Eva Mcfarden says

4.5

Knowing what you are and keeping the people you love protected is the most important thing in Crystal's life. She has given up more than 1 being should be required, but she has given up everything, her family, her friends, her pack and mostly her mate. All done to keep them safe.

When the truth comes out, her life is in jeopardy. With her life at stake, the people who love her, do everything they can to keep her safe, but when she puts herself at risk again, the consequences are ones that will cause doubts later on.

Being half Keeper, puts a target on her head, but Kyle is more than willing to do whatever it takes to keep his mate with him and safe. When Crystal ran from him, the hurt was overwhelming. His thoughts were obscured as well, when he thought his friend Keri had betrayed him.

Once Crystal saw she could not deny her mate, the support she never had, was ten fold. Her new life was just beginning along with her relationship with the father she never knew and a mate that would give her the world.

Family, love and secrets are all encompassing with this story. Your breath will catch when you think there is nothing left to save Crystal and your heart will burst when she finally allows her mate's love to keep her safe.

MiraJane says

Mixed feelings

I fell in love with Alpha, the first book in this series, and now having read the third book, I'm having mixed feelings about the series and author. I feel like it sort of is ups and downs reading her books. It started with loving her first book in the series and excited to read the next, then disappointment reading the second book. And now I don't really know what to think of this one I've just read. It's better than Fated but not nearly as good as it could have been compared to Alpha.

The one thing that I really liked about the second book was the cliffhanger leading to Destined. The love interest fleeing and Kyle finding out she is his mate. The mystery as to why she was running from him made me really excited to read Destined. However, I don't really feel like it lived up to my expectations. First of, the first half of the story was, I wouldn't say slow paced exactly, but it took half of the book until Kyle finally found and confronted Crystal. I don't know why some authors think it's a good idea writing books

that way, where the love interests is apart or does not meet or interact in at least half of the story, but I'm not a fan of that style. I read the story for the romance and in a romance book I don't expect and I don't like it when the author minimize the room for the relationship development. I don't get the idea behind it either. It's clear that Destined, and the whole series in general, sole purpose is for the character to find his or her's true love. The main genre is romance even. Why take some of that away then? You will only disappoint and annoy the reader doing that, I think.

The other thing that was kind of a disappointment was the relationship. It fell flat. I was finally excited again when Kyle finally found Crystal. Sadly, that excitement did not last long. The confrontation the story was building up to was barley a confrontation. It was Kyle asking why she ran and Crystal telling him why and then it was suddenly all good between them. Years of keeping a secret to protect her mate and running to make sure he'd be safe suddenly did not matter, which I found very strange. She put so much effort into making sure Kyle never found out and keeping him safe, but just with a few words from him it was suddenly okay for her to spill her guts and fight to stay with him? I had expected more, a bigger confrontation. Some sort of battle of wills and an argument at least. But no. Years of being on the run alone and pushing people away to keep a dangerous secret from coming out was suddenly irrelevant when Kyle found her. It was just very unrealistic and felt rushed just to get to the point where Kyle and Crystal mated with each other.

I found the dialogues between the lovers rather strange as well. Pretty much everything they said to each other sounded like it came directly from a sappy romance movie. It was always compliments or declarations of how much they loved each other. It all was kind of cheesy. Since it is romance I'm okay with some of those cheesy lines in the big moments, but in this book the author overused it. It became too much to me. It actually kind felt like she used it so much just to convince the reader that they loved each other or to show how strong their love was. That is unnecessary. As a reader we're supposed to see that on our own reading the story by the personalities, story- and relationship development and dialogues without the author making it obvious. If the reader can see it reading between the lines it makes it a much better romance and stronger case than the author having to literary tell us they're in love.

The story weren't all bad of course. The authors writing, even though it's slightly awkward and stilted, is not bad. She knows how to catch the readers interest and emotion. She knows how to develop a story and making the reader want more so there is talent if you look between the lines. After all, after three books in this series I will still keep reading whatever comes out next. That counts for something.

Jenny says

Regan, you did it again. I loved it! I couldn't put my hands down from the book and 20 hours after the first word I finished it.

Thank you for the experience :)

I'm waiting for the book of Slater :)

Jenna says

I preferred the other books but this one was good as well however I would have liked to have seen bay and

Flynn go somewhere I hope there will be another book so we can see if that story will continue because they are obviously mates!

LISA says

Good but not great

It was good but not great, it felt rushed and missed something that the first book had maybe story detail on their story as the the first book

JAX R.V says

I truly enjoyed Destined.

Becky's reads says

I liked the first book a lot, read it a good while ago and when I saw that a third book came out I was really excited about it. Truth be told, it was a bit to long and stretched for me. I know it helps with the feels and everything but sometimes I thought to myself "okay I get it move on already" ... that was a shame but the core story was still nice.
