#1 AMAZON BESTSELLER • Lawrence A. Colby returns with a gripping new powerhouse military-technothriller featuring Air Force Reserve Captain Ford Stevens! On Colby's last #1 hit, *The Devil Dragon Pilot*: "A fast-reading and clinching military thriller that would earn a place alongside any Clancy novel." -- Reserve Officers Association.

In a hidden base in China, Lieutenant General He Chen licks his wounds. The Devil Dragon project lies in ruins, thanks to the heroics of US Air Force Reserve Captain Ford Stevens and Stevens's best friend, pilot Wu Lee. But now Lee is gone, and as Stevens mourns the loss of his friend, Chen works to complete his second spy plane, codenamed BLACK SCORPION.

Stevens faces a new--some would say impossible--task: slip near China without being detected, cyber-hijack the Black Scorpion, and fly her back to the United States. It's a tough mission that will demand the most out of Stevens, whose grief has led to some potentially career-ending trouble.

Filled with adrenaline-pumping action scenes and the grit and courage of an American hero, *The Black Scorpion Pilot* is a thriller only seasoned military pilot Lawrence A. Colby could write.

Goodreads Kindle Copy Win

A fast paced thriller involving the Chinese that will keep you on a wild ride. This is a mission like no other as consequences ride high as the stakes are high. For those who enjoy military background will find it compelling.

#### **An LAC. Military Aviation Thriller/US/China/India**

LAC. has. penned a second novel in the Ford Stevens military action mystery and thriller. There is a second Chinese aircraft capable of high speeds at high altitudes. Two people attempt to steal the aircraft and fly it back to the US. This is an excellent read for the genre.....DEHS

I won this book in a goodreads drawing.

Apparently, in the first book of this series, our merry band of heroes stole a secret Chinese super plane. Now it seems they have another one, and this one is going to be even harder to steal. Not only that, one of the group members seems to be becoming an alcoholic.

Not too bad, but not really exciting enough for an adventure novel.

#### **Well Done Mr Colby!!**

I have read both Ford Stevens books and found them both fresh and exciting. As a USAF disabled veteran I fully believe that China should be the USA's biggest concern. They have for years stolen intellectual property that does not belong to them. That's the biggest thing to me that makes this story plausible. LOVED IT. Eagerly waiting for number 3.

What a wild ride through top-notch aviation drama! The plot is hyper-detailed, technically relevant and fast paced. Reads like a Clancy-esque thriller with an NSA cyberwarfare edge. Really was a joy to read.
