## **Freaky Games** Amanda M. Lee

Look out Sin City, here comes the Mystic Caravan Circus.

The city that never sleeps has something lurking in the darkness and Poet Parker can't decide if it's friend or foe. The rich history of the area comes into play when research uncovers a mine disaster more than a hundred years in the past ... and a tragic outcome that still haunts the locale to this day.

Between dust storms bringing forth a creature with glowing red eyes, screams in the desert and Poet's increasing conviction that they're not alone, the team has their hands full. That's on top of the fact that Max decides now is the time to make his move and get to know his son – who also happens to be Poet's boyfriend – in a new light and the unwelcome realization that Luke has seemingly become obsessed with gambling. Poet's attention is split in numerous directions, although Luke's quagmire is closest to her heart. She wants to help her best friend, even as he spirals out of control. He's not the same best friend she's spent the past few years loving, but she's determined to get him back ... even if it means facing off with some of Las Vegas' most perilous residents.

The mystical world of the circus is due to collide with the dangerous underbelly of the gambling world and the two sides might not be as far apart as they initially assume.

When the dust storm settles – and the final battle is upon them – more than one person will be in danger ... and Poet will have to make a hard choice to protect those she loves while sacrificing someone else to the unending darkness.

It's the ultimate game, but money isn't the only thing at risk.

Honestly this was perhaps my least favourite offering from this author so far. That is not to say I didn't enjoy it, as time spent with these characters is always engaging and I am in it for the long haul. However Luke has become such a distraction to the enjoyment of the story I kept getting annoyed. I know other powers were in play but I simply cannot see what Poet sees in him as a friend. That being said the intrigue surrounding the difference in location and mystery they found themselves in was intriguing and kept me reading until the end.

#### **It's always freaky with Mystic Caravan**

I really enjoy this series because it is so different from other stories. I get to hang out at the circus in my head with some really cool and kick a\$\$ characters. Urban fantasy is always full of supernatural people, but Mystic Caravan is different. Sure, you have your good and bad guys, but the bad guys are always something new and interesting. I'll definitely be reading the next book in this series and recommending to my friends.

[they decided to let the monster consumer the loanshark. He deserved punishment, but they had no proof he ever even killed anyone. Prison is what he deserved. (hide spoiler)]

Mystic Caravan in Las Vegas, you just know it's going to be trouble.

Our magical circus finds a lot of trouble in Las Vegas both human and supernatural and really it gets quite comical especially when the human trouble thinks he's above everyone else.....lol

Poet and Kade are all cutesie and lovey dovey it's as Raven would say a lot sickening....lol

Luke finds trouble of his own which makes trouble between him and Poet, even best friends fight sometimes but with these two it's unsettling and unnatural.

Local legions, mysterious web foot prints in the sand, people disappearing, people screaming and red eyes in the dark bring about a supernatural mystery that takes Poet back in time.....

It's always great when everyone from the circus bands together :-)

### **Plan A Never Seems to Work**

“Mystic Caravan, come for the food and show, stay for the new and even more craptastic plan.” Is a laugh out loud moment in the story. But craptastic is the complete opposite of the plot and characters. Really enjoyed the Poet/Kade interactions and seeing Max make a few cameos. The Luke situation seemed to slow down the story a bit but it all worked out in the end. And never would have seen the chick bonding EVER happening. A relationship and paranormal meltdown all in one book. What fun!

Written without even a fragment of research into the Roma. A very bland, very generic sauce of high school snark for late comers.

This is the third? or fourth? entry in this series, and Lee is in fine form. Interestingly enough, part of the villainy in this story is human rather than supernatural.

On the character side the MCs gay best friend (Luke) deals with jealousy and feelings of being replaced when Poet's relationship with Kade becomes more solid. This is the second time the author has dealt with this issue in one of her series and it is handled with delicacy. However, if you've read the Aisling Grimlock series, much of this subject is simply a rehash of that book. I would have liked to learn a little more about Max and Poet's pasts. Four stars.

