## **Marcus says**

This was a very quick read for me, but that is not saying that the book wasn't worth the time. Actually it was quite the opposite. The book could be based off of the concept of the Punisher, if you're into comics, but there is where the comparison ends. Your main character is a killer, but he has a conscience. The action is pretty intense with some gory scenes, there is no romance to side track the main plot, and the hero is not some super strong type guy meaning he can be killed. If you have a couple of hours to set aside, this is a good book to occupy those hours.

### **Impeccable writing**

Author has a talent for describing the action. Well written. I lost count of the bodies. After awhile it became boring as another 50 bad guys bit the dust. 4 stars for the writing, 2.5 stars for the plot.

### **Wow!**

Don Pendleton writes the executioner series and Donald Hamilton who writes the Matt Helm series, have absolutely nothing on Zeke Mitchell. Jump in, latch your seat belt and hang on for this action thriller series! Be forewarned, this is an exceptionally descriptive book. I enjoyed enough that I signed up for the authors news letter to find out when the next book in the series comes out! Give it a try!

### **Not good**

I did not enjoy the author's style of writing at all. As a lover of books and reading it pains me to say this but it is almost as if there was too much action and not enough back story to the book.

## **GERALD K WELLER says**

### **Lots of action, little content**

Very little content other than lots of super hero killings. Not a fan at this point. Maybe his other books are better.

**Okay read, if you're a young adult. I hate it when a author tells you more about every weapon people carry rather than the people. And then repeat the same information time and time again. It's also ridiculous**

Okay read, if you're a very young adult. I hate it when an author tells you more about every weapon people carry rather than the people and then repeat those description ad-nuseum. It's also ridiculous that one man kills over 70 men nearly one at a time. There is only one John Rambo and Stallone already be this author to him!

### **Mike Devan says**

A short read with nonstop action.

#### **Kill Zone: (The Specialist #1) by Zeke Mitchell**

Welcome to "hell." Absolute war, mayhem, death and destruction on every page. Meet the Specialist, a man on a mission, take out the monsters who have taken the drug war to new monstrous proportions, unchecked by legal action and the legal system. You won't want to put this one down. Thanks for letting me get to know a new author. Looking forward to the next one.

### **Linda says**

I was given this ARC in return for an honest review and was swept into the story from page one! None stop action and a vengeful killing machine named Matt Thorn who swore to take Vince Flaco, a Mafia drug lord that had the Mexican cartel as well as Russia in the palm of his hand and he desired to make the entire world hooked on a drug called Monster Rush! With only himself to count on, Matt knows that anyone could be turned if the money was right! Book one ends in fiery crash with Matt looking at the sky and I can't wait to read book two!

### **Susan says**

A fast read as the story is very short. The entire story amounted to a description of how this man kills the bad guys. The author never learned the art of writing a compound sentence as the book seems to be written on a 3rd or 4th grade level. Still, I'll read book 2 in hope of improvement in the characterization.

## **Robert Ward says**

### **Not good**

I really hate to write a bad review, but this is not a well written book. The narrative is crude and spastic. I couldn't stand reading more than 7% before I had to give up.

## **John says**

### **Purple prose**

Reads like a juvenile comic book . If you are in junior high you may enjoy this book . If you are an adult skip it.

---

## **Chester J. says**

### **Action packed thriller**

Action packed thriller where the good guy wins for a change. Non stop with a character who is a stone cold killer with a heart.

---

## **Peggy Pancherz says**

### **Good book**

Read all of the books in order to really enjoy. Storyline continues to grow and develop. Characters are realistic and get better and better.

## **Mark Allen says**

Remember back in the '80s when noble one-man-armies like The Executioner rampaged against the evildoers, killing them mercilessly? Yeah, so does Zeke Mitchell, and he expertly captures the vibe of those old action-adventure series, writing in that same "kill 'em all and let God sort 'em out" zone that made those books such (not) guilty pleasures. The plot is minimal, just enough to hang a series of nonstop action sequences on, and seriously, our stone-cold yet honorable protagonist wastes more villains in this book than all the Rambo movies combined (OK, maybe a slight exaggeration ... but just a slight one). Everywhere Matt

Thorn turned, there were bad guys popping out of the wood work waiting to waste him ... only to get wasted themselves instead. Sure, the thugs were horrible shots while the hero rarely misses, but that's all part of the genre as far as I'm concerned. I just kept on grinning as I watched (read) one enemy gunman after another get chopped to bits by autofire. And I greatly appreciated the level of graphic violence; this ain't no PG-13, watered down, sissified action. Heads explode, eyes pop out, blood gushes, and body parts fly.

Bottom line, "Kill Zone" is a great kickoff to what should be a killer action series. It's all guns 'n' guts and I could not have been more entertained.
