He Said/She Said

Erin Kelly

He Said/She Said Erin Kelly

In the summer of 1999, Kit and Laura travel to a festival in Cornwall to see a total eclipse of the sun. Kit is an eclipse chaser; Laura has never seen one before. Young and in love, they are certain this will be the first of many they'll share.

But in the hushed moments after the shadow passes, Laura interrupts a man and a woman. She knows that she saw something terrible. The man denies it. It is her word against his.

The victim seems grateful. Months later, she turns up on their doorstep like a lonely stray. But as her gratitude takes a twisted turn, Laura begins to wonder—did she trust the wrong person?

15 years later, Kit and Laura are living under assumed names and completely off the digital grid: no Facebook, only rudimentary cell phones, not in any directories. But as the truth catches up to them, they realize they can no longer keep the past in the past.

Pouting Always says

So I don't think there's any way I can talk about this book without spoiling it so uh just don't read anything if you don't want to know. Like I'm going to candidly mention the twist so just heads up.

Laura and Kit are married and have been in hiding for years. After witnessing a crime during an eclipse festival they went to together, things change for them as a new person enters their life, driving the two closer together as they bond over their shared trauma. Can I just say that I did enjoy this book immensely, and that I know a while back I read a book about not getting the big deal about eclipses but this book made me rethink that. For some reason the way the author for this book talked about eclipses really worked much better in terms of making me understand what the appeal is than for the other book I read, probably because this was fiction and that was nonfiction. I tend to get more into fiction.

And that ending, I didn't see that coming at all, honestly and I felt really torn about what happened. When I first finished the book I felt that maybe it was all a bit unfair about how Laura reacted but then I slept on it and no she was totally justified. Like I can't believe Kit did that, that's so manipulative and emotionally abusive, especially in light of the horrible anxiety and panic attacks Laura had for years after. Jesus, I don't even know what to say except that it was so well executed that I didn't see it coming yet I could see the signs when I looked back. The hints dropped were ambiguous enough to go either way but once we got the context, wow, like what the actual hell. I really enjoyed this one, couldn't put it down.

Chelsea Humphrey says

This was the last piece of book mail that I received before we made the big move to Virginia in February, and I'm ashamed that it has taken me so long to dust it off my shelf and read it. I had seen numerous raving reviews featuring *He Said/She Said*, especially early on from my UK friends as they tend to get all the best books across the pond first, but I still wasn't entirely sure what to expect based on the very brief blurb and cryptic reviews I scoured on Goodreads. I'm entirely grateful for two things- that the reviews I came across were so vague and that I chose to hold off on reading it until precisely the *right* moment. While I read a great variety of genres, I tend to enjoy certain ones in an ever-rotating circle based on my mood and other particulars; since I knew that this was a slow burn I decided to hold off until I was in the mood for that particular pacing. *Or as I like to describe it, I pitched an adult temper tantrum because I do what I want.* I **highly** recommend going into this one as blind as possible; I know that I suggest this regularly as it's how I prefer to experience my novels, but trust me, this is one that the less you know the better.

As I'm going back through the story in my mind, I believe that the factor that makes this book soar to a 5 star place is the sheer discomfort it caused me to feel. There are too many psychological thrillers being published that are nice, exciting stories that grab our attention but, in the grand scheme of our reading experience, aren't truly memorable. Not so with *He Said/She Said*. This book had me squirming from beginning to end with characters that will stay with me for ages. Numerous readers warned me prior to cracking the spine to "Just hang in there. We know it's slow but I promise, the ending is worth it!" Needless to say, I went in with very low expectations; as an avid reader of psychological thrillers, I've begun to grow weary of the novel that is dependent upon a whopping twist at the finale to gain its popularity. Maybe it was due to these warnings but once I picked this book up I simply couldn't put it down! Yes, it is 100% a slow burn. HS/SS is

a classic example of your gradually building suspense that blows you away when you reach that final climax, although there are still a few surprises past that as well.

