Maggie Flynn's simple country wedding in West Virginia's enchanting Canaan Valley is everything her aunts hoped for, and Andrea Flynn and Kathleen Williamson are looking forward to a joyful weekend celebration. Murder is the last thing on anyone's mind, but when one guest has multiple enemies present, it becomes a reality. Poison in a late-night cup of tea proves fatal, and it's obvious that plenty of family members and their friends have reason to want the victim dead.

When a second murder occurs, members of the wedding party become even more certain that a killer is stalking the halls of the Alpenhof Hotel where they're staying. Andrea and Kathleen join forces with Sheriff Ward Sterling to figure out who's killing the guests in this quiet mountain resort. And there are clues—or are they just red herrings? A book of poetry, a flower garden, and artificial fingernails are among the discoveries the sisters discuss with the sheriff.

They're hoping the investigation won't put their lives in danger, but security at the hotel is lax and door locks are flimsy. If the sisters can dig up enough clues, maybe they can solve the puzzle before the killer takes aim at them. However, at bedtime they're bracing their door with the back of a chair, just in case.

## **Jeanne Jenkins says**

This was a fun book to read. I was born in West Virginia and the book takes place there. I have not been there for 60 years, so must of the place in the book, I had never heard of. However, it was nice just thinking about the place. Of course, there was a murder or two. Lots of people that certainly could have done it. I was surprised when at the end of the book, the murderer was revealed. Even if you have never been to W. Va. you will still like this book.

Stupid, stupid book! Not worth the time I put into it. Endless pots of coffee being made and consumed. Most action in book is when characters are eating something, making plans to go eat somewhere. Not much plot. Shallow, unfleshed out characters did not engage me in any way. No sense of place.

Maggie Flynn and her fiancé Stefan had decided their wedding would be held at the Alpenhof Hotel which they owned and ran. All their guests could join them before the wedding and stay on afterwards if they wanted. Maggie's aunts, Andrea Flynn and Kathleen Williamson were looking forward to the weekend; to spending time with Maggie and getting to know Stefan's family. Canaan Valley in West Virginia was well known as a tourist destination, and Kathleen and Andrea were keen to play tourist as well.

When a body was discovered it seemed like it was a heart attack – but investigation proved otherwise. And with a second body turning up, Andrea, Kathleen and Sheriff Ward knew there was a murderer among the guests at the hotel. But how could they find who it was? With the need to keep everyone safe, but not allow anyone to leave the hotel, time was of the essence. The two sisters did all they could to uncover clues as to the identity of the killer or killers – but was it putting their own lives in danger?

*Moonlight Mayhem* is my first by author Helen Haught Fanick (even though it's 2nd in the Moon Mystery series) and I thoroughly enjoyed the well-written cosy mystery. Plenty of twists and clues to keep the imagination going, and with some beautifully visualized scenery in the mountainous countryside, *Moonlight Mayhem* is worth recommending. It's been on my TBR since September 2012, so I'm glad I've finally read it!

Enjoyed the second in the series. Like the lady characters. Waiting for the third to either be free on Kindle or read-for-free on my monthly subscription to Amazon. Won't buy it though. Too much other good stuff out there to read.

### **Margaret says**

A pleasant American cozy mystery. The Miss Marple aged sleuths, two sisters, get into trouble but eventually of course solve the crime. The setting is in and around the beautiful Canaan (emphasis on second syllable) Valley of scenic West Virginia. For me, it was fun to read about Seneca Rocks, Elkins, Blackwater Falls, and other spots so familiar and well loved but not seen for many years.

#### **Moonlight Mayhem**

I enjoyed my older lady sleuths again. This is developing into a nice series. I cannot wait to get my hands on Hunters Moon when it's available for the iPad.

### **Ms TRACEY MAY PAYNE says**

#### **Moon phase**

I have enjoyed the first 2 books in the series and although I can't ski I would love to visit the scenic setting. I am curious why Helen uses the term moon sign rather than moon phase. I understand moon sign to be the zodiac sign the moon is in and phase is new to dark moon. Despite this I'm about to start book 3.

### **Patricia Gligor says**

When Maggie Flynn's aunts, Andrea and Kathleen, travel to the Canaan Valley of West Virginia for their niece's wedding, they have no idea what's in store for them. Although the wedding turns out to be everything they'd hoped for, soon after the young couple leaves for their honeymoon, two guests are found murdered in their Alpenhof Hotel. Andrea and Kathleen are determined to find the killer. . . or killers, preferably before the newlyweds return.

"Moonlight Mayhem" is a delightful sequel to "Moon Signs" and I highly recommend it.

### **Véronique Chrétien says**

A small page turner of a mystery. Nice continuation of the character development in this second installment. The end result of the plot developpement is not predictable to a tee nor is it completely out there.

## **Dot Engelhardt says**

### **Clever whodoneit**

The characters are fun to get to know. Even though you suspect the killer proving it becomes exciting. Descriptions of the area are very enjoyable as well.

---

## **Mary says**

This book was as enjoyable as the first two. I enjoy the sisters and how they work together on solving the murders. I also enjoy the vacation-type atmosphere of them staying in the bed and breakfast their niece owns.

---

## **Rebecca says**

I guess I enjoyed the read well enough but not as well as I remember having enjoyed the first one. The narrator rambled a lot, they didn't seem very concerned about finding the murderer despite believing they were living in the same hotel, and the beginning felt like a bit of a background dump. But it was still a decent cozy style mystery.

## **Lisa McDowell says**

### **Book 2 as good as book 1**

I've enjoyed the characters development from the first book to the second book. The mystery was a nice evening read and wasn't predictable. Looking forward to the next one.

## **Bob says**

### **Great read**

This is the second in this series that I've read. There are usually several possible suspects to choose from. I like reading these books because she takes the reader through the story to a proper or logical ending. Easy to read and she makes the main characters very likable. I will definitely read more of her books!