### **Soul eater!!**

This is the coolest series. Every book gives you a creepier supernatural being and more twisted humans. You also fall in love with the Mystic Caravan crew deeper and yes, even the ones you technically don't like. I've said it in other reviews and I'll say it again! Paranormal/Supernatural lovers, this is a must read set of books! I can say that with absolute certainty while only being 4 books in. I'm loving every second of each book I read.

### **Meh**

I was really disappointed with Freaky Games. I am getting bored with reading the same character and

conversations in all her books! The whole jealous best friend was already done with Aisling, Aidan, and Jerry in the Grimlock series. I swear some of the dialogue is even the same. I was really bored reading this story.

Overall, I was very disappointed.

#### **Fabulous!**

This book was set in Las Vegas.

This book concentrated on Poet and Luke's relationship after she got together with Kade in the last book. He became obsessed with gambling and showcased some disturbing behaviours.

Besides that, the group was involved in a mystery regarding a sandstorm with red eyes and another entity that could be trying to help them.

I was so engrossed in this book that it was difficult to put down. I had to stop when my kindle needed charging.

I was shocked at Luke's behaviour as he was always been happy, cheeky and funny but in this book he wasn't his usual self.

Fab read.

#### **Snarkiness at its best!**

A great continuation to Poet and Mystic Caravans cast of colorful characters. I love that fact that each character has their own snarky and quirky personality and you get to see how they interact and great each other like family, even if torching each other a bit along the way. It was nice to see the relationship between Poet and Kade move forward and for Max to reach out to Kade. They also brought up a good point for future books, does Kade have some suppressed Warlock powers? I am anxiously awaiting the next laugh out loud adventure of Poet and all the crew of Mystic Caravan.

#### **Do You Feel Lucky?**

Poet & the Mystic Caravan Circus entourage have traveled to Sin City for this adventure. There is a lot of suspense & a dash of romance to keep it nicely balanced. This series continues to be a great paranormal mystery with a plethora of oddball characters. Coming to the front this time are bearded lady Nellie & Lamia Raven. This time we get to see a different side to them. I think I am actually beginning to like Raven! I was hooked from beginning to end! The only thing I missed - not enough Luke/Poet/Kade time. Their interchanges always have me laughing out loud!

### **Snarky and creepy**

Missed the snarkiness of Poet. Even though she was herself, a softer side came through her shell that we all know she had, especially when it comes to Luke.

And then there's the gorgon/soul-eater creature... Not the chapter to read while the hubby and son are watching *Insidious*...

All in all another great adventure from Amanda Lee!!! Now I am waiting for the great adventure to dive into.

Poet and her boyfriend are doing great now. They are in the "honeymoon" stage of the relationship and it's all working out really well for them. But Luke is giving Poet a hard time, especially when he stops listening to her when she has a bad feeling about a casino in Vegas. Now, Poet and Raven seem to be getting a long in order to fight this weird "figment" and things are just getting more and more out of control.

This book was not as great as some of the previous books, but it was still pretty interesting. I was hoping to see more with Poet and Kade, but that didn't really happen. It was mainly about Poet and Luke having a hard time. I got really annoyed with their relationship in this book. It was kind of annoying at times, and I was beyond frustrated with Luke.

But I still liked it, and I enjoyed Raven for once. She was actually pretty cool, and Max finally came out of hiding, so that was great too. I look forward to more in this series.

If you have never read the *Mystic Caravan* series by Amanda M Lee, I would highly recommend it. Though the author does warn you to be prepared for snark. You also need to read the prior books before picking up this tale.

In *Freaky Games*, you will find,

"Mystic Caravan, come for the food and show, stay for the new and even more craptastic plan." Is a laugh out loud moment in the story. But craptastic is the complete opposite of the plot and characters. Really enjoyed the Poet/Kade interactions and seeing Max make a few cameos.
