Alicia and Jace enjoy the college life. He is a chemistry student, and she is a biology major. They mind their own business and they study hard, dedicating themselves to their future. They have never met, and if not for the terrifying circumstance about to overcome them both, they may never have.

Now the two have to join forces, combining their mutual knowledge and skills in an effort to win out over the ravaging undead who are roaming the Earth with them. They must discover a way to stop the terrifying changes that have taken place, and must do it while love and passion for each other consumes their hearts.

Can they stop the apocalyptic disaster before it stops them?

Zombies, heartache, romance and action all in one!!

This book kept my attention from the very beginning that I didn't want to put it down. R.W.K. Clark always does a great job with coming up with a great plot and characters. I love how the characters met by chance and started working together in hopes of survival. They might now have been able to save everyone which caused some emotional heartache but the story also has a happy side to it as well with a new romance and beginning starting. It has a little bit of everything in this book, I highly recommend it.