These characters were a complex bunch; while I found each one was somewhat unlikeable in their own way, my views on them were ever-changing, so they weren't the type of unlikeable that can force me to toss a book aside to the DNF pile. Authors have to walk a fine line while writing these sort of narrators and I feel Erin Kelly did a fabulous job here. Personally the dual narrative really worked for me here; the plot does jump between past and present which can get confusing at times, but that mild confusion really enhanced my journey alongside Laura, Kit, and Beth. The minor characters were actually the ones who shined brightest for me; the backstory with Kit's twin Mac and Laura's former room mate Ling was so complex and realistic that it added an entirely necessary layer to the novel. As we move forward alongside our narrator's Kit and Laura, we realize that this husband and wife are struggling with the same levels of psychological trauma manifested in anxiety and insomnia, but are portrayed in different forms. This was a fine example of how men and women tend to deal with stress and trauma to the psyche in differing ways and I'm grateful that the author chose to develop the story not just within the plot, but on an emotional level as well.

I'm going to leave the rest up to you to decide if you want to read this book; I feel like those readers who enjoy literary thrillers in the domestic fiction realm will really take to He Said/She Said. While I know this book won't be enjoyable for every reader, I feel it did a fantastic job of offering so much for a variety of readers, not just your loyal MTS (Mystery, Thriller, Suspense) crowd. This story felt like it broke several genre barriers, as many are seeming to do currently, and I think this offers a greater potential for a more diverse audience. Don't let this review fool you; while it may be a character driven story in lieu of a fast paced plot, the eerie suspense left me breathless and caused me to check that our doors were locked multiple times before bed. This is one book you won't want to miss for Summer 2017 folks; highly recommended and looking forward to hearing other's reactions upon turning that final page.

***Many thanks to the publisher for providing my copy; it was a pleasure to provide my honest thoughts here.**

**** TRIGGER WARNING-as alluded to in the blurb, there is a brief rape scene that is somewhat graphic in description. This was necessary to the plot and all further mention of the attack is dealt with in vague, legal terms.**

Well, this has only been sitting on my shelf for 4 months... can't begin to tell you how excited I am to finally dig in!

???????

Norma * Traveling Sister says

It was definitely a rewarding experience for me to have gone into this book totally blind!

HE SAID/SHE SAID by ERIN KELLY is a slow-building, dark, and twisted psychological thriller that is cleverly formatted into parts that conforms to the five stages of a total eclipse of the sun. With each phase of the eclipse more details are revealed to us.

This book started off a little bit slow and tedious for me as the information and details that were given regarding eclipses didn't really hold my interest and I was also a little confused of why the characters were behaving the way that they were. Then when I got around to 100 - 150 pages in everything started to fall into place and then I couldn't put this novel down.

ERIN KELLY delivers an extremely fun, atmospheric, and enjoyable read here with some surprising twists and turns and a few unexpected reveals! I did not actually figure out one of the reveals until the dynamics of the novel changed from the viewpoint of one of our characters. The story is told from alternating points of views of our two main characters, Kit and Laura with two different timelines from 15 years ago and present day.

This was not an action-packed read but there were definitely some jaw-dropping moments as the tension gradually builds to reach that ever so exciting climax and then it doesn't end there as there is a final twist in the last paragraph. I would definitely recommend!

Trigger Alert: There is a rape scene early on in the novel and is discussed throughout.

Publication date: June 6, 2017

Thank you so much to NetGalley, Erin Kelly, and St. Martin's Press for the opportunity to read an advance copy of this book for a fair and honest review.

Susanne Strong says

3.25 Stars* (rounded down)

Has there ever been one single event that shaped the course of your life thereafter? One event that you couldn't erase or hide from no matter how hard you tried? One where you thought to yourself, if only I'd gone left instead of right? .. but alas, we do not get to have do overs, and neither do Kit and Laura, who were faced with such an event in 1999, and as of 2015, they have yet to escape its aftermath.

