## **Awoken** Timothy Miller

Fourteen-year-old Michael Stevens has never been ordinary; no orphan who hears music coming from rocks considers himself a typical teenager. But life gets a lot more complicated when two-foot-tall, albino, doll-like men sneak into his room one night, transforming the harmless music into a frightening ability he cannot control.

Soon, strangers in black suits begin to ask unsettling questions while unnatural animals with mismatched eyes haunt the streets. They are hunting, and not just Michael: anyone he cares about is in danger.

With the help of a mysterious drifter, an annoying girl he's accidentally mutated, and one of those creepy doll men, Michael finds himself in the middle of a war that could forever change the world he knows - reconstructing the very definition of humanity.

Awoken really surprised me, I really was not expecting to enjoy it as much as I did!

Firstly it began in a really interesting way, which I certainly was not expecting. It drew me in from the beginning and even though Michael isn't the type of character I can usually relate to, I found that I grew to really connect with him.

Awoken opened dramatically, enticing me with curiosity to gather more information about what is in store for Michael and what the doll men are up to, as well as, why Michael is so important to them. I found it increasingly easy to dive into the world, especially the more that I read it.

I enjoyed the way that the character relationships were formed and maintained, the way that they interacted with each other and grew as friends as well as people in themselves.

The detail given to setting and both plot and character development was lovely, events flowed into each other without leaving any dull gaps in the excitement.

I found that towards the end, just after the journey to the final confrontation, that the pace suddenly picked up and that a lot of information and action was packed into a few small chapters. This made it very challenging for me personally to create connections to the new characters introduced, the ending felt a bit rushed and as though the author tried to hurriedly tie up loose ends.

Overall I really enjoyed the world that was created and wish that there were more books set in this world, the doll men were hilarious at times and I adored their antics as well as Michael's responses to them!

I won this book through Goodsreads, thanks Goodreads.

This was definitely a story for a young teen that loves fantasy. I loved it though and it was nice to have something that was a quick read during the busy holiday season. The characters were amusing and delightful.

AWOKEN was a fast-paced fantasy novel with lots of action. Michael is an orphan who has moved from foster home to foster home. He is guarded and tends to react first with anger. He also hears music from rocks and always has. He is settling in at his new home when, one night, he notices a strange cat seemingly watching him and some little albino men coming out from under the porch to fight with the cat. He is freaked out but even more freaked out when one of the little men comes to his room and convinces him to drink from a strange stone cup and accept a strange necklace. It changes his relationship with stone and dumps him in the middle of a war between the People and the Ven.

After being warned to avoid the brown and the green, Michael goes to park and winds up running into some human bullies. He is rescued by Lina who is a poor-little-rich girl but just as tough, guarded and angry as Michael is. In the fight, he loses the necklace and Lina finds it. She rinses off the clay coating to find a jewel in a metal setting which bonds itself to her hand and begins changing her DNA.

Michael goes to his friend Diggs who is a drifter living by the river. Diggs knows what Michael is facing and together they are determined to get to the People who might be able to get the jewel off Lina and stop her mutation into something else. They also take one of the People with them that Michael names Jericho. The four of them have to defeat the evil scientist who wants to change the world and his hybrid mutants.

Middle graders will enjoy this story. While I didn't like either Michael or Lina very much at the beginning because of their anger, I grew to like them and feel for the difficult decisions that both of them had to make. Short chapters would make it a candidate as a classroom read-aloud.

A fast-paced, thrilling romp through unusual mythology, with particularly nasty villains and lovable heroes.
