Alex Sarll says

There's a little too much plot to get through for this to match the heights this much-missed series could sometimes obtain, but Herc (jovial, often pissed) and Cho (cranky boy genius) are one of those double acts that can charm their way through even a slightly overplotted denouement.

Imanol Cinta says

Great finish for the series. Epic battle, character development and a couple of nice twists. Definitely a very worthy reading.

B says

The "twist" ending is kind of the obvious ending that I did not want to see. It's true to the spirit of the understanding of the "source" material.

And what happened to Spider-Man? Is Aunt May alive and Mary Jane dead again?

Jacquelyn Koh says

I just love the relationship between Hercules and Cho.

I feel the best bits are always the serious words and care Hercules gives to Cho. The depth of the characters just shones so brightly.

The end was a real kick to the gut. So it was a huge hook to get me to buy the next arc in the series.

I thought the side plot with Venus and Aphrodite was an interesting twist too.

John says

I love the sense of humor in this series, but this volume is overwhelmed by frantic fights, too many characters and tons of backstory. Still fun but there's just way too much going on here.

Nicolo Yu says

Greg Pak and Fred Van Lente bring to a close their superlative run on *Incredible Hercules* with this arc. I really enjoyed their work on Amadeus Cho and Hercules, turning two characters that couldn't be more different into a buddy comic not seen since Luke "Power Man" Cage and Danny "Iron Fist" Rand. They played off each other very well, with Cho acting as the strategist for this adventurous pair and Hercules acting as a father figure for the orphaned super genius.

Superhero stories, although inspired by ancient myth and legends, have supplanted the old stories. This last arc is the last stand of the Marvel's Greek pantheon against irreverence. Hercules and his young partner are the final line of defense in his stepmother Hera's scheme to replace a world that no longer worships its ancient gods with one that is more to her liking. Pak and Van Lente bring a lot of their open story threads to a close and end the story in a most unexpected betrayal.

A fun read all the way, and I'm planning to scour the webs for the rest of the back issues of this comic. Marvel should collect this in a nice hardcover, an omnibus would do nicely.

Update:

I'm looking to upgrade to a hardcover copy, thus, this one shall be culled.

Jeff says

This is part of Green Week because Hercules took over "The Incredible.." title from the Hulk who's, um, green.

This volume provides a cover retrospective of Greg Pak's run on this title, with little blurbs about each issue. It's pretty telling that about a third of them say "Hercules shacks up with (insert name of Marvel babe here)" and that's it. You gotta love this immortal, drunken, super-strong, slow witted, whore-monger. Am I right?

He's paired with Amadeus Cho, a Mr. Smarty Pants of the Marvel Universe and together they make up one of the more endearing comic book odd couples. The storyline continues from previous volumes as the Olympus Group, headed by Hera, Hercules step mother, wants to wipe out mankind in what's called the CONTINUUM (It's all CAPS because it's pretty serious.). Who needs to read Bullfinch's Mythology when you can see the Greek gods go up against the Avengers? Not me.

This is one of those rare volumes that actually gives you a coherent update before diving in. Recommended for those of you who like their superhero stuff on the lighter side.

Must read: Hercules, in a jealous rage, tearing up Manhattan looking for Peter Parker, who gave Herc's wife, Hebe, the moon eyes. That crazy, Parker luck. Heh!