As of 2015, Kit and Laura are a married couple, who, after being together for what seems like forever, are expecting twins. For most of his life, Kit has been fascinated by Solar Eclipses. He started chasing them with his father, and has kept doing it ever since. Upon meeting Laura, they started chasing them together. In 1999, they trek to Cornwall for an Eclipse Festival. There, Laura witnesses a young woman being brutally assaulted and comes to her aide. The woman, who she comes to know as Beth, says and does nothing. Laura, believing Beth to be in shock, and takes over and gets Kit to find help and gets the police involved, thus changing the course of their lives forever. The case goes to Trial. Laura and Kit testify on Beth's behalf against her accuser, Jamie, with Laura being the key witness. It is her testimony that leads to Jamie's conviction.

Thereafter, all of lives their become intertwined, for better or worse. Beth seeks Laura out. She is drawn to her and though they build a friendship, something is off and both Laura and Kit become mistrustful. Things go bad quickly and both Kit and Laura take off, changing their name and from that point on, nothing is as it

seems.

For me, this was a very slow paced, long winded and hard to read novel. The first half of the book was extremely slow and because of that, it failed to grab my attention. The second half of the book was almost as slow, though it had more unexpected twists and turns, but unfortunately, it just didn't live up to the hype.

Thank you to NetGalley, St. Martin's Press and Erin Kelly for an ARC of this novel in exchange for an honest review.

Published on NetGalley, Goodreads on 06.5.17.

*Will be published on Amazon on 6.6.17.

Maxine (Booklover Catlady) says

Freaking fantastic! Those twists! I'm reeling from how good this book was. Seriously awesome stuff. This one is escapism gold!

I am almost speechless from the ending.

This is a well executed book that lacks nothing. The plot is clever, intricate and sucks you in bit by bit. You will feel so many different feelings reading this book. At least I hope you do - I did.

Kit and Laura. A young couple in love. Kit is an eclipse chaser - travelling around to the best world vantage points to see a solar eclipse. Laura's love for Kit has her share his passionate hobby. They go to a festival one day, to see an eclipse and what happens next eclipses their lives forever.

This is just astonishingly good. The characters are deep, complex, faulty - oh if only I could spill the beans for you all. But I won't. You need to journey with this book, from beginning to end to experience the intense story from start to finish. You will not believe where it takes you.

It's taut and so tense at times, like a great psychological thriller should be. Weaved in are moments of writing magic, prose that sweeps you into a world of imagination. At times it's sublime, other times it's harsh and mean and oh so very dark. But remember the eclipse? Light behind shade. All the brightness covered just for a moment.

I can't rave more - it's just a must read book. It will keep you guessing, second guessing and doubting all the way. Be ready for the twists and reveals. They come like a sledgehammer to the heart.

Utter brilliance. This book catapults into my Top 17 Reads of 2017, skipping the long and the shortlist. One of the best books I've enjoyed in years.

I received a copy of the book from the publisher via NetGalley. All review opinions are my own and totally unbiased.

Deanna says

My reviews can also be seen at: [https://deesradreadsandreviews.wordpress...](https://deesradreadsandreviews.wordpress.com)

4.5 Stars!

When I read the description for He Said/She Said sometime last year, I knew it was a book that I had to read. I was positive I was going to like it. However, with all of the hype I started to worry that I was expecting too much. Over a year later I finally had my hands on it and was excited to start reading.

The book opens with two women standing in a restroom, side by side at the sinks in front of the mirror. They are trying to avoid looking at each other. Both are wearing black. We don't know if this is past or present. Who are these two women? They finally lock eyes in the mirror and both wonder...

"How did it come to this? How did we get here? How will it end?"

London March 2015: We meet Laura first. She tells us about London and how she didn't choose to live there, but loves it now. They live in a bustling part of London which gives her and her husband what they need....anonymity.

