\*\*\*\*\*Currently there is a promotion on the kindle version, where you can read it for free this weekend only, if anyone is interested :\*\*\*\*\*

This is a gorgeous book for children. The illustration on the cover says it all, a pig with beautiful wings, flying high. We all have heard the saying "Pigs might fly" when we've shared thoughts or dreams with others, only to be met with the "that's impossible" look or response. The book shows that anything is possible if it is the right thing for all. Honker Pig is a beautiful pig, sent to help those in The Little Sanctuary, overcome their fears, appreciate what they have and achieve their dreams, to say but a few things. Reading the book as an adult, to share with my daughter, the fables reminded me of the simple things which can get lost in todays world. Honkers' cute little phrases like "Oink Oink - back to the point" telling us not to get distracted, but to get on with what we should or want to be doing, zones in even more to children that they should pursue their goals and dreams, with the little lessons along the road, helping them to become a grown up. The creativity, the characters and the tales in this lovely book, make it a beautiful read for children (with gentle "strike a chord" moments for adults). I hope there is a sequel.

I received this book in a giveaway from Goodreads.

What a great book for children. The story is very good and easy to read. The illustrations in the book are amazing. I would recommend this book definitely.

Great book by Helen Davidson!
