Amber says

Five stars for the cover gallery alone
And also how incredibly hot Dr. Doom is
Ok and I like what Zdarsky's doing even if I'm skeptical about the ride we're on.

Vinton Bayne says

Not quite what I expected from a milestone story, but still good!

John says

Showdown

This is extra-sized and full of all the exciting ingredients that one expects from a massive milestone. I haven't kept up with the story, though. On some level I think I had hoped for a jumping on point, though that's not to say the crew didn't do a good job of getting me in on the action. We hit the ground running, but it seems like it's just SO MUCH and there's not really a resolution. There's a great turn-around of heroes besting villains, and then flash-back scene that's original/clever, and then TIME TRAVEL and the story is chock full of gags but it seems the jokes are peppered in and then ended a half-panel too soon. That makes them seem rushed (like Chip had a quota. Gotta get fifteen jokes in, NOW GO!)

I liked a lot of moments in this. Doom, though, seemed out of character. I might have missed something important from the end of Bendis' run on the character. It's hard to keep continuity with the characters and then lose something from that same continuity, though I'm not sure it's the writing or a moment where I blinked in Marvel recent-history. I just feel that the out-of-character bit was there simply to get us to the time travel, and that was not a direction I expected. And the surprise was not a good one. I gotta trust the next few issues involving time-travel are worthwhile, but that's merit that shouldn't count towards this issue and it's initial reading.

Jameson stole the show for me, though. I gave bonus points for him losing his car. Go JJ. :)

(I'm experimenting with a checklist in order to understand what I look for in the genre. This got 28.75/50)