Laura is pregnant and Kit is going out-of-town to see the latest eclipse. Laura is very anxious but wants Kit to enjoy himself. She knows he would stay if she asked. In some ways Kit's glad to be traveling alone, and that he doesn't have to worry about Laura's safety too. He's been protecting her from the fallout of what happened on Lizard Point for so long and he will do whatever it takes to keep it that way.

"I'm about to leave my pregnant, over-medicated, anxious wife to travel across the seas to another country where there is every chance the woman who nearly destroyed us will be waiting for me."

Kit is an eclipse chaser. Eclipses have been a part of his life since he was a young boy. At age twelve he saw one of the greatest eclipses ever.... and since then he has devoted his life to recapturing that experience.

1999 Lizard Point - They had been together for only six months when it happened. An eclipse festival. Basking in the afterglow of her first eclipse, Laura almost misses the purse laying on the ground. Kit heads off to see if anyone has lost a purse. Laura sees that the purse must have spilled as there are some coins scattered on the ground.

"We dropped hands and it was the last time everything was perfect"

As Laura rounds a corner she comes a horrifying scene. Who and what she sees changes the lives of everyone involved.

This was quite a thought-provoking read. Told from both Kit and Laura's POV. It takes place over more than seventeen years.

This novel had me constantly asking myself what I would do in similar situations. If I came upon a scene like Laura, what would I do? Would I do what she did? Would I freeze?

I wasn't just questioning myself about that moment but so many of the other decisions made by the

characters over the course of the novel. It's so easy to say I would do what's "right" but do we always know for certain what is right? And would I make the same decision today as I would have fifteen years ago? With all of the knowledge gained with age and experience? It's hard to say...

With great twists and an engrossing story-line, "He Said/She Said" was a compelling and addictive read that I really enjoyed. While I was definitely interested from the very start, it was a bit of a slow burn, but I'm glad I stuck with it. There is a lot of talk of eclipses which I wouldn't have thought I would be interested in. However, I soon found myself googling eclipse pictures along with some of the phenomena like "Shooting corona", and "The diamond ring effect".

Like any other novel, this may not be for everyone, but I really enjoyed it. A story of betrayal, lies, relationships, trauma, guilt, and loyalty. He Said/She Said checked all the boxes for me. It was a great read that I highly recommend.

Thank you, Minotaur Books and NetGalley for providing an advanced readers copy of this book for me to read in exchange for my honest review.

[Laura (hide spoiler)]

Kaceey - Traveling Sister says

Just as there are different phases in an eclipse, so are there different phases to this book!

Eclipse chasers Kit and Laura are set to experience their first eclipse together at one of many festivals held around the world. For the couple this will be the adventure of a lifetime, special memories to be shared between them both. Perhaps even some day with their children. (If they make it that far). Instead, what they witness will change their lives forever.

Told from both Kit and Laura's p.o.v, the story incorporates two separate time-lines. Present day and 15 years earlier, when everything began spiraling out of control. Sounds a bit complicated, but as the book progresses things begin falling into place.

Cleverly composed, it is divided into sections that parallel the different phases of an eclipse. So in keeping with that theme I'll to divide my review into 2 separate parts.

1ST HALF: Started a little long-winded and never quite held my attention. A great premise, but it didn't feel like it had either focus or direction. I had a hard time relating to the characters, wondering if I'd actually be able to finish it.

2ND HALF: literally half-way through, gratefully, things took a 180 degree turn and was finally off and running. I was rewarded for my patience! The suspense dialed up and I couldn't put it down. Suddenly there were curves I never saw coming. (Actually gasped twice!)

Sorry to say I can't reveal much more about the story-line without giving it away. Just know there are many sides to a story. Don't forget – what may first appear straightforward may be anything but...

Thank you to NetGalley, St. Martin's Press and Erin Kelly for an ARC in exchange for an honest review.

