Five stars for the book and the wonderful, magical story telling of Patricia Leitch. No stars whatsoever for Jinny as a character. She is really starting to piss me off now. Not sure that I can go through another book with this stupid little girl featuring as the protagonist. What a complete idiot!!! Good book though.

### **Amanda says**

Brilliant and insightful. Not just wonderful about horses, but examines the ways in which people change according to who they spend time with. A real lesson about being yourself and being happy in your own life, rather than wishing for that of other people.

Another comfort reread but definitely my least favourite in the series, always has been! Lots of moral lessons for young readers but for me I feel Leitch strayed far away from the character of Jinny here to teach these morals, turning her into an annoying idiot rather than the Jinny we love in all the other books (except, perhaps, The Summer Riders but this by far is the book where she is at her most annoying!)
