Demon Hunting for Beginners Vivi Andrews

Demons can be hell on weddings.

Luis Rodriguez, Karmic Consultants' resident exorcist, will take any job that gets him away from the desperate housewives who've been summoning demons in a contest to see who can seduce him first. When a series of demonic accidents run off the wedding planner for a fellow consultant's wedding, he jumps at the chance to protect the replacement planner instead—but nothing could have prepared him for Brittany Hylton-VanDeere.

Eternal optimist Brittany is thrilled to be working for Karmic Consultants—even if there is a demon hunting her and their no-office-dating policy means she has to keep her hands off the sexy exorcist protecting her. But it's hard to keep her hands to herself when a mischief demon keeps throwing her into his arms.

At first Rodriguez isn't sure what to make of bright-eyed, somewhat illogical Brittany, but with every new disaster, he falls farther and farther under her spell... and the demon circles closer, determined to stop the wedding even if it means stopping Brittany. Permanently.

Brittany had a heart problem that left her sick now that she has a new heart she wants to try new things. She has a demon trying to stop her from planning a wedding. Luis will help her get rid of it while they discover their feelings for each other.....

Mrs. Missive says

This book was just frickin fantastic. Loved Loved Loved it! I could not put it down. I had to know what would happen next. Could they pull off a wedding? Would they find the demon? Was it really a demon? Who summoned the demon? Would the horny housewives attack the hot exorcist? Would Brittany be distracted by something shiney and wander off? And most importantly where would they finally have sex and would Luis's sisters walk in?

I couldn't do my housework, I couldn't talk on the phone, I just had to read this book.

Buy this book, buy this series, and laugh your butt off.

As Vivi puts it so perfectly in the book...

"Heck yes, with a side of darn straight."

Debbie Benson says

When Brittany goes for a job interview that is going downhill, she sees Luis for the first time and is enthralled. Brittany is enthralled with all new experiences in life as she is actually living for the first time and not just surviving. Brittany solves the latest disaster with Lucy's wedding and gets the job as secretary and wedding planner. After he car is possessed by a demon, Luis is assigned as her babysitter while Brittany acts as demon bait by Karma. Brittany has been tagged by a corporeal demon who was summoned to cause mischief at the wedding. During the three weeks prior to the wedding, Brittany and Luis fall in love and banish the demon with a spectacular firework display. The wedding ends up perfect.

4.5 Stars!

As an exorcist working for Karmic Consultants, Luis Rodriguez takes his job very seriously. As a completely hot, sexy, tattooed bad boy (by appearance only), most of the female population most assuredly doesn't. All they want is to get him into bed - even if they have to get their daughters demon possessed for Rodriguez to make a house call. He's no one's gigolo, though, and the thought of Botoxed socialites clamoring for a quick

roll in the hay - with their possessed teenagers in the damn room - not only turns his stomach, it infuriates him. That's why he barges into his boss's office and puts his foot down, not realizing Karma is otherwise engaged. But when he sees who Karma's talking to, Rodriguez's temper flares again. She's pretty, appears vapid, and entirely too happy about life in general to be real.

Brittany Hylton-VanDeere - no relation to that Hilton - may be a bit of a spaz and may be perpetually optimistic, but she's got good reason to be. She doesn't have any secretarial job experience, but she just knows that working for Karmic Consultants is The Job, because they Believe, and Believing is important to Brittany. So, too, is the sudden urge to lick the brooding, dark, and gorgeous Rodriguez. When Karma offers her the job on a trial based on a brilliant sequence of lucky events just as she was about to be shown the door, however, Brittany realizes that she can't let her lust risk The One - the perfect job in the perfect place with the perfect people.

Doing her job puts her in danger, however, when a corporeal demon confronts her and gives him her name, allowing him to track her anywhere. When she spills the story to Karma and her boss calls Rodriguez in to consult on the issue, Brittany becomes burdened with one utterly sexy and totally captivating exorcist watchdog who will keep her safe from demons. Rodriguez slowly realizes that he'd judged the decidedly odd and uber-chippy Brittany a little too harshly on first impression alone, and soon he can't seem to take his eyes off her, taken by equal measures of fascination and lust. Maybe she needs protecting from a demon, but without a doubt, the quirky, adorable, perpetually happy Brittany may just end up needing even more protecting from her protector.

I don't know what it is about this series that just tickles me, but after being thrilled with *The Ghost Exterminator* I quickly snatched up *The Ghost Shrink*, *The Accidental Gigolo* & *The Poltergeist Accountant* and *The Sexorcist*. My preference lies heavily on the full length novels, but the world and mythos Andrews has created here for this series is fabulous and they're told with a light, tongue-in-cheek romp air that is quickly addictive. I love the breezy style in these light romances. The characters are quirky and charming, hot and sexy, and quite three dimensional, which is actually a bit of a surprise for this obviously lighthearted series that manages to not take itself too seriously as it dishes out a heady helping of hilarity.

Andrews is really outdoing herself, and while I do wish there'd been a bit more paranormal goings on in this book - there was decidedly more in the previous novel and beginning novella, I can't help but be totally enchanted by what is a romance that delved a bit deeper than I was expecting, lightly touching on issues of class and race while doling out dashes around broken water pipes and melting umbrellas. Mischief demons have never had it so good as to be featured in Andrews' series!