Matt says

In a book that has garnered much attention on Goodreads, Erin Kelly treats the reader to a unique spin on an oft presented scenario. Splitting the story between an evolving past narrative and one set in 2015, Kelly leaves the reader unsure where to focus much of their attention. A complete solar eclipse is days away, which has Kit making all the last-minute preparations for an event he has marvelled seeing since 1991. Less excited is his wife, Laura, who is six months pregnant with twins. Their joint concern is not the crowds or the sun's glare, but the potential sighting of 'Beth', who appears to be stalking them. It is only as the story progresses that the reader learns of events that transpired at the eclipse of 1999, where Laura came upon Beth and Jamie Balcombe, engaged in some primal sexual encounter. Laura was sure it was rape and alerted the authorities of this, while Jamie did all he can to convince her otherwise. Beth remained silent, though Laura would not let the victim's state of shock allow a rapist to roam free. With the evidence collected, the matter was brought to trial, where Laura testified that she heard a faint 'no' uttered during the encounter. Balcombe presented a defence that it was only a rough sexual encounter, but completely consensual. After the trial and a guilty verdict, Kit and Laura found Beth showing up at their flat and trying to forge a friendship while supporters of Balcombe do all they could to smear the victim through any means necessary. Laura had to come to terms with what she saw, Kit stood by her, and Beth accepts nothing less than total belief that she was a victim in all this. With brief glimpses into the present, Kit violates the cardinal rule of staying off the radar, which begins a series of events that could have dire consequences. As the narrative picks up momentum, the reader learns more about eclipses, both solar and character, which flavours the story and offers many twists that take the story in unexpected directions. An entertaining psychological thriller that provides readers with a chilling view into the power of perception. Worth a read, even if the hype might be a little overdone.

I had heard and seen much about this over the past while and thought I would take up the recommendation of a friend of mine to give it a whirl. Kelly offers the reader some interesting perspectives as it comes to character development, building a persona in both the past and present simultaneously. The central cast develops and regresses throughout, depending on the perspective used. This forces the reader to balance everything before making a final determination on guilt or innocence. Using the solar eclipse, both literal and metaphorical, serves to present the reader with the essential aspects of the story, whereby the characters shine at moments and scurry away to hide at others. However, once all is revealed, there is an anti-climactic moment and a rush to understand what has just happened. Kelly builds the narrative up throughout and keeps the reader wondering, but also serves up large twists at just the right moment to turn the story on its head. This shows not only superior skill but also pulls the reader in and leaves them wanting more, even when the road ahead is, seemingly, free from any more surprises.

If I might offer a single criticism that I feel jolted me out of the smooth delivery, it would be the use of legal terms during the trial portion of the book. Kelly flips between British and American legal terminology at will. While this might not disrupt the reader's attention span, it left me confused and returning to double check the jargon, where I noticed the repeated error. Perhaps during the subsequent re-release of the book these erroneous phrases will be tightened up and the proofreaders scolded.

Kudos, Madam Kelly for putting together this wonderful piece. I found myself enthralled at certain points and begging for more at others.

Like/hate the review? An ever-growing collection of others appears at:
<http://pecheyponderings.wordpress.com/>

Meredith says

He Said/She Said is a slow building psychological thriller filled with crazy characters and some surprising twists and turns.

The narrative is divided up into parts that correlate to the stages of a total eclipse of the sun. In 1999, college sweethearts Kit and Laura attend an eclipse festival in Cornwall where they interrupt a rape. Laura befriends the victim, Beth. After testifying at Beth's trial, Laura and Kit think that they are though with this horrible event. However, Beth inserts herself into their lives creating havoc. She scares them to the point where they question whether or not she was truly a victim. Fast forward 15 years later, Kit and Laura have gone to extreme measures to hide from Beth.

Told from Kit and Laura's alternating POV's, it eventually becomes clear that all is not what it seems.

