Faith Mitchell was never confident. She was happy to blend into the background, much to the protest of her friends. At 16, her life was a normal teenage cliche. She was in love with Jace, the obnoxious player who she couldn't have, and her biggest worry was whether or not he would finally come to his senses and see that she really was the one for him.

That is until she is kidnapped and recruited by a secret agency of assassins. She is torn away from her normal teenage life and thrown into a world of guns, knives and criminals. The agency mold her into the perfect killing machine, and at 19 she is no longer the shy girl that was snatched away from her uncomplicated life, but a ruthless killer who will stop at nothing to complete whatever mission she is on.

Then, the agency has a new mission which involves Faith returning to her hometown, and facing her friends, family and the very boy who broke her heart just before it turned into stone.

What will happen once Faith comes face to face with Jace?

Will the obnoxious player be able to reach out and get the old Faith back without pressing any of her wrong buttons, considering that the shy girl he once knew now has a gun.

0.5 star. if that is even possible...

Might have been an okay book but the plot turns for worse. The supposed to be intelligent, kick ass heroine turned into a stupid, blundering fool who never learns her lesson time and time again. The hero is a jerk who only thinks with the head between his legs. Did learn from his mistakes but his character development will make you want to shoot him in the head and be done with him.

Tried to put up with it despite the bits of mistakes here and there but I can take only as much. NO. MORE.

Now I am gonna go read somethins that is worth my time and forget that I wasted my precious time with this.

I've been reading a lot of Wattpad books lately and gave them no more then 4 stars but this one just blew my mind! The Shy Girl has a Gun synopsis just caught my eye instantly, I mean, a secret agency of hot assassins? I do not regret picking it up at all. It was amazing! The main character was just so badass I mean come on, poking a guys eyeball out and also his hand just to get the pass to a door (that's the first one that I could think of), I mean freaking badass right? The action in this book is soooo freaking goood! The characters are just great, I loved Faith, Connor, Chris and Drake so much as a group they were amazing and just made laugh my ass off. Then again I cried, a lot. I was not expecting crying while reading this but the author just surprised me and I cried so so much it actually hurt (ha). For me the ending was perfect and VERY satisfactory.

Although this book has some grammar errors (just ignore them) I seriously recommend this to you guys.

I think that the shy girl have a gun start pretty interesting, but then later after chapter 20 something I start getting bored, everything in this story is just to predictable for example holly is one of the drug dealer people yadda yadda stuff like that...

This novel is mind-shattering, I was completely blown away by how good this book turned out, I really loved the characters and felt bad for them when misfortunes occurred, I felt happy when good things happened. The author did a fantastic job for this book. It left me inspired, happy and beyond touched.

#### **Contains a few spoilers!**

This book was definitely more violent than I had been expecting. So if you're no into a bit of gore, IO would stay away from this one. Other than that, I thought the idea of this book was really great. I loved that our protagonist didn't fit the norm. She's physically strong, intelligent, and isn't "innocent". She sleeps with Jace knowing that he has a girlfriend, knowing that he cheated on her once before, knowing what it feels like to be cheated on. And she doesn't give a shit. It's refreshing. The confidence Faith gains over the three years that she's "dead" made me really happy. Her character growth comes full circle when she maintains that confidence, yet also is able to let her emotions show. She's no longer just a stoic assassin. She's herself. The only thing I'd criticize about this book is probably that Faith's parents are never really mentioned after the first chapter. So does she never tell them that she's alive? This part was just a bit unclear to me. Makeandoffer has easily risen up to my favorite Wattpad author list, and this book just reaffirms this. Her books are always original and creative, in my opinion.

This is yet another entertaining read that I will definitely read again some day!

Seemed like an interesting subject but the protagonist wasn't actually a shy girl based on her interactions. Initially her character was all over the place but yeah afterwards it was inline.

### **Adrian says**

This story is riddled with spelling and grammatical errors, as well as general inconsistencies. Usually, those are pet peeves of mine as far as books are concerned. However, the story was good enough to keep me reading. In fact, I would say this is one of my favorites!

This book sure kept me reading it till the very end. I would have made it a one go but lacked the actual time. Overall the plot was very good. I loved the fact that I wasn't able to guess the ending. It wasn't your classic cliché story.

I also liked the fact that Faith matured and changed throughout the story, and along her everyone else, like in real life: shits happens, people lose contact, friends and priority changes, and so on.

