**Omar Ali says**

Very interesting. Essays on Islamic philosophy and Mutazilla and so on are fascinating but so are his editorials from the early 1960s for Insha and Alami digest...what a different Pakistan! I got it this year in Karachi and it was the best book I bought on this visit..

Since I have little or no personal experience of the literate Urdu-Karachi-UP world, I am curious if people can tell me more about how that world is faring now? (on ideological grounds, I tend towards the view that Pakistaniat and partition will end up killing the best of the North Indian Muslim world that actually demanded partition so vigorously, but I am open to being corrected)

Interesting in the beginning but became boring later on because most of the essays were echoing ideas

already discussed in previous ones.