I thoroughly enjoyed this book; I thought I had things figured out, but I got totally taken in by one of the characters and didn't read between the lines to see the truth. Then there was that unsettling last sentence! This is not an action packed read, rather it is fueled by an undercurrent of tension that gradually builds to reach an explosive point. I would definitely recommend!

I received a copy of this book from NetGalley and the publisher in exchange for an honest review.

Elyse says

MORE thanks to the public library.....

It's over 100 degrees this weekend in San Jose, California...making it impossible for me to sleep any longer. I was asleep by 8:15pm last night -- so luckily I got almost 7 hours of sleep.....

I picked up my Kindle next to my bed to begin reading one of the ebook library books I recently checked out.

I USUALLY DON'T bother to write reviews for books I don't finish --but I'm making an exception tonight - at 2:30am.

And this is why I'm discovering HOW MUCH I'm enjoying the convenience of our new modern technology which the library has adoptedoften more than Netgalley.

If I had checked out this book with Netgalley- I WOULD HAVE FINISHED THIS BOOK NO MATTER WHAT....(it's how I am). And perhaps I would have liked it more - but I 'rather' read something else. I have more flexibility to choose and be spontaneous- -zero obligation with our

public libraries.

I am satiated by books written from alternating POV. I AM SOOOOO TIRED OF THAT STYLE OF WRITING IT GETS IN MY WAY OF THE STORY!!!! This was another one of THOSE TYPE OF BOOKS.

Too many psychological thrillers are written in this style. Too many books - period - are written in this style ... I AM NOT A FAN of ALTERNATING POV writing!!!!

Plus, I wasn't interested in the metaphor of the solar eclipse---(characters are bright or dark... shine or hide)--it just wasn't for me.

THIS TYPE OF EXCERPT was NOT THRILLING to me, either:

"The shadow will fall where where the shadow will fall, in a pattern that was established when we were still primordial soup. But clouds are not nearly so predictable. An unanticipated cumulus can disappoint a crowd of thousands who only moments before were standing confidently in sunshine. The thrill is outwitting the weather."

Larry H says

I'd rate this 4.5 stars.

Now *that's* the way you do a thriller.

Kit and Laura are young and newly in love in the summer of 1999. Kit, who has been chasing solar eclipses since his childhood, convinces Laura to join him on a trek to Cornwall for a festival, during which they're expected to see a total eclipse of the sun. While the weather doesn't quite cooperate to give them the full eclipse experience, it still wows Laura, as she truly understands why Kit finds these events so mesmerizing, and loves being able to share them with the man she loves.

Walking back to their campsite after the eclipse, Laura comes upon a man and a woman. At first she doesn't understand what she's seeing, but then she realizes that the man appears to be taking advantage of the woman. She, then Kit, intervenes, the woman is dazed, the man is angry and protests his innocence. Once the authorities take over, the peace of the event is shattered for Kit and Laura, knowing they may find themselves part of a trial in the future.

After the case is over, the woman gets in touch with Laura to express her gratitude for their help. As the woman becomes needier and needier, both Laura and Kit have concerns, but how can Laura turn a woman away who has had her whole life turned upside down, even been betrayed by those she considered friends? Little by little, Laura starts feeling unsure that she made the right decisions—did she actually see what she thinks she saw? Is the victim as innocent as she appeared?

"...that's the thing with secrets. They're leaky; you can't decide to share the bits that suit you without a million questions oozing out. You have to solder a part of yourself shut."

Fifteen years later, Kit and Laura have changed their names and live almost in hiding, off the physical and

virtual grid. Every move they make is one made cautiously, and both live in fear that everything they've built can be destroyed in a moment. But while they share the same fears, they also have vastly different things they are afraid of, things which have caused Laura nearly paralyzing anxiety and have strained their marriage.

