Gospel Witness: Defending & Extending the Kingdom of God (Cornerstones) Joseph Boot

How should we think about Christian apologetics in a society where people are encouraged to discover, determine and live their own truth?

In this short book, Joe Boot explains that Christ-centred gospel witness is about getting to the heart of a person, for the root of unbelief is a heart condition, not a lack of evidence or convincing arguments. Dr. Boot considers some of the prevailing worldviews in the West today, demonstrating that their foundational problem is a refusal to acknowledge Jesus Christ as Lord and King. As we engage in witnessing to the gospel of the Kingdom, the heart and its attachment to cherished lies must be taken into account.

Gospel Witness is part of the Cornerstones series of short books for Christians wishing to strengthen their understanding of the scope and implications of the gospel in the twenty-first century.
