Big Mother 40

Marc Liebman

Big Mother 40 Marc Liebman

Big Mother 40 is a story well told and one in which aviation and special warfare veterans of the Vietnam conflict will identify, and about which they will tell their friends. Younger readers will enjoy the book simply as a great adventure.

-- Michael Field, Captain USN (retired) Wings of Gold, Winter 2012 issue Liebman skips macho combat images to plunk us into the deeper connections of war, from fear and courage to the truer realms of human relationships. His detail is authentic, and he lends even greater validity to the operations he describes with valuable author notes at the back of the book including a historic analysis of the time, military glossary and roster of characters.

Paul says

A well-written book, however as one who served in the Navy squadron at the period that the book focuses on, there are a lot of errors that contradict the important mission of that unit.

Accordingly, I think the author took too many liberties to make what he thought would be a good story to the detriment of the squadron that it is supposed to be about.

If he gave the squadron and the helicopter call sign ("Big Mother") fictitious names, I would have rated the novel much higher.

Shanell Meek says

Perfect way to pass some time!

Big Mother 40 (Josh Haman Series Book 2) by Marc Liebman is a work of fiction but has the feel of a nonfiction war novel. Liebman who uses his knowledge and experience as a soldier to write a compelling and unbelievably realistic war story. He even included a glossary in the back of the book for the military terms he used in the book, which was a great help to me as I really wasn't aware of what most of the terms meant. I feel like even though it's a work of fiction and the characters are not real, I learned a lot about the Vietnam war and the great lengths they went to in order to rescue fallen soldiers. Liebman characters are superbly well written and personable, I almost felt like I knew them each personally. I recommend this book to anyone who loves a great military story or anyone who is just looking for an amazing read!

Charles Draper says

Great book

Marc does a great job telling a story. His take on war in SEA is correct in the veteran's opinion.

Katy says

Judging by the cover and the description, I was skeptical if I should read this or not. I'm glad I did! This book has it all - GREAT writing, several plot lines, a HUGE cast of characters (almost too many, I had to go back and re-read some parts) romance, action, espionage, battles, and more. The author has created a military world that you feel you are part of. The reader learns the call signs and begins to engage in a military world that could be a movie. The characters (the entire cast) had depth and distinct personalities. You know its a good book when you stop focusing on the writing and really begin to enjoy the story and look forward to the next chapter. Thumbs up from this reader! I will be reading more of Liebman's books!
