Joss says

Another excellent issue. Very exciting storyline as it approaches The Force Awakens. Can't wait for the next issue.

Spencer says

Enjoyable yet a bit slow, the next issue looks to be good though!

Steven Shinder says

Wow. Terex REALLY pulled off a brilliant plan. The writing is on point.

Micah Ulibarri says

This really is the best series out there right now. All the characters are on point, including the villains. Terex is a gift to Star Wars. And we feel ourselves getting closer and closer to Jakku.

Rebecca says

Terex has got Lor San Tekka and and Poe must track them down. Of course, given that this series is set *before* The Force Awakens, we know Tekka will survive, which takes away some of the tension. Equally, there's plenty else going on - personal issues among Black Squadron and Terex's ongoing fight to get rid of his mind-control implant.

For a single issue, it packs a lot in, but it's easy to follow everything if you've been following the series. And I can't wait to see how it resolves (presumably) in the next one! Another excellent issue.
