn’t back down in the face of danger, who kept her cool amongst the public while being stalked. And I just loved me some Noah and his protectiveness towards Jess. “Guarding Jess” was a wonderful surprise for me.

Mary Catherine says

3 out of 5 stars on Ordinary People, Extraordinary Works

As plots go, GUARDING JESS relies on the basic suspense factor. A woman – Jessica Pennington, in this case – is somewhat well-known and is the target of a stalker. The threats have gone beyond letters and phone calls; in the first few scenes, Jessica receives a package that contains a letter bomb. Luckily for her, she’s just met Noah Samuels, her new bodyguard who manages to keep Jessica and her friends safe for the time being. There is an attraction between the two but one that seems will never happen, since Noah highly dislikes women like Jessica, who makes a living by teaching etiquette classes.

Shannon Curtis writes two main characters that are somewhat believable. Jessica is an independent woman who, while she understands the dangers happening around her, is determined to continue doing what needs to be done in her daily routine. Her tenacity causes issues with Noah, who just needs to keep her alive. Noah is a typical man’s man and though he’s not the best hero I’ve read in a novel recently, he’s decent. He’s protective – at first only as Jessica’s bodyguard, but soon because he realizes he has feelings for her – but not in a cringe-worthy way. The splattering of secondary characters also works, especially Jessica’s aunt who, like the others in this book, has two sides to her.

As for plot, there isn’t anything spectacular. It reads like a typical stalker story with a love story emerging from the likeliest of characters. For me, the stalker seemed obvious from the second readers are introduced to

the character, yet it is impossible for those in the story – including Noah and those helping him from his company – to figure it out. After a while, it begins to seem ludicrous that the mystery isn't solved yet, especially when the bodyguards are trained to notice specific details that they instead seemed to gloss over.

GUARDING JESS isn't the best book of its genre but it is good and won't take long to finish. It's one of those books that fans of romantic suspense can take by the pool or to the beach for some interesting words in the sun. Curtis writes well and I plan on checking out her next book, which I believe is rumored to be somewhat of a companion to this one, with its focus on another bodyguard from the company Noah works for. In a time when it's rare to be hooked enough to latch onto a second book in any sort of series, wanting to continue means it's good enough for me.
