## **Compromised Inside** James Litherland

—Beware the Gravity Bug

SEALED off from the crumbling civilization outside, the residents of the FURC may be safe from external threats, but their isolation only speeds the spread of a dangerous new infection, even as an upcoming election exposes divisions among them. And the fourteen square mile compound may not be big enough to prevent the pressure from building into violent upheaval.

Illness lays low Security Chief Anthony Nelson when he's needed the most—as the crisis grows critical, will he jump back into the fray before he's fully recovered? Lt. Katherine Miles has her own issues, but with Tony out of action, dealing with everyone else's problems is distracting her from the real danger.

Caroline Sanderson runs in the election hoping to keep the community from falling apart, but she's unprepared for what her rivals will do to win. Meanwhile, David Belue helps Dr. Amita Harker investigate the virus sweeping the FURC. Will the escalating epidemic eliminate everyone—or will they destroy themselves first?

# From Reader Review Compromised Inside for online ebook

## Susan says

I won Compromised Inside through Goodreads. Another amazing book in the series. So fast paced and exciting. The pages fly by. A really great series.

---

## John Naylor says

I received this book for free via Goodreads First Reads.

Part three of a trilogy is always going to be a different read in some way. This one started in a place where the other two books had not been and the reason for that was not revealed for a long time.

I have reviewed the other two books and I will say everything positive about them again. I love the writing style and the characters the author creates still. The books are easy to read and hard to put down. He writes from many characters views and situations without confusing the reader too much.

I can see this series running to a few more books and I would be happy to read them if it does. I would recommend the trilogy to any reader if they have the patience to read through them. I have enjoyed all three books and given them all four stars.

I think as a trilogy they deserve 4.5 stars as although they will not appeal to everyone they are worth reading by anyone.

---

## Jonel says

Litherland resumes his trilogy with the same writing style that I've come to enjoy. His descriptions bring the world to life while adding a gritty feel to the tale. This fast paced story, with many plot twists held my attention throughout. It was a fun and intriguing read that further develops the dystopian world in which he sets his tale.

I enjoyed the interpersonal relationships between the major characters in the story. They were as important to my enjoyment of the tale as the action of the story. The contrasting personality types gives the tale the feel of an entire community, with the extremes to be expected of a community long isolated.

Litherland's stories build on one another, culminating in this intriguing story. It was an interesting read that I would definitely recommend to others.

Please note that I received a complimentary copy of this work in exchange for an honest review.

---

## **Betty says**

James Litherland has done it again! Compromised Inside is a great addition to the Slowpocalypse series. The story resumes as the compound residents are fighting off a flu epidemic and unbeknownst to most of the population, the virus is intentionally being introduced to help develop immunity to a graver infection. This is a fast-paced tale with a lot of twists and turns featuring many of the characters we have come to know including Kat! Kat is a very likeable character and she alone is enough to make you want to read the entire series to see how it all plays out for her! With thanks to the author for my copy.

---

## **Candy Robosky says**

Compromised Inside is a great continuation to the series. Once again FURC is under attack but this time as the title implies it is from inside their own bodies and compound. Kat and David's parents are once again proving to be dishonest and showing that rulers unchecked can be very shady. I still don't trust Verity and feel very sorry for David that he has her for a mother. She is very conceited and untrustworthy.

Kat and Tony continue their feeble attempts at fighting their feelings for each other. Caroline does do a couple of things that show she is not just a show off but overall she continues being the confident actress of the book. There are plenty of other characters who show they are different than one originally may have thought while others fortify the readers' initial reaction to them.

I am glad that this book focused on trouble brought about by the citizens of FURC themselves as well as nature. It sets to remind us that not all is cozy and safe when you are part of the "in crowd."

As for the wheat contamination, at first I thought everyone was just being a bunch of babies, but then I remembered what it was like for me when I found out I was lactose intolerant. At first I was very angry and discouraged until I got used to it and found alternatives. The initial shock of not being able to have your favorite things and being told there are alternatives does not stop the fact that you are being forced to give something up for something else that does not fill the same void. Yes they are basically being told they must go gluten free and they do not react well but that is to be expected. Think about something in your everyday life you are used to and now pretend you are told it is being taken away and you may never have it back.....you would be upset too.

Enough about that...once again this book continues a great series and I can't wait to see where it goes from here.

I give this honest review after receiving an advanced reviewer's copy of the book.

---

## **Don says**

Political wrangling and backstabbing abounds in an election race for First Councilor and Community Leader of FURC, a romance that doesn't realize it's a romance, and a possible major medical threat to the Compound itself creates for an excellent conclusion in the last installment of the Slowpocalypse series.

