**New World** Nathan Hystad

**New Spero. A new world to call home.**

After a surprise visit to Earth, Dean and his crew travel to Proxima Centauri, home of humanity's first colony world. Dean and Mary, now reunited with Magnus, Natalia, and their old friend Carey, find much has changed since they last saw their loved ones.

Once again, Dean's efforts to lead a normal life are cut short when his sister is threatened by deadly creatures at Terran Five, Spero's northernmost outpost. There, Dean stumbles on an ancient secret, buried deep in the snow-covered mountains, that will change his life forever. And when communication with Earth ends, he realizes his worst nightmare has come true.

The Bhlat have arrived.

Join the team as they fight to preserve their old world and new world alike.

**New World is the third installment of the bestselling *The Survivors* series.**

### **rayandebbie says**

#### **Enjoyed following the cast of The Survivors**

As there was a time lapse since I read book, it took a few pages to remember who and where, then the enjoyment continued.

---

### **ValerieC says**

This is a very engaging series. I'm excited that Book 4 is coming out so soon... will be reading it next week. Basically, this series is imagining a 'regular guy' finding himself in a struggle for the continuance of mankind after finding his personal life was not at all what he thought it was. The 'enemy' was right there among everyone all the time, and were husbands and wives to normal humans. I really do recommend this series and it's available on Kindle Unlimited. Start with Book 1. Although they aren't classic cliffhangers, there is more adventure in the next books.

---

### **Sandra M. Kingsley says**

#### **Better than the second book!**

This book has so much going on in it that I couldn't put it down. I like the development of the Dean Parker character. Can't wait to read the 4th book.

---

### **Debra Chiaro says**

#### **On no!**

This story has its twists and turns and all the technology needed for off world travel. So, hold onto your helmet and you will be off and running with the best of our heroes. Can't wait to read the next installment of this series.

---

### **Jim says**

This story has really zoomed out to something totally different. In book 1, "The Event", our main character, Dean Parker, managed to save the human race by wiping out an entire other race, the Kraski, who were bent on sending Earth humans into the sun! That race, the Kraski, were under the thumb of the Deltra who

planned the extinction of humanity so they could have Earth. They even made the Kraski create a hybrid humans who were planted on Earth to prepare for the invasion. Of course, Dean Parker and his friends managed to save the day although millions of humans did die. That should have been the end of it.

Now, we find that after chasing down two hybrids that Dean thought were going to tell the Bhlat the location of Earth, he's returned to an Earth he doesn't know. Things have changed, like seven years of change! While they have been traveling FTL, time for everyone else has been moving along and now seven years have past for everyone, but Dean, Mary, Nick, Clare and Slate who were aboard the Kraski-built starship. They don't like the changes on Earth nor the direction the current President is heading. So they decide to head for the colony world New Spero.

Their reception isn't what they thought it would be at first. They seem to always get into some kind of trouble and this was no different. They arrive at the New Spero space station and are immediately taken into custody. You'll have to read the book to find out how they got down to the planet.

This story doesn't just end on New Spero. They find out that even after all their efforts, the Bhlat have found Earth. They also find out that the current Earth President has made a deal with the Bhlat which Dean Parker and friends know isn't going to be honored by the Bhlat. All the Bhlat want Earth's resources and they will use humans to mine what they need. They also want Earth's water and will take it by force if necessary. The Bhlat have conquered many, many other civilizations and have done the same thing to their worlds. Earth is so ignorant of galactic events to understand they have basically doomed humanity if not for the colony world of New Spero.

So does New Spero own any allegiance to Earth? Should they be sending their armada to support Earth and attack the Bhlat? There's not that many humans established on New Spero, but those they do have are very capable. They have turned a barren world into an oasis in just seven years. Still, Earth is home to humanity and they probably aren't going to just let the Bhlat have it, or are they.

Dean and Slate, meanwhile, has gone looking for his sister who moved to New Spero with the original colonist. She has been taken by some intelligent animals as food for later. While attempting to rescue her, Dean stumbles across an unknown portal room and is instantly transported to a deserted planet. How he gets back is very fortunate, but it does lead to him finding a very hidden secret about the galaxy. This might change everything and finally put an end to the Bhlat.

