Human Nature Cat Kane

Left for dead by hunters, werewolf Dominic finds refuge at the isolated home of reclusive demon Gage and his human servant Randall. Healing from the attack, physically and mentally, Dominic has no choice but to rely on his grudging host and his enigmatic assistant.

Hidden away from humans for decades, the last thing Gage wants is a werewolf bringing trouble to his doorstep. Keeping Randall at arm's length is problematic enough, but allowing Dominic to stay seems like the safest option--at least until Gage finds himself drawn to Dominic as much as he is to Randall.

Randall has his own reasons for driving Dominic into Gage's arms. It's only a matter of time until Gage discovers the secrets Randall's been keeping--secrets that will surely destroy their fragile, undefined relationship. Still, the pull of the powerful desire that binds them all leaves him wishing there was a way to keep them both.

But as the outside world encroaches on Gage's sanctuary, all those secrets are about to collide, unleashing a dangerous tide of betrayal, deception and love, and all three men will have to re-evaluate their priorities, their relationships, and who--or what--they are.

I'm only about 20% into this book, which isn't enough to properly call DNF, but I quickly lost interest after starting this book. Gage is such a cold character, and the other two are so submissive to him. I have no idea in what direction this story goes, and one day I hope to find out, but this isn't what I'm currently in the mood for so... this is temporarily shelved.

I loved all three characters, it pushed all my buttons. Dominic pushed my lost buttons, Randall, well you just wanted to hug the guy and tell him to go for it, and Gage, what is there to say about Gage except...he was hot, he was dangerous and when he finally got past his own built walls, he was smart!

This is a very well written story that captures your interest from the get-go and keeps it all through the actions of the characters. Not once did i lost any interest in what i was reading. I definitely think everyone interested in paranormal M/M/m should give this a read! It is definately a treat for the senses!

Gage and his faithful human servant Randall live in the woods with a bevy of human employees. One night they bring a werewolf to the house and while Gage (a demon) would like to kill it, Randall convinces him to help him. Gage then tasks Randall with getting rid of the staff, and he ain't talking pink slips. Seems Randall has been with Gage since an infant and is totally in love with him but Gage stays very distant and while they do have sex, he never kisses. Randall decides that Dominic the wolf would be a good replacement for him as

Gage will need someone to care for him, but he's also attracted to Dominic and they end up on the road to a threesome until Randall's refusal to follow orders nearly gets them all killed. Okay, I wanted to kick Gage so many times. He was a total arrogant asshole. It was all about him. HE didn't want to be sad when Randall died so screw what Randall feels. I also wanted to kick Randall for taking whatever freaking crumbs Gage decided to dole out. But I loved Dominic who didn't give a shit that Gage was a demon or rich or the boss and told him to pull his head out of his ass and not be so selfish. Go D. It took until nearly losing Randall and Dominic to hunters for Gage to do so, but I finally started to like him at the end as he lightened up. So it could have been really off-putting but Dominic was like a breath of fresh air and kept it from moving into "I wish you'd both die you're so annoying" territory.

Did not finish. Stop at 31%

Gage is an asshole (borderline sociopath).

Randall is pathetic.

Dominic is dull.

Too much of thinking not enough of action.

The fact that Gage raised Randall, that he is in position of authority against him and now has sex with him make me uncomfortable.

I liked this book more than I thought I would. Sometimes ebooks disappoint me in that the romance feels rushed and the plot too short. This one, however, felt just right. At the beginning, the world building confused me a bit, but the characters drew me in quickly, and I soon had it sorted out. I love the way Dominic's guilelessness broke up the lonely static between Gage and Randall. He was the perfect foil for these two stubborn idiots *cough*, I mean, heroes. The plot was also surprisingly intense toward the end. I got a bit emotional. :) I'm definitely looking forward to reading more from Cat Kane.

I presume you know what the book is about. I'm letting you know what I liked or disliked about it.

My first time reading Cat Kane. I enjoyed Human Nature. Dominic, Gage, Randall were excellent characters to become acquainted with - the story took a much different turn than I expected from reading excerpts. Surprises are good!

The dynamics of the relationships as impressions were made and feelings established were a pleasure to watch unfold. I liked the level of intensity and all its steaminess. grrrr How I love a good wolf story :) Wolves are crazy hot and apparent there was still a certain creature I hadn't run into before that was just as hot if not more so... but, I'd need to see much more of Gage to know that for sure. yum.

Just when you think you've seen them all someone comes along and describes a new demon to keep things interesting. Love it.

Best m/m fiction I've ever read.

Can't get into it.. Some points are hanging too long to reveal what it is all about & it very hard to visualise. Anyway I still manage to reading the entire book.

Maybe it's only my impression, but I see a bit of the Beauty and the Beast in this story.

Randall is the faithful servant of Gage, a strange man who lives in an isolated ranch. Randall serves him in all his desires, and when I say "all" I mean "all". It's obvious that Randall is in love with Gage, but Gage doesn't want to allow himself to love Randall back, since Randall is a mortal. When Gage welcomed the then little child Randall in his life, he didn't know, or better, he didn't expect that the man would become more than a ward for him. Gage is demon and he is used to loose everything he loved in life, and so maybe he thinks that, if he doesn't love Randall, then he will not loose him. But it's clear that Gage failed, since even if he doesn't admit it with himself, he is already in love with the man.

When Randall takes home a "puppy", Gage knows that Randall has something else in mind. Dominic, the "puppy", is a young werewolf that was hunted almost to death near their property. Randall convinces Gage to allow him to heal and nurture back to health the boy and then maybe, give him a job on the ranch. Gage is jealous, even if he doesn't want Randall's love, he not even wants for him to love someone else. Yes, it's a bit egoistical from his side, but no one ever said that love is something logical. And so, instead of trying to remove Dominic from Randall, Gage decides to seduce the young werewolf. I don't think the real intention of Gage is to have a ménages among the three of them, but it's exactly what it happens: Randall loves Gage, but he knows that he can't give him all he needs, and so he introduces Dominic in the equation to have a substitute for himself; Gage loves Randall and he doesn't want to loose him to Dominic, and so, he thinks, if he bounds Dominic to him, he will not loose Randall; Dominic loves both Gage and Randall, for different reason, and he is more than happy to be in the middle of them, after all, wolves are pack animals.

The story is almost all concentrated in few days and spent all inside Gage's ranch. It's nice, but I wouldn't have minded to have a little more info on the background of both Randall than Dominic. Also Randall and Gage's life together, before Dominic's arrival would be an interesting topic for a prequel of this story.

It's a pretty interesting gay menage novel (or MMM for those who use the abbreviation). The master of the secluded ranch (in the middle of a forest)is definitely not human and his loyal servant knows that, but doesn't care, because he can't help the sense of duty and love he feels towards the one who's been his protector and master since he was a baby. The master is very detached and cold (though up to the end I can't say I really understand why he felt sex with his servant was ok, but kisses and affection weren't). In comes a wounded werewolf who manages to stir things up and transform the cold master-servant relationship into a hot threesome, but making the stupid couple loosen up and admit what's in their hearts.

The wolf was my favorite because he was just sooo right - he was the character that finally does the rational thing and the one that know how to communicate instead of suffering in silent angst for years.

Liked it, but not enough for a 4 star rating. Worth buying if you feel like reading a hot shifter menage, though.
