The Haunting Lynne Ewing

Meri, Sudi, and Dalila are three girls who live in Washington, D.C., but have little else in common. Or so they think. When an ancient magic is revealed, so are their true identities as **Sisters of Isis**.

Sudi is still struggling with her newfound powers. While Meri and Dalila continue to learn new spells, Sudi can't seem to master even the most basic of her magical gifts. And she may be running out of time.

Someone - or something - is haunting Sudi. But, frustrated by her failure to keep up with the other Descendants, and distracted by the mysterious new boy at school, Sudi is more vulnerable than ever. She's got the strength of the other Sisters on her side - but will that be enough?

Soph - Lock&Key says

This book surprised me. the last book was very much like the second and in this book I was expecting something somewhat the same. But this little book was really different to all the rest of them. I had so much fun reading this.

Alisha says

This is the fourth book of the Sisters of Isis series. When I read this book it continued where the third book left off pretty much which was good. But by the ending, I would say that this series is not done being written but I can't be for sure that the author will continue with the story line. But for this book, I liked the action and excitement within the story. I love how the characters were put up against challenges and to see them go through those challenges be resolved throughout the story was good. I got sucked in when I read this series. In this book, Sudi is still struggling with her powers and even more distracted with a new boy at school. I like the different challenges that the author puts in for her character. I would recommend this book.

Anne (Angel Anne Reviews) Nelson says

This is an interesting series, I recommend it as a good read

5/5 angel stars

Kayci Schmidt says

That's it? That was the last book in the series, and there were many things left unresolved. I was hoping the final book would tie up all of the loose ends from the previous books, but it only added more. I'm really disappointed.

Emily Dinges says

love it. Fav out all the books in the series, I wish she would continue with it.

Annika says

Really, I have mixed feelings about this book. When beginning the book, I was kind of angry at Sudi for the choices she made, along with completely ignoring signs around her, just to be with some guy. Like when her

wand was freakin out when she was talking to either Raul or Zack (can't remember), she just tried to make it shut up, rather than taking a second to figure out why it was freakin out.

But eventually I started liking it more. I don't know when I did, but it happened.

But one thing that I want to know is what happened between Sudi and Brian? They keep hinting that something really bad happened, resulting in their breakup, but they never say what happened.

It's really unfortunate that there aren't any more books in the series, because it's definitely not done. There's so much that needs to happen between characters. Like that classic shouldn't-happen-because-it's-probably-against-the-rules relationship, which could have happened between Meri and Abdel. I could see the series going that route.

Lynnae says

gr8 book! bt if u dont lyk ppl having magical powers it wont b a book 4 u

Melissa Lorenzo says

I think Suni is an idiot. I hate to be so blunt about it, but this is the second in the series that has focused on this particular character and in the first I didn't like her either. In that one I attributed it to her being written that way so that the reader could go on a journey with her as this new destiny unfolds before her.

Yeah, that was giving the writer the benefit of the doubt. I feel obligated to read the series in its entirety and so I'll read the third (since I missed that one). I doubt though that it will much influence how I feel about the series- which is pretty mediocre overall

Taylor says

I often don't like Sudi as much as Meri or Dalila but I did really enjoy this series and am sad that this was the last one written, that the author couldn't continue writing the books. That we will never know how the series is suppose to continue and end, what will happen to Sudi, Meri and Dalila.

Alex says

Despite the low rating I gave this whole series, it wasn't terrible. I just could have done without reading it.

Katlyn says

In the last adventure of the sisters of Isis, there is a ghost of Ancient Egypt haunting one of the girls. So after the girl figures out that she is being haunted, she and her friends begin to investigate and unravel a dark secret about the person.

Fernanda Garcia says

The haunting was a verry exiting book. It was verry exiting because i really wanted to keep reading and different things would happen. This book was also verry suprising because you would've never though of the true subject and it would suprise you by the end. I did get kind of confuse in the middle and had to read it a couple of times because they just ended up somewhere. I recomend this book a hundred percent.

Bianca Farmer Hurst says

Why was the series never finished!!!!!!

Kirsten says

this is by FAR my favorite book of the series!!! I've read and re-read this book 10+ times in like a year. this was the first book I read of the series and I still was able to understand what was happening. only problem I had with reading this one first was i kind of found the others boring when I read those. but its still an over all amazing book of an amazing series! This author is amazing all of books are so good.

Kayla Eklund says

This was all sorts of disappointing. One of the biggest series ending letdowns I've ever read.
