## **Coco.V says**

2.5 stars. I thought this book would have knocked my socks off...instead it was just an okay story to pass time. This was a sinfully hot, sexy and titillating read don't get me wrong, but it wasn't as good to me as other books by this smutaholic duo. Mostly, because the heroine really lacked backbone and I didn't click with both characters like I would have liked to.

When Mac, president of the Silver Saints, doesn't get the results from a meeting with the Hounds of Hellfire MC president, Pierce, that he wanted, he decides to look for a bargaining chip, so to speak, and as Pierce's only weakness is his little princess...

Bridget knows her Dad keeps club business as far from her as possible, so when she sees Mac storming out of a meeting with him, she's aware that doesn't bode well. Of course, it doesn't stop her year-long crush on the much older man.

After a few days of surveillance, Mac and a few members make their move. But, upon seeing Bridget in the flesh, Mac knows that not only his plans, but life as he knows it, has changed.

However, Mac fights it, due to her innocence, age, and the situation, but it isn't long before resisting her is no longer possible.

Will Mac's man get his revenge? Will Bridget have to return home? Or has she become Mac's, permanently? Is there a HEA in their future?

One-click now and follow along as two people, albeit in less than ideal circumstances, only to realize their paths were always meant to cross. I hope to see more from this club.

This was a quick and dirty short novella with lovable characters! Cute but short epilogue with their baby girl.

Loved this one. Was so good. Love when they are together the whole time. They are all about each other from the beginning. No one else for either of them which makes this a 10 in my book.

This is a great start to a new Fiona Davenport series. I'm guessing that Logan and Lena's story is next and I can't wait to read it.

### Rating: 4 "Age be damned" Stars

With the perfect blend of badass bikers and sweet, steamy romance, *My Father's Rival* was a fantastic read and just what I needed.

Being the daughter of the president of one of the roughest MC's around, Bridget is untouchable. Sheltered, innocent and sweet she had been crushing on her father's MC rival's president, Mac.

Mac had never noticed the lovely little redhead, that is until he sets to kidnapping Bridget from her father's house in order to get some leverage to barter with. His plans work out for as long as it takes him to lay eyes on her, but soon his whole world is shifting its center.

With an attraction so strong it's impossible to fight, rival MC's and retribution in everyone's mind things could get complicated real fast.

I loved them both. Bridget was completely innocent but still knew what she wanted and went for it. Mac was our typical possessive and protective alpha, smitten after one look which is something I absolutely love.

A short and sexy story filled with steamy hotness and sweet, sweet romance *My Father's Rival* was a perfect fit with Ms. Davenport's style, and I enjoyed it from start to finish. I can't wait to get know the rest of the Silver Saints and hear their stories.

When I saw that Fiona Davenport was releasing a MC book, I didn't squeal with excitement or do an awkward happy dance- I'm totally lying, I did both! THEN, if that wasn't wonderful enough, it was an older man/younger woman storyline....catnip!

Mac- badass biker president. Sexy, broody, alpha.....Was he always perfect? No. He was a biker president, they had a tendency to walk a fine line from time to time. He tried to keep away from Bridget but the pull was too strong.

Bridget- she was just how I like my heroines. She wasn't alpha at all, but she stiffened her spine when needed. She was sweet and had fallen for Mac when she first saw him, never imagining that one day she would be his.

- no cheating
  - zero ow/om drama
  - mild pushing away by hero (overnight ?)
  - no violence
  - nice and steamy
  - hero hadn't been with anyone in a long while, heroine was a virgin
  - great secondary characters that I hope they explore. I'm curious how they will work Lena's story - if they go that route
  - epilogue- about a year out and I wanted more... that is my only "complaint"

Kinda blah. Heroine is TSTL in helping with her kidnapping just coz she has the hots for her kidnapper. Like how does she know he's really not a bad guy??!

Smut romance and bikers? Hell, yeah! :-D

Kidnapping, MC rivalry, and a passion that cannot be reined in.

All these elements combine to create a cute and sexy novella that's got a sweet heroine who knows who she wants and a gruff MC President who can't resist the temptation. I loved these two characters. They fit so perfectly.

The kidnapping scene is hilarious as the characters react so unexpectedly. I enjoyed the whole plot very much from the club rivalry to the age gap, the inner workings of the Silver Saints club, the very detailed steamy scenes and the insta-love that conquers all.

As there are angry bikers everywhere, I thoroughly enjoyed their alpha male plans and actions, which were gladly mixed up with tender displays of affection. Great story to add to this author's collection of lovely romances, and I hope to see this turn into a series!

3.25 stars!

This is another guilty pleasure author that I know exactly what I'm getting when I read one of her books, pure smut. This one has a hot possessive MC prez, younger h, insta love/lust and tons of sexy times. A quick read perfect for in between reads.♥?

This is the first book in the Silver Saints MC series by Fiona Davenport and I'm hoping she continues with it. Jared MacKenzie "Mac" is the President of the Silver Saints MC and his Road Captain, Logan is currently in the hospital in a coma. Logan was trying to stop a man who was getting rough with his girlfriend and the man ended up beating Logan with a baseball bat. Mac is pissed and he wants retribution but the only information they have is that the man who attacked Logan was wearing a Hounds of Hellfire MC cut. The two clubs are rivals but Mac goes to Pierce, the President of the Hounds of Hellfire and tells him the story thinking he'd be pissed that one of his men was hitting a woman. Pierce refused to tell Mac anything so Mac decides he'll take something important to Pierce to use as leverage. Bridget is the Princess of the HOH MC, her dad is the President and he's always kept her on a short leash. She's had a crush on Mac since she first laid eyes on him even though he's old enough to be her dad and he's her dad's rival. This was a really good start to what I hope is a series. I'd love to read about Logan and Lena next or Scout and Kat.

**So I'm done with this author.  
Another one bites the dust.**

These are my feelings on this and you can hate me and bash my review all you want but I won't ever change my thoughts on this matter.

I hated this book, this stupid girl helped during her own kidnapping because she was horny for the hero. What kinda example is this for girls who read your books, Authors? Are you sending a message to every girl

out there that it's ok to help their own kidnapping, that it's ok to fall for your abductor? What's next for you? rape like **Alexa Riley, K Webster and M Robinson** only to name few of many of authors writing these types of books? Will your next book be about date rape? A father raping his daughter? Since readers and authors are romanticizing rapists I guess I wouldn't be surprised... When will it be enough for you? I guess as long as you keep selling these books you don't care, right?
