# Amber Vial

*Frost Kay*

**Amber Vial** Frost Kay

**Fact #257 - Allie Sai should have been named "Unlucky."**

It made complete sense that the girl terrified of flying and aliens would be drafted for colonization of an alien planet. Right? Right??

She had one choice. Desertion. But again... Unlucky.

A failed escape attempt leaves her chained to an airship chair with nothing but her bag, a vial of her family's super moonshine, and her anxiety for company (so much fun). Numbing her fear seemed like a brilliant idea - until pirates attack her ship looking for goods of the female variety.

Looks like she'll have to save herself, but luck was never on her side. Maybe one day that would change, and her pirate would turn into a prince, but not today. Today, she cursed her bootlegging family's moonshine.

**It was just one sip... maybe two.**

## From Reader Review Amber Vial for online ebook

### **Mandie says**

What a fun, amazing read! It was short and sweet! I wish it would have been longer, but none the less, it was action packed and left me wanting more!!

---

### **Lisa Eiff says**

I really enjoyed reading this story. The MC is Allie Sai; she's a girl with incredibly bad luck that also has a fear of flying, and comes from a family that prides themselves on brewing the finest moonshine in the galaxy. She is selected as one of the females chosen to help populate an alien planet, which is not ideal for her since she's already afraid of aliens as well. If you enjoy books with sci-fi, space travel, aliens and pirates, you will enjoy reading this book.

---

### **Candy says**

It started off a little slow but soon grabbed my attention. Now I'm totally intrigued and want to know more. Definitely wish it was longer but that's what happened with most short stories. I definitely want to read the next book to see what happens next!

---

### **Beverly Laude says**

Allie Sai has been drafted to help colonize the planet Sars. Only problem is, she is deathly afraid of flying? What's a girl to do? Why, drink some of her family's famous moonshine, of course!

This is a fun, short read full of action, great characters and pithy dialogue. Pirates? Yes. Moonshine? Yes. Girl with an attitude? Yes.

A great beginning to what is sure to be an enjoyable series!

---

### **Jennifer says**

Such an intriguing short story. There are so many elements that grabbed me in so little time! First you have Allie. She sucks at her family business and manages to accidentally apply to a program to migrate to an alien world. She's a mix of timid and spunky all at the same time. Then you have potential run ins with aliens that could be just a dream but is likely real that sends sparks flying. You also get the start of a solid female friendship and several interesting alien races on her new planet. I cannot wait to see where this goes!

---

### **Ella says**

For Allie, her current situation started with filling out a profile in a dress magazine- who would the government would use that to draft people to populate another planet. Yeah well that's what she discovers... plus she hates flying; her family moonshine will help that. Then there's an odd incident with aliens... leaves you laughing; a fun and quick read that you want to find out what happens to Allie

### **Sara says**

#### **Quick but worth it read**

I loved this book. Yes, it's on the short side but it doesn't feel rushed and still manages to cover a lot of plot. Looking forward to book two! Allie may have just made it on my list of favorite characters.

---

### **Elda says**

A comical trip to another universe. Ms Frost Kay has a very quirky sense of humor. From the first paragraph to the last of this short story I couldn't help but smile. If this is any indication of how this series is going to be, then we are in for a true hit to our funny bone. I highly recommend this story for all those who need a lift to their spirits.

---

### **Amanda says**

This short story is exactly what it claims to be, a short story. Being able to pack this much of a punch in this small amount of space is a feat, and Frost Kay has accomplished just that. We have a fast paced plot, several exciting plot factors, and are left excited to find out what's going to happen in the next one. I wanted a short story that wouldn't consume me and suck me from this world. Something that packed a punch, but wouldn't take 3 days to complete. It's not a cliffhanger ending either, just a promise for the same level of excitement soon! I'll happily be continuing this series! If Star Wars and The Pirates of the Caribbean had a baby... Amber Vial would be it.

---

### **Sandra says**

Novella and obviously part of a series so we are left hanging with many unanswered questions. It does break in a place that makes sense but the story has definitely got plenty more to say. I enjoyed what I read, I want to know more but I really, really HATE episodic serials. I read books for the story. I have spent my whole life reading books for a story and when I read I want a COMPLETE DAMN STORY. Series are fine - you just have to give a story that wraps up in each book. You can have bits that cross over or lead into new stories in the next book but I need an actual story or I just feel cheated not enticed.

---

### **Maria Garcia says**

Great short story! It wasn't too short and it didn't drag out! This story reminded me of when i was a little girl and my daddy and me would watch The Twilight Zone! Definitely could of been one of those episodes! Fit just perfectly! Maybe that's why i loved it so much reminded me of better days when my daddy was still here. Anyways i love how it was one of those things where its in the future so such a ridiculous fear to have! I was cracking up so hard! Also i love how it set you up for the dream. She clearly hinted to it before going into it but after reading into it, it felt so weird then the wake up and the hallucination. That's where i sat up and said "Welcome to the Twilight Zone." Lol I can't wait to read more installments as they come along! Bravo! You've done it again!

---

### **Nicole says**

This is my first read by this author Frost Kay, and it certainly will not be my last!

This novella was extremely gripping from the beginning. I loved Allie, the main protagonist is hilarious and fully of sass and sarcasm.

I'm very intrigued into this alien world, the humans being sent to assist with populating this unknown planet and Xan. I will definitely be picking up the other novels within this series and world!

I'm hooked !

---

### **Hetal says**

I enjoyed this! Allie and her friend Jer are the female friendship you always wanted.

Recommended to those who like short stories, because It's not your typical book with all the details. A lot is skipped over and the plot really could be more fleshed out, but we shall see where it goes. I really do think I'll enjoy this story, but I am definitely not a fan of small bits being released throughout the year. I just want to read a big chunk at one time. Despite the style of it's release not sitting well with me, I will be continuing to read what's in store for Allie Sai and her friends.

---

### **E.A. says**

I need this to be a full length book!

Short, sweet, action packed and down right fun as hell, I could not stop reading! I mean till it ended all to short and, I was let felling a little empty. My only complaint is that it was too short!

I'm not going to say much because any detail will ruin with magical little wonder, but know that this book

will knock your socks off... in a good way. With a strong sexy heroin and plenty of sass, you're taking on a wild wind adventure that is literally out of this world. Matched with superb writing and rich detail you are transported into this book, no, it's like you become apart of it.

Amber Vial is a must read, on all accounts. It's the mission piece to your book collection and your reading soul.

So please take my super high recommendation that you will fall head over heals for this outer-space wonder, that will have you wanting more!

Happy Reading

-E.A. Walsh

### **? Ceri says**

A young woman, Allie is moving to a new world, not wanting to but has to regardless. She leaves behind loved ones which is hard in her. Allie is clumsy and has a good sense of humour, the author made me laugh a few times with her.

Allie is afraid of flying so encounters a Lock who forces her onto the spaceship much to her dismay. Along the way she meets a red head woman called Jer. To help her nerves about flying, Allie, drinks some whisky and it was her first time in doing so.

After that things become strange, pirates attack and abroad the ship yet only seems to care for her and her new redhead friend. Yet she wakes up and it was just a dream...or was it?

I need more, I need to know if it was just a dream or if she really happened. The author wrote it well, so that the readers are guessing if it was real or not. The only thing I would say is that the book was way too short. I need to know what happens next, but I definitely will be reading the next instalments.
