The Suicide Club Gayle Wilson

Lindsey Sloan teaches the best and brightest students at Randolph-Lowen High School—exceptional teens with promising futures far from their small Alabama hometown. So when brash detective Jace Nolan arrives from up north and accuses her kids of setting a series of fires in local black churches, Lindsey is furious.

No matter how Jace tries to convince her, Lindsey can't believe her pupils could do something so horrible, let alone be addicted to the rush of getting away with it. But when her attraction to Jace places her in mortal danger and people begin dying, Lindsey can no longer be sure just what her students are capable of.

If Jace is right, it's up to the two of them to outsmart these criminal minds—before they carry out the ultimate thrill-kill.

First time to read this author. Came across the title in my Goodreads "recommended" section and thought the plot sounded unusual and interesting. The start was not particularly spectacular (as the crime had already been committed and we only see the start of the localized investigation). However, the suspense quickly builds up. If you are a fan of Karen Rose, Kate Brady or dark romance suspense, then this will be right up your alley. While the romance is not as intensive, the suspense is definitely an all night page turner. I'm off to start of on another of her equally promising books.

Nicely done Good balance btw romance and suspense. Great characters although the author is bit awkward writing about sex....it comes off as something a guy would write.

A mystery with a teacher as the central main character. What's not to love? :)

Probably my favorite of all Gayle Wilson's books (and that is a long list!) She draws on her "former life" as a high school teacher of gifted students and really brings her characters to life. Fortunately, Ms. Wilson never experienced many of the things her main characters go through (at least that we know of!)

Mystery is not a genre I generally read, but I'm finding myself drawn to them lately...

Book Title: The Suicide Club

Author: Gayle Wilson

Series: Stand Alone

Genre: Mystery, Romantic Suspense

Publisher: Mira Books

Source: E-Book (Library)

Well, it's not really a quote just my feelings, I forgot to see if I highlighted anything while reading this and I already returned it to the library. Oops!

◇**Breakdown of Rating**◇

Plot: 4.3/5 Intriguing premise, I thought from the synopsis that I had this figured out, but it surprised me. I really found the mystery of it, fairly riveting.

Characters: 3/5 Lindsey, was mostly likable, I just didn't connect with her fully. Jace, was a little weird at times, maybe if we were in his head more often, I would have felt differently.

The Feels: 3/5 They were a rather absent for me, and I wanted more passion from them. The romance seemed like something that just happened but wasn't really going anywhere.

Theme: 4/5

Flow: 4/5

Originality: 5/5 For me...it was very original.

Book Cover: 4/5

Sex Factor: Yes, mostly non explicit.

Ending: 5/5 The direction that ending took was intense and sadly a very prevalent occurrence these days. I was engrossed till the end. Cliffhanger: No

Will I read more from this Author? I'm not opposed to it.

My Additional Thoughts :

I was looking for a book title with the letters C, C and B in it for a reading challenge, I wasn't having any luck with anything I had on my TBR so I looked at some posts from other people in the challenge and came across this book, it sounded interesting, I requested it at my library, and hey...I found something I wouldn't have normally found otherwise...this is why I love reading challenges.

Talking about Evil Geniuses? This Terrifying Novel from Gayle Wilson will bring chills and creepy vibe around you. The fact that a group of Geniuses embodied her story made it so compelling. It made my night an arson of scary thought.

This novel caught me from the beginning until the end. The story line is just incredible. the character is so obscure that gave a frustrating feeling to turn each and every page up to the very end. The edge of fear that it offer, felt like i'm on a road trip the has no end.

This novel showcase what a true thrilling & suspense book is all about. the conviction of every character to their mission is so intelligent. The ways how the evil Geniuses build the risk so high.

Just a must read novel book from an amazing author. applause for Gayle Wilson.

So I thought this was going to be a YA novel, but once I got to the graphic seksi time about halfway though I realized it wasn't. What it was, though, was a very good and well thought out novel. High school teacher Lindsey Sloan's small Alabama town was rocked when three local churches were burned to the ground and the town's new detective, Jace, is trying to convince her that one her her students committed the crimes. Meanwhile, the school is having a rough time, grieving through multiple student suicides. The whole thing culminates in something horrific at the end of the novel.

This book was dark, no doubt about that, but it was also timely. One of the suicides was committed by a high schooler who had come out to his father that he was gay. When his classmates found out, they hounded him with e-mail harassments until he decided he had no other course of action but to take his own life. It's a tragedy that hits close to home for a lot of young people these days.

While the characters were a bit one-dimensional, the excitement from the plot more than made up for it. It was definitely a page-turner from the first chapter, not only because I was trying to figure out who had committed these crimes and how they were all related, but also because it was obvious Lindsey and Jace were attracted to each other. While the plot was heavy, the romance aspect of the novel helped it from getting too heavy.

Even though the suspense got off to a rocky start for me, I eventually got swept up in it and had to keep reading. The romance didn't work quite as well. Given the subject matter of the suspense, I found any "mushy love stuff" pretty jarring. And in the end, when the hero and heroine blissfully joke about making babies together? I mean, AFTER THAT ENDING?!?!?! Yeah, just way too soon.

I'm pretty sure this is my first Gayle Wilson novel....at least my first Gayle Wilson suspense novel, and I really enjoyed it!

Jace was aloof and tortured, just the way I like them! Lindsay was a little naive, and she really had me believing in some of her students. I had one of the bad guys figured out from the start, but the others kinda threw me for a loop. These teens were a little scary, and the dramatic climax of the novel could have been ripped from the headlines today. My only wish is that the motivation of these villains could have been explained a little better. It seemed to me the author was saying hey, they're just evil and brilliant, and

brilliantly evil. I don't usually mind it so much, but it was a little disconcerting when dealing with high school students.

The romance was well-done, and the ending was a happy one in that respect. I will definitely be picking up more books by this author!

This book started off a bit slowly, but definitely picked up!

Mary says

this book of Gayle's was a bit slow getting started...but when it picked up...it was as great as usual...some extra bits of fluff in this one...kept me guessing as to the culprit...by the end of the story...I was still wrong...love her books!