I really did adore this book, and not just because of the style, characters, story, and series, but also because it was exactly the light, fun read I was needing after a couple of darker books. There's little better than the perfect story read at the perfect time to make the entire reading experience...well, perfect. The few minor issues I had didn't detract from my overall enjoyment, and the only one worth mentioning at all is there were a handful of moments where Brittany's wide-eyed enthusiasm wore on my nerves a little. That's not a critique of the story, I just tend to be fonder of characters like Jo from *The Ghost Exterminator*, the tougher nuts with a bent towards sarcasm. I enjoyed myself too much while reading, though, to bother feeling particularly critical. Andrews just keeps getting better and better, and I can't wait for the next one!

I loved this story! Sweet, sexy, witty and full of suspense. The heroine is smart, funny and unique. The hero is sexy, brooding and suspicious, but opens his eyes in time. Vivi has written one of my all time favorite sex scenes in this story involving a mirror, a foot stool and a couch pillow. It's sexy and hysterical at the same time!

Roberta says

Another great Karmic Consultants book. Great love story, great love scenes.

Jessica says

I just adored Brittany and Luis. They're so utterly sweet they should be sickening, but they were so well grounded that I just loved watching their relationship grow. Yes, there were some communication problems along the way, but they learned from those problems and became better and stronger people for having known each other. (And given that they'd only known each other for like two weeks by the end of the story, that's saying something!) I also liked how the author brought in characters from previous books, it provided contrast to Brittany and Luis's relationship and also provided updates on how their relationships were doing.

I'm really enjoying this series because of it's mix of sweetness, sensuality, angst, humor and well-grounded characters. I can't wait to read the next one!

Note: The title... eesh. It makes sense (refers to a sort of running joke in the book) but the book is not nearly so smutty as the title implies.

Kimberly Vallejo says

I cant seem to get behind a series that each female lead has a complete lack of self respect and her insecurities are only released once the male lead falls in love with her. All four books have this theme....I had hoped that this was not the case and that each book into the series the females would get stronger and less dependent on the men in the series for their strength.

It's been a while since I've read the other Karmic Consultant books and I'm kicking myself now because I have so damn much fun reading these books it should be against the law. Vivi Andrews writes characters that make me smile. They make me flail. They make me tear up a little when bad things happen. Not that I'm admitting to crying. I swear, I wasn't. If I was on Twitter right now I'd hashtag this with #KellyDoesntCryOften. True story. So, if I were to say that this book made me a little watery eyed you'll just have to take that as a compliment of the highest order.

Rodriguez cracked me up. After his experiences with wealthy women who wanted to get him into bed just so they could say they had bagged him, he was decidedly leery of Brittany. He's sure she's a nut job. She can't keep her eyes off him. He tries to stay away from her, circumstances force them into close association. I love watching a strong guy fall. It's so cute.

It was fun watching Brittany come into her own. She took her enthusiasm for life and made it work for her. She was incredibly, unreasonably, undeniably attracted to Rodriguez and while part of her didn't know what to do about it, there was another part that jumped in with both feet. I like a girl who grabs life by the horns and doesn't let anything slow her down.

Fun, fast-paced and sexy enough to warrant the awesome title, I just love all the characters that populate Karmic Consultants. Yay! for wacky shenanigans in the supernatural world!

Louis Rodriguez is a sexy, hot, demon exorcist. Poor Louis lost his positive streak a long time ago. And now, the rich ladies in town are calling up demons so that he will come to their houses and they can try to seduce him. The ladies are even betting on it! Needless to say, Louis is thoroughly disgusted. Brittany Hylton-VanDeere is the most upbeat, optimistic person Louis has ever met. He is convinced that she is a fraud or maybe crazy or maybe both. Afterall, how can anybody be that upbeat? Even worse, she is rich so Louis thinks that she might be trying to seduce as part of the bet. And that is just the setup.

Pros:

1. The book is a fast, easy read.
2. The characters come to life on the page.
3. The story has some really fun twists and turns.
4. The writing is really good.

Cons:

1. There were a few too many "I think I am being played" moments.
2. The wrap up was fast and furious (even taking into account that it is a short story romance).

Ha Ha Ha! Yes, the name is funny. Yes, the picture is interesting. And, yes, the blurb is WTF. READ THIS BOOK if you are looking for a fun, funny and smart read. I don't want to give any spoilers because (and trust me on this), this book is not what you will assume it is. First, the characters are introduced as stereotypes. But, Vivi Andrews actually gives the characters depth and brains. No, really! Yes, she throws in some crazy, off the wall stuff, but I really think it works. Ok, now I am done with the gushing. This story is part of the Karmic Consultant series. While you don't have to read all of them in order, I would recommend it. This book actually ties in directly with the first two books. However, the hero and heroine of this story are introduced in this story.

I love this book. I don't know if it is the heroine's determined cheerfulness, the hero's grumpy charm, the wedding disasters, the chapter titles (oh, the hilarious chapter titles!), or all of that put together that gives this book such charm. I have read The Sexorcist maybe 6 times now, and I always turn to this book when I'm feeling stressed because I know it will make me smile.

Randi Alexander says

I loved the multicultural aspect of this book. The hero was sexy and virile, the heroine vulnerable but amazingly positive. The sexual tension was lovely!

Eileen Lane says

This book was a fun read. Loved the opening chapter. Brittney is fun character, and Luis is her perfect counterpart. I liked the way the story was written, although I felt the middle slowed somewhat. The secondary characters were also well developed. It has lots of interesting facets to it, a mischief demon, a quick witted storyline, a bunch of lonely housewives and a wedding chalked full of bad luck. This was a fun read, can't wait to pick up the next book in this series!
