## Shattered Stars Viola Grace

*Hannah wants nothing more than to pay off her bond and live free, but her patron has other ideas and centuries to keep her. Body and soul.*

After a planet-killing asteroid, humanity has to huddle under shelters and live in the dimmest of places. A year of brutal survival and the breakdown of society leave Hannah less than hopeful of her prospects in the new world.

A message in the darkness offers a lifeline to those who wish to leave Earth to be bonded servants to alien masters. For most, the price of their bond will be labour, but for Hannah, it turns into something else.

With a stunningly high sensuality rating, she is a prime sexual bondservant and the bidding for her services ends with an amount that breaks records.

Her patron is a male with wings who belongs to a species that does more than need sex; they consume it.

*Mero only needs to look at her, and he is hungrier than he has ever been.*

### Lara says

This is a different type of story for Grace. The heroine is from an apocalyptic earth and has suffered from the turmoil of the world dying as well as from being victimized by other survivors. She leaps at the chance to join an extraterrestrial program, despite knowing nothing about it including if its really real. Well it is, and she finds that she must pay back the cost of her rescue and training through service that is sold to the highest bidder. And the higher the bidding the longer it will take to buy her freedom.

Hannah is practical--trading freedom for security and food. The placement she ends up in is one that she did not anticipate, and doesn't really welcome, but she is determined to do well to ensure her safety and ultimate freedom. It takes a while for her to comprehend her true situation, but once she does, she is able to take ownership of it and turn it into an opportunity to reach many of her goals.

Along the way there is sex. Lots and lots of it. And that is both a trade-off and a benefit of her situation. Related to this are some scenes with limited or questionable consent. Power dynamics are important here, and she learns that despite being a bonded servant she has power of her own to wield. As she comes to that realization, there are some humorous scenes, main in terms of others' reactions to her desirable characteristics.

The book does not down play the nature of the situation she is in, but does address differences in cultural perception and power roles. Hannah doesn't back down or hide. And she's smart about how she confronts difficult interactions. I'm hoping for more in this universe, despite its uncomfortable dynamics.

[ I didn't feel that the heroine was clear about where their relationship stood. Is she in love with him? If so, how did that happen? Her trauma makes her reticent. The hero's emotions also felt vague. He

## **I vote yes**

I have read all of her books no matter what name she writes under. More Mechanical Advantage and Brace for Humanity. Would also like more Fey at the Crossroads if at all possible.

I really enjoyed this story. It might be one of my new favorite stories by Viola. I love her other series but it was interesting to see a new universe created. I hope Viola plans to create more stories in this universe, so much potential with Mero's brothers and sisters. Mero was not my favorite hero at all at first but he did grow on me. I enjoyed how Hannah made the best of her situation and was able to save her sisters.

Shattered Stars....where to begin? This book actually made me wish for a world wide catastrophe, an alien race of traders, designed warriors and the chance to live on a new planet. I'm sure this wasn't supposed to be a quick read but I just couldn't put it down.

At the start of the book we find a young lady with a terrible life on an earth that has essentially been turned into one big refugee camp. As with survival of the fittest, those who end up with the power don't always wield it with any sort of consideration for those beneath them. In comes an alien race of traders willing to offer a home to those who would like to escape. She is given clothes, education in the ways of the new races and a chance at a better life. When she is purchased at the auction as a companion things really get interesting. She has no real hope of ever repaying her purchase price but her new life isn't looking too bad, one of the major perks is tall, dark blue and sexy.

I found this book to be exquisitely put together with a flow of events that was just compelling. The heroine in this book was strong, resilient, open to adventure and self confident. I could appreciate the way she could acquiesce to her new "owner" without seeming to be held under his boot. There was a genuine give and take of knowledge and real conversation that was very nice.

The man in this book could literally stop traffic. The physical descriptions in the book along with the spot on book cover made it extremely easy to picture every move he made.

The world building was wonderful as well. There were a lot of characters and situations introduced that I would love to see explored further in coming books. The good news is there should be more in the works. I can't wait!!

There is a tension in the writing here from the heroine's practical, cautious, and attentive point of view that is just lovely.

The hero is mysterious but this aspect of his character makes sense as he is a very powerful being.

The erotic elements weave themselves into great world building. The romance and secondary characters are well drawn.

The HEA needs a slower hand but it is a cheerful closing and I look forward to the next book in this series.

This was a sexy sci-fi read. I liked that Mero wasn't basically human but with different coloured skin. He had alien features. The overall plot of the story was good and I hope Viola writes more about the couple.

### **★ Belle The Bibliophile ★ says**

Out of topic but I find myself drawn to a sci-fi book better when the book cover mirrors the content of the book, in terms of their creature, universe, and etc. It's far better than some basic cover with a bulgy, muscled, oily man. I'm just saying.

I wish this book was longer because there are several loopholes that got me questioning but overall I would say this book is an okay read. It's fast paced in every way, from the sequence to the relationship build up. But yeah, I was okay with that. I love the winged creature, and alien society that this author has crafted. Only, like I said, kind of wish it was longah!

### **NotoriousP says**

LOVED THIS BOOK! I wish that it was longer and the ending wasn't so rushed. There were some unanswered questions like, the difference in life spans between H and h.

Can't wait to read more about this world and hope that there will be a 2nd book about Mero and Hanna giving more detail about their life together.

I ended 2016 with a very good read by Viola Grace.

An interesting unique alien species, limited in numbers, very powerful and unique feeding.

I look forward to more stories in this new series.

I can see why Ms. Grace is the top selling author at Extasy Books. She excels at her craft, spinning a story that not only draws you in, but makes you read it in one sitting.

3.5 stars

I enjoyed this story. However, it lacked much in the way of details and character development. I enjoyed the characters, but felt as if there was not enough there for me to truly feel attached to them. The world seemed rich and complex just from the small bit of world building we were given, and I would love if even more of it was fleshed out.

I read this book and wanted more like it so when I saw the survey at the end, I completed it. The second book is now out and I can't wait to read it.
