## Dragonfall Niall Teasdale

Ceridwyn Brent and Cheryl Tennant are having a very busy year. There is the long-term project to build a ley line bringing energy from the German Rift to London where it will be converted into electricity to run the entire city. There is the annual Thaumatology Conference, this year based in London. And everything seems to be going remarkably well, even if people are still thinking the world might end before New Year.

Then the conference is threatened by a group of militant scientists and there are growing rumours of a war between demons and dragons which has been going on for millennia, but may be about to flare up again on Earth. It is time to pick sides and decide upon loyalties, and Ceri has dragon ancestors while Lily Carpenter, her lover, is half-demon. When colleagues and friends begin to vanish or fall, can the two friends keep their relationship together?

## **From Reader Review Dragonfall for online ebook**

### **Dark Ape says**

Between the title and prologue, I think too much was given away on what was going to happen.

---

### **Cloak88 says**

The conclusion of an arc.

A slightly meandering plot, some cool magic/ technology and the culmination of a 9 book series. A lot happens, and this may be the biggest event that has happened in the series thus far so expect a few odd things.

A good novel, but could have benefited with some more cohesion in the plot.

---

### **John Deltuvia says**

A book that could have used some major editing. The story could have fit in one-third the length of the book. The overall series is great, but unfortunately to understand the rest of the series you have to slog through this one. Niall must have been off hi
