## **Seducing the Moon** Sherrill Quinn

Declan O'Connell has a history with Pelicia Cobb, but not the kind that's going to help him win her back. It was bad enough that he broke her heart as a gruff ex-commando. Now he's got another side to his personality, a furry, fierce side that goes a little wild under the light of the moon...Pel wants nothing more than the chance to clean up the mess Declan made of her life - without his interference. But with a sniper taking shots at her on her doorstep, there's no one better to protect her than Declan. And it's hard to ignore all of his deliciousness, especially the way her body responds to his undeniable magnetism. There's no question the rugged Irishman brings out the animal instinct in her - an instinct that propels her toward him, even when she knows she should run away...

This was a pretty good read except it relied a lot on the previous book. There was a lot of references made to the previous story. I picked up this book at the local library not being aware that it was part of a series. While the story in itself is definitely a stand alone, it made enough references to the previous going ons that it was pretty irritating. Other than that, again, it was pretty good, sexy parts and lots of action. (of the violent type)

I thought I could get into the werewolf series but it's just not me. Couldn't finish this one. Just lost interest too early into it to even finish.

Declan is adjusting to his new life as being a werewolf, but he still can't get past Pelicia (Cobb's daughter). He tries to patch things up with her, and get shot at and crashes into her B&B. The attraction is there between them, but the hurt is too. Someone is after either Declan or Pelicia. This book is about them and figuring out who is after which one of them or both of them. He thinks it might be someone after her because of her Grandpa, or Miles, or someone after him from the case with her Grandpa. Needing help to keep an eye on her without her knowing and without him being there, he asks his friend Rory Sullivan to stay at her Inn as a guest and help him protect her. Good twist at who the shooter is and why he was after one or both of them. Nice ending between them, and interesting ending with Sully.

This book has the same premise as Zack by Cheyenne McCray. Hero loved and betrayed the heroine only to reappear years later to make it all better. I only know this because I just read Zack and didn't like it at all. So when I picked this up as the next book to read, I actually put it back down and read something else but I

needed a "Q" author for a challenge so picked it up again and I'm glad I did. It's a wonderful story - the romance is touching and the danger is real.

I think the greatest difference between Zack and *Seducing the Moon* is the chemistry between the hero and heroine. In Zack, chemistry was totally lacking which made for a tough read. There is great chemistry between Declan and Pelicia and you feel their emotions, frustrations and need. His werewolf senses tell him when she is aroused so no matter her denials, he knows she wants him. To protect her heart, Pelicia fights the attraction but Declan's just so sincere that she relents little by little.

Ryder and Taite (hero/heroine from *Daring the Moon*) play an important role in this book too. They are fun characters and it was great to get an update on what's been happening to them since *Daring* ended. Declan and Ryder's friend Sully appears in this one and is the hero in *Taming the Moon*.

I woke up this morning thinking about parts of the book. Parts that didn't have closure, came out of the blue, and just didn't make sense.

I woke up with lots of questions...why was this person at this place at this time. What did this attack have to do with the main story? I knew who did it right away and the reasoning was less than adequate.

I struggled to read this book, but I did get through it.

Although this isn't classed as being part of a series it is the next book after *Daring The Moon*, Declan first appeared in *Daring The Moon* and you saw him come across from America to England with Taite after she's chased by a werewolf, to see his old college buddy Ryder, who's an expert on werewolves (mainly, because Ryder is one). During *Daring The Moon* you find out that Declan had a history with Ryder's butler, Cobb's daughter Pelicia, but because of what happened she wants nothing to do with him and Declan is left wanting her. At the end of *Daring The Moon* you see Declan being bitten by a werewolf and that's where *Seducing the Moon* takes off. 4 months later Taite and Ryder are married and Declan thinks he has control of his werewolf side.

Declan regrets what happened with Pel and wants her back but really she wants nothing to do with him. But

Declan is determined to get Pel back so drives to her B&B to talk to her but instead gets his car tire shot out and ends up smashing into Pel's B&B wall causing yet another problem for Pel.

Declan is sure that the bullet was meant for Pel and is determined to stick around but because of Pel's reluctance of having him around Declan gets another college buddy, who's also a cop to come stay at Pel's B&B to protect her without her knowledge. Sully is a great character I liked him from the get-go. I sort of wished he'd got with Pel in the end but oh well.

I enjoyed *Seducing the Moon* but I didn't like it. There were too many faults within the overall plot, Declan's Irish brogue slipped onto Pel and Sully fairly often yet they were meant to be British! They kept referring to Ryder's evil cousin Myles who caused trouble for Ryder, Taite and Declan in the first book but he wasn't actually part of this book so why keep mentioning him if he has nothing to do with it? It would have made sense to include him in this book so we could have some closer from the first book!

Declan and Pel and their relationship, it was like a roller coaster ride, up and down, up and down. For most of the book Declan wants Pel, he gets her but it's not enough because she's still emotionally distant from him because of what he did two years ago to her. Pel doesn't want anything to do with Declan at the start of the book but she can't help but fall into bed with him and eventually falling back in love with him but Declan's changed his mind and tries to put Pel off only got Pel to stick firm.

I won't mention the bad guy, but it was sort of like he was spilt into two people, one person when he was with Pel and another person when he was faced with Declan and not in the usual bad guy way.

Blah it just wasn't as good as the first one for me! The only thing that rescued this book for me were the secondary characters, Sully, Taite, Ryder, Cobb, the Sniper and trying to figure out who he was.

Sadly, I wouldn't recommend this book, I'm not even sure I want to read *Taming the Moon* which is meant to be Sully's book, although I liked him I'm just not sure about reading another Sherrill Quinn book right now. Maybe in a few months time as I'd like to read Sully's story maybe just not right now!
