Magpies and Magic Timothy Michael Lewis

Trouble is afoot in the world of Minaturia: holy war in the East, revolution brewing in the old states of Middlita and rumours of war in the West.

Kolan, a ginger-haired warrior for hire, with his new companion, a magpie called Malcolm, struggle to make a living joining any party of adventurers that will take them.

Malcolm dreams of returning home to his own world, where everything and everyone was much larger. No one believes his stories of a world of giants with no magic. Kolan wishes he would get a big break : he is tired of being the last warrior chosen in every situation. Little does he know that he is about to be propelled into an epic adventure with Malcolm, uncovering the rise of an ancient menace and changing their lives forever!