"There is so much unshared life to intrude upon the marriage; so much opposing history. The defining event of my life is the defining event of Laura's. I don't know how couples who *haven't* been through something like that stick together."

With so much at stake, they know their fears will catch up with them. And when they do, will they—and their marriage—be able to survive?

He Said/She Said seems like a pretty basic thriller at first, but Erin Kelly's storytelling keeps you hooked. If you read thrillers, or even watch crime-type shows on television, you've seen this story before, and you have a feeling what will happen. At least you think you have. But Kelly never rests on plot-as-usual; she stretches everything to the limit, so just as some of the things you expect to happen do, the next second you're shocked by what else unfolds.

The book may get a little more melodramatic than it needs to at times, and because certain aspects of the story take a while to unfold, I found myself confused by the behavior of some of the characters. But this was a really well-written book, and Kelly kept me hooked from start to finish. While I could have passed on the jet-lag-induced insomnia, I didn't mind passing the time devouring the remainder of this book.

I've only read one of Kelly's previous books, *The Poison Tree*, and I remember enjoying that, too. While she's apparently referred to as "the queen of the killer twist," I think if you just let the story unfold as Kelly intended it, and don't keep focusing on the twist, you'll be able to concentrate on all of the things that made this a great thriller.

NetGalley and St. Martin's Press provided me an advance copy of the book in exchange for an unbiased review. Thanks for making this available!

See all of my reviews at <http://itseithersadnessoreuphoria.blo...>

Jennifer Masterson says

I'm done. I can't go any further. This is just toooo slow for me. DNF at 35%. The writing is good and so is the narration. This is the audio version. I'm wondering if it is better in hardcopy.

Paromjit says

This is a dark, murky and atmospheric psychological thriller, it is a tale of Laura and her boyfriend, Kit, chasing an eclipse in Cornwall where Laura happens to see a violent attack being carried out on Beth by Jamie. Laura insists on calling the police. A traumatic and brutal court case ensues with Jamie on trial for rape. Laura is the only eye witness. Jamie's family are there to support him and the defence run Beth ragged,

it becoming a case of he said, she said. Jamie finally ends up being convicted, in a crime where there is such a low percentage of convictions.

After the trial, Beth comes to visit and she and Laura begin to build a friendship, only for things to go awry and ends up with Laura and Kit's home burning down. Laura and Kit change their names, go on the run and get married with the hope that they are untraceable. Years later in the present, Laura is pregnant and Kit is off to chase another eclipse as the past comes back to threaten their lives once more. This is a story where nothing is as it appears, there are secrets, lies. issues of trust and multiple twists. It is an intricately plotted story revolving around the four characters, their relationships and interactions with each other and the issue of perception. On occasion the story feels a little over egged for the sheer sake of it. However, overall I found it an entertaining and absorbing story steeped with an air of menace and fear. Thanks to Hodder and Stoughton for an ARC.

Carol says

....**"Something and someone is always in the dark."**

....The beginning....defines the five stages of a total eclipse....the next one being August 21, 2017 by the way, and we just happen to be right in the path of totality at its thickest....so cool.

....Anyway, Kit and Laura are a match made in heaven....the real deal....and they happen to be eclipse freaks. (*especially Kit*) Even with limited funds, they travel around for the amazing experience of it all....so fun....until the incident....until their lives are turned upside down....now they look over their shoulder....now they live in fear....and they make some dangerously foolish decisions along the way.

....Alternating past and present, Kit and Laura gradually disclose pieces of the puzzling storyline with some wonderfully creepy moments, surprising reveals, and a killer of a tweak at the finish line that makes **HE SAID SHE SAID** my kind of read!

....**AND**, in the end, even after **ALL** the pages had been turned, I **STILL** could **NOT** shake the eerie untrustworthy feeling I had for....you know who! Hmmmmmm.

Many thanks to NetGalley and St. Martin's Press for the ARC in exchange for an honest review. Enjoyed my first Erin Kelly.