The story is good, but the things that happen are kind of predictable. Additionally, something is always working out in favor of Dean Parker and his friends. The story-line seems a little simple and sometimes not very imaginative, but that's just my opinion. There does seem to be a path now for the author to write many more books with Dean Parker and Mary involved.

## **Stuart Nelmes says**

### **Fantastic**

I have held back on actually writing a review of this series of books until now just giving five stars and not saying anything. This series is utterly fantastic and very gripping some amazing twists and turns some very unexpected others a bit less so. A must-read series for any space opera fan and well deserves all the five star ratings I have given so far. I'm going straight on to the next book with one last thing to say keep writing

books like this and I for one will keep reading them Mr Nathan Hystad

### **Louise Robbins says**

#### **New worlds, new lives**

Thoroughly enjoyed the third book of this series. The development has seemed to flow well the characters rounding out more. The book could almost be longer, but I love that it's not, it keeps it pacy and full of action with very little down time.

Another great read, looking forward to the 4th book this August!!

---

### **Ray Cervone says**

#### **Great series**

I am loving this series. The characters are well developed and the story line keeps getting better and better. The lead character, Dean Parker is a true hero with deep humility and great courage. I'm a fan of Isaac Asimov and I'm happy to have found an author I enjoy just as much. Can't wait to read book #4.

### **Karen says**

#### **The Bhlat**

This KU library selection propels the story forward as the Bhlat accelerate their plans of overtaking and mining Earth. Dean and Mary remain behind while others return to Earth to determine the status of the imminent invasion, but get a transmission stating "they're already here", then nothing. So plans are made to save their friends and Earth. But as before, it's impossible to plan for everything.

---

### **Richard Kellar says**

Good read! Gotta continue this series! Want to find out how it ends!

---

### **Christinaraven says**

Dean and everyone on his ship left Earth at the end of book 2 and book 3 starts with reaching Proxima Centauri hoping to find out what is going on. It was great to meet up with most of the important characters from the first 2 books and meet some new people. Of course a few things go wrong and right once they get there. It was full of action, adventure, space travel and Dean ending up trying to save the human race again. It was just a well written entertaining story that caught my attention from the first chapter and kept it until the end. Loved the ending. I really liked this story.

---

### **James Pilcher says**

Very good series, so far. Just a few minor issues in believability of concept the interrupt the willing suspension of disbelief. Reverse engineering of advanced technology, hundreds or even thousands of years advanced, in just seven years, and in some cases just two, is frankly unbelievable. We could take a Sherman tank from WWII, and drop it in the 1890's and they would figure it out fairly quickly, though not in that time span, but if we dropped an iPhone in the hands of WWII era scientists and it would take decades. We might be able to use some advanced features from far advanced civilizations, but copy it and mass produce? That would REALLY be fiction. The barter system is an early version of capitalism, and anathema to Socialism. If you wanted to trade a book for some carrots, you would be stealing both from the collective. You don't own the book, or any other property, and anything you produce, whether carrots, or the Mona Lisa belong to the collective, for distribution, or display, as the collective decides. You don't own your house, you don't own the land you farm, you don't own the paper or computer you are writing on and you have little say about what happens to it. Please read Marx and Engles. It's okay if you are for Socialism, just get your concepts right. And maybe read some Adam Smith too.

---

### **Onemoment says**

#### **Another outstanding sequel**

I can't believe Hystad keeps creating additional sequels with each new one topping the other. I can't wait for the movie versions.

---

### **Maria Wilson says**

#### **Not the end**

Once again I couldn't put this book down. It had me entwined into the world's Dean and Mary saw from the first word to the last. Fantastic writer with the skill of keeping you captured throughout!

---

### **Lee Inks says**

I really enjoyed this book and the action and adventuring is great. I was surprised by the ease of ending the big dispute in this book but still enjoyed the read!! I agree with other posters that this book was so much better than 1 and 2. Nathan is advancing his writing skills. I look forward to other books from the author