Strong prose, a solid storyline and very likable (or 'boo, hiss' unlikable) characters throughout the entire series written for young teens to oldsters.

And no profanity or lewdness (which is pleasantly refreshing).

Glad I had a chance to read.

---

### **Michael Mardel says**

Compromised inside by Litherland was not a patch on Book 2 which was all outside the compound. This time Litherland places the reader inside a community that has its share of egos. The hidden movers and shakers want a virus to be introduced so they can build an immunity. Not everyone is cognizant of this which causes major tension at the end. So we have two scenarios, the clinic with the sick people, and the upcoming elections. There is too much medical jargon which I glazed over. One of the main characters is Kat who seems to rise to any occasion and takes out the bad guys. There is a little romance with her but she keeps Tony at a distance. Until her mother steps in. Many in the community turn feral but it is one of the security who turns rogue and a committee member is killed. So, plenty of drama to keep one reading.

---

### **Kimberlie says**

Another great addition to the Slowpocalypse series.

At the beginning you have brief character descriptions to brush you up or introduce you if you're new to the series, these are very helpful.

In this chapter of the story politics come into play with some of the councilors trying to manipulate and backstab each other to jockey for position of first councilor. While this is going on the leaders are dealing with a dangerous virus spreading through the complex, some food shortages due to the loss of an extremely important food staple, and irate mobs. There are some awesome unexpected twists and a couple of instances that point to some really cool stuff coming further along in the story.

All of the characters we know and love are here plus some new ones that are important to the story. The main characters are all fleshed out wonderfully and I feel like they're people I actually know. I was very happy to learn that book five is on the way plus there is a possibility of quite a few more. I'll be starting book four as soon as possible.

I also love that there are no big cliffhangers at the end of each book, just an interesting lead in to the next, everything is wrapped up perfectly. That way each book works like a seperate episode, you're given enough information to make you want to keep reading and not left completely unsatisfied.

I received this book free from the author but I'm not obligated to write a positive review, just an honest one.

---

## **Sharon says**

I received an electronic copy of this book in exchange for an honest review. Compromised Inside shows some of the cracks that can form in a society that is self contained and cut off from the rest of the world. Illnesses and food shortages lead to civil unrest, which start to compromise the very framework of the FURCS community. Kat and David are once again valuable citizens who help intellectually and physically, whatever the situation calls for. I thought that the relationship between Tony and Kat was a little confusing, as there was little mention of anything more than a casual flirtation. The quick moving plot with little twists and turns kept me entertained, though, and I look forward to reading more by this author.

## **Lorraine says**

Slowpocalypse (books 0.5 - 3)

An interesting series that's easy to read and has plenty of suspense to keep you turning the pages.

Durable Impressions is a short introduction to a new and exciting world and to Kat, one of the main characters.

Although Certain Hypothetical (book 1) starts off slowly, it soon picks up and sets the pace for the series.

Each book has an intriguing plot that's well thought out and is a good mix of action, mystery and suspense.

The two main characters are dimensional and they grow and evolve through the series.

The large supporting cast are occasionally hard to keep track of, but the 'returning characters' list at the in the later books reminds you, who's who

Each book wraps up the story lines satisfyingly, leaving the way open for further instalments, but without any great cliffhangers.

Having read books 0.5 to 3, I'm now looking forward to reading book 4, Peripheral Encounters.

I received a copy of Compromised Inside from the author, James Litherland - Thank you!

---

## **Brent Soderstrum says**

Book 3 of the Slowpocalypse series. I recommend that you read the first two before tackling this one. Also find a few days where you can sit down and read this without interruption. There all a lot of characters to keep straight and action jumps around. However, there is a handy cheat sheet at the front of the book giving you a rundown on who the characters are.

Within the compound there are two main issues dealt with in this volume. The flu which is rapidly putting many people out of action and is spreading. Also there is an election fast approaching for the head councilperson position. Kat and David are prominent players again. They both are involved in security for the compound and have family connection to top people in administration.

---

## **Katlijn Laban says**

this is A review of the first book, because I got all books via the giveaways. Reviews of the other books are still to come.

I got this book via the giveaways of Goodreads. At first I was a little sceptical about the book because this isn't a genre I would usually pick. But it was a quite surprising read. At first it was a bit confusing what the whole book was about, but it became more and more clear while reading further. The only problems I had with the book were the random jumps in time, without a warning and the fact that some things were super obvious but the character doesn't figure it out yet (it's like you begin figuring important plot holes/clues out before the character does and you get frustrated because the character doesn't find out the obvious after a chapter or two). But after all I think this was quite a nice read and I'm very curious about the next books in the series.
