Really Something for Everyone and Make You Want More

7 Folds of Winter

Never a fan of epic fantasies, Carolyn McCray shows in the hands of a master, even those who won't read them will be holding their breath with each turn of the page. One thing learned reading this book no matter that the future is foretold, fate is fickle. What looks certain one second can turn on the wing of an eagle.

The Rush

Mia seems to be, in this novella, strong enough to stand her ground with other McCray/Hopkins heroes. Gets into trouble unexpectedly and gets out not without some difficulty but with style and fun. More Mia please

Rook: Let's Stop the Apocalypse People

I really, really enjoyed this one. A cozy little band of very different souls having to stop Armageddon. I hope there are more of this group! Such fun, and Fannie is the best!

Ambush: 30 Pieces of Silver

One of my very favorite stories, introducing us to McCray's first and best extraction teams I read. The group is serious business, but each having fun in their own way. Love this story. The one that started them all for me.

Anatomy: A Plain Jane Prequel

The first story I've read with Harbinger. The way he solves crimes makes Sherlock seem as a pre-teen at the last One Direction concert (with a tip of the hat to the Robin Hood Hacker series). Fine beginning.

Pet Holiday Miracles

A series of very short stories consisting of exactly what the title implies. Get a hankie out.

Pet Whisperer

This story, co-written with Ben Hopkin, a pet psychic story is one of the best in this omnibus. It has heart, humor, and warmth. I truly enjoyed this (and the holiday miracles stories) and hope there are more! Don't be surprised if there are cross-over characters from the Pet Holiday Miracles.

Hacked

This is the prequel to the Robin Hood Hacker series. We are introduced to two of the best hackers in the world (only in the series there seem to be two others who may say they are part of four) and the FBI agent determined to catch them. Close, oh so close.

There IS something here for everyone. One thing shines through each of these stories: Ms. McCray writes stories you want to read. One of the best authors you probably haven't heard of . . . yet.

The stories in This collection were not stories I enjoyed. I sampled the first 3 novellas and gave each up after 10 to 15 pages. They did not hold my interest, the characters didn't seem to have any personality or substance and the storylines seemed to drag and were repetitious.

Not sure if the problem was my taste or if the combination was poorly put together, but I am giving up on the remaining stories. I hope other people enjoy it more than I did. Hate to diss something just because I didn't like it. But in this case, I think the collection was poorly chosen.

Another collection of books written by Ms. Carolyn McCray. One great thing about this collection is that you get a good variety on what Ms. McCray has penned.

To start this collection off:

7 Fold of Winter: A YS+ Epic Fantasy

Some books take a little bit to get "warmed" up. With this book, that was the case. At first, I didn't know if I was even going to really be able to finish it. I'm not really into this much fantasy. I was not disappointed by sticking it out and finishing the book. This book puts you into a world of magic, mystical creatures, Snow Maidens, Fairies and other beings.

This was written mainly for younger audiences. Normally, Ms. Mcray pens a book that is full of blood, guts, crime and horror. This was more easy going. (That is what it was, it was not a kick in the face as Plain Jane or her other books!) I would typically steer away from this genre of books...but I have been drawn into this new kind of book. I really do think I need to read more of these to see if it's something I'm going to like. In all it was a great story.

The Rush: A prequel MoonRush Short Story

Just finished "The Rush." Set in the future of 2049, the world has changed some. At least we have hover cars! We also have star diamonds that are found on the moon. Mia accidentally discovers that a body scanner she developed to read human emotions, also is able to detect these rare diamonds. Now what is she going to do with her new invention?

Great lead into the 15 chapter book The MoonRush.

Rook: Let's Stop the Apocalypse, People

This was my favorite of the books. So many wonderful characters in this book. Rook, who is the so-called leader of a motley crew of peace keepers (if that is what you want to call them). You have my favorite, Beauty, the cross dressing handler. Tomahawk, who is pissed at Rook for getting him pulled back into the fight to protect the world. Fanny, the child in a woman's body. This is such a great story of how they all have something wonderful to bring to the fight. They are basically fighting the biblical God vs Satan war. I can't

give you anymore hints than that...READ THIS BOOK! It's worth it!

Ambush: A 30 Pieces of Silver Prequel Short Story

Is a short story that introduces you to the well oiled team of Brandt. Leading a crew of military experts, you learn how the dynamics, personalities and what makes them tick. Excellent book that leads into a even more excellent series called Betrayed.

Anatomy: A Plain Jane Prequel Short Story

I wouldn't skip over the book Anatomy by any means. It gives you insight into the main characters in the following book, Plain Jane. Anatomy was actually pretty good. It was fast paced. Very insightful in how the characters meet and start to mesh. I was actually hoping that there was more to it. Then I started the next book in the series and my thoughts and dreams were answered.

Pet Holiday Miracles

Mr. Jack O. Lantern

Christmas

"Frick and "Frack"

Pumpkin Pie

Rambo

Love Birds

Pet Holiday miracles is a series of short stories about animals. All are cute stories.

Pet Whisperer...er...rrr: Book 1 in the Animal Talk Back Series

This was a unique book. As a dog lover, I was curious to see where this book was headed. I have seen the shows where people say they can speak to animals. I've got my doubts, but then, who am I to judge.

This book was cute. It's a short story of how one dog is protective of his owner. It goes along with the theory that some pets resemble the owners. It's all about humans loving those animals that we let into our lives and love as much as our own children.

Hacked: An Encrypted Prequel Short Story

This is the prequel to the beginning of the Robin Hood Hacker series. In this short introduction story, we learn of Ronnie, Quirk, Warp and Zach. We learn some back story to Zach and his relationship with his mom and fiancée. We also learn how he is hell bent on catching the Robin Hood Hacker. Excellent short story to warm you up to the big book that follows...Encrypted.