I'll read it again in a couple of years without a doubt :)

So, what happens when one is plucked from their home and forced into a life they had no idea even existed? Faith Mitchell was a shy girl and a pushover. She allowed people to walk all over her for the sake of staying out of sight and away from the attention of people. But one fateful night would change all of that. "The Shy Girl Has A Gun" is a thrilling, funny, and a laid back quick read. The author doesn't have a name, but more of a username. Makeandoffer is the creator of this fun novel. They are a user on Wattpad, an app used for amateur writers to publish their works.

There is approximately 250 pages, but Makeandoffer is able to deliver a meaningful story, with characters that are easy to relate to, and also make you laugh out loud. The title alone suggests a huge character change in a character, internally as well as externally. The writing is very causal and comfortable. It doesn't cause any serious thinking or reflecting from the reader, which is one of the reasons why I enjoyed it so much.

The author needed to do some research to create the book as well. She or he would need to be an expert with guns, hand-to-hand combat, and different fighting styles. And since I actually fight, it was very amusing to read about people fighting in detail. The characters were relatable and fathomable. They were dynamic but also human. They made mistakes and paid the price for them. At first, when I started reading it, it seemed kind of cliché. But within the first chapter, my impression had changed dramatically. Just by the dialogue of the characters I knew that it would be different.

The characters are the bread and butter of the book. They made me want to keep reading it. They are funny, witty, and sharp. Their presences are strong and dominant. They're likable, even with their imperfections. I liked them so much that I could easily look over any mistake they did. Dialogue also played a huge role in building the personality of the book. It was what they said and how they said it. You would be able to pick up on those things and create a profile for the character, without even realizing it. You learn these people as if they're real, and you make a connection.

This book will make you feel something. It will make you feel mad when someone hurts your favorite character. If something sad happens, you will feel sad. The people in the book are just so likable that you can't help but feel what they do. The dynamic between the characters fluctuates throughout the book. At some parts, they are cut off from all emotions, and in others, they're opening up to each other.

This book will, undoubtedly, make you laugh, make you feel sad, maybe even bring a tear to your eye, but

above all, it will make you feel connected. The characters are realistic and fun. The plot is winding and entertaining. It's a witty, enjoyable beach read.

DNF Stopped at Chapter 26, then skipped to the epilogue.

**WARNING: SLIGHT SPOILER ALERT. READ AT YOUR OWN PERIL! ;)**

When I read the synopsis of this book and saw the ratings I was really excited to read it and thought that it was right up my alley; you know total badass chick killing bad guys - love it! I expected action, guns and some sexy guys to top it off. From what I read of the book it had all of those aspects, but I found it a bit lacking. It just didn't hold my attention, unfortunately. Which is a shame because it had lots of potential.

Few bad points for me on this book is that like other reviews I've seen there are a few grammatical and spelling errors, but that didn't bother me so much. What bothered me most was that it wasn't very relatable or realistic. (Not that we can all relate to being a secret agent assassin.) I love assassin films and books! But this book just didn't cut it for me.

Firstly, the characters didn't have much depth. What I read didn't tell me much about them and their family and where they lived blah blah. I felt there wasn't enough to set the scene and understand the characters.

Also, in the beginning when the girl gets recruited to The Agency I wanted to know the reasons as to why they recruited her. I wanted to know the process of picking the candidate and why they were chosen. And to add, I expected to read about how she was trained to be an assassin. However, after she gets kidnapped and told she was now an assassin it just skipped three years ahead. Erm okay.....

Then comes the action. I found it sloppy. The assassins were sloppy. They just killed the bad guys out in public, smashed up stuff and didn't bother cleaning up. I thought assassins were supposed to be like silent death, the kind that creeps up on you when you least expect it. If not that then I thought at least they should call the clean up team. Also, the story goes that they have to kill the drug Lord and his many minions who are all in one town. I don't know about you but wouldn't it attract the attention of the authorities if people are just being killed left and right?

But enough about the bad. Let's talk about the good stuff. I love the characters most especially Faith, Connor, Chris and Drake. I found them hilarious and their banter was well written and witty. I didn't like Jace to be honest and still don't (sorry). But when I skipped to end of the book Faith and Jace where happy and that's good I guess. Also, from what I deduced of reading the epilogue one of the four agents died (not going to tell who) and it nearly made me to go back and find out how it happened... nearly.

All in all its not a bad book. It's just that it wasn't my cup of tea.

But anyway don't let me influence you. Everyone has their own opinion, this was mine.

Happy reading! :D

I don't get Faith, I really don't.

She gets really upset, as her boyfriend cheats on her with some girl and what does she do? When the two of them get together, she makes sure, that he cheats on his new girl with her.

Also, Faith wasn't really that much of a shy girl. She had a bunch of friends and she definitely acted as if she was all extroverted.

This wasn't worth reading. Waste of time.
