### Shayna says

I just love a good romance where the hero falls instantly...where he makes up his mind right away that he will spend the rest of his life with this woman. It just gets me right in the gut and in the heart! Now, that doesn't mean this was a smooth ride to happily ever after. There is still angst...a little danger...and a hell of a lot of sexy times. UNWRITTEN by Jen Frederick is yet another WINNER in a long list of great romances by this incredibly talented author.

*"Let me love you."*

Adam Rees wants Landry Olsen the second he sets his eyes on her. The beautiful redhead draws him in like nothing before and sets his body and heart on fire. A few minutes later, he discovers that she is the sister of his new lead singer, and in a matter of minutes, she becomes forbidden fruit. She is of the highest temptation and there is no way that he can ignore their attraction towards one another. Their band needs this break, but it's worth the risk right?

*"That's my girl. Come for me."*

I absolutely ADORED Adam and Landry's story. It's the perfect blend of sexy and sweet, and I want to go back for more! UNWRITTEN is my very first Woodlands novel, but I'm not stranger to Jen Frederick's epic writing style. This is part of a series, but it can be read as a standalone. In fact, the second I put down UNWRITTEN, I added the previous books in the series to my TBR pile! If you are looking for a romance with heart and soul, UNWRITTEN is the book for you!

Well that was such a lovely story. Until a few weeks ago I didn't know anything about the Woodlands series so I had no idea who Adam was. I read **Undeclared** because I wanted a little background but I didn't have the time to catch up on all the other books - yet. I mention this so you know you can absolutely read this as a stand-alone.

**FMK** is the third band that **Adam** had created. He's very particular when it comes to music. And the guys with him might be on board or out.

**Laundry** is Davis' sister, the new singer of the band. So when FMK has an opportunity to go on tour and Davis doesn't want to let her with a stalker, she has no other option than to join them.

While Unwritten is a case of love at first sight, the relation between Adam & Laundry was a **slow build**. I enjoyed seeing them trying to resist the pull they had. It was a real torture at some point to see such sparks

but not one of them could do a thing about it because of Davis.

I love seeing how characters grow in a book and it was exactly how it happens in *Unwritten*. Laundry was a little insecure and became a woman with more confidence. Adam was a little too narrow-minded but he learnt to see things differently.

Books about music are often a hit for me because I love to witness the backstage. With FMK being at their debut it was fun to see them progress as Adam's band to a real family where all are taking their right place. I'm attached to all of them. I really hope Jen is considering giving the other members a story because I definitely don't have enough of them all.

*Unwritten* is just the perfect book if you want to snuggle on a Sunday (or any day) with music in your head and love in your heart.

I definitely enjoyed *Unwritten*, it has a brother's best friend vibe in the sense that there is a little bit of forbidden love. See Landry is Adam's new lead singer's sister, so there is the forbidden element. Plus she has been through some stuff so her brother is super protective of her.

That's how Landry ends up on the road with Adam and the band. Due to the stalking and assault, she has been through, her brother refuses to leave town without. Adam comes from music royalty and has experienced some of his own fame in the past. So you would expect him to be a manwhore and all about the fame, but he is actually a really great guy and knows what he wants.

Once he decides he wants Landry he decides to make a move until he realizes she might not actually be interested in him. So Adam takes a step back and doesn't want to make her feel uncomfortable or pressured. The story is told in dual POV so you can actually see that Landry is fighting her own feelings for Adam. This back and forth, forbidden element lead to an awesome build up between them and I was hooked.

I think a lot of people will enjoy *Unwritten* and feel the same excitement I felt when reading. I am not a fan of rockstar books, but this one is perfect in the sense that you get this on the road, performing vibe, but you also don't have to worry with the rockstar lifestyle. For me, that was a huge win since I am not a huge fan of angst. I have really enjoyed this series and I think Frederick did a fantastic job with Adam's story.

The Woodlands series is one of those series that I will literally drop everything for. Since the very first book I fell in love not just with the perfect writing style of Jen Frederick but with all of the amazing characters she produces. So as soon as a new Woodlands series is released I know I am going to sit down with a character I already know and love and get the opportunity to fall in love with another one.

I was a little nervous when I saw this one was Adam's story. See I really love Adam but he was such a massive manwhore and I am not a huge fan of rock star romances generally (groupies aren't my thing) so I was apprehensive about what we were going to get. I knew I would love it I was just scared I was going to tie my stomach in knots dealing with angst and drama.

I should have had more faith in my beloved Jen. Adam was just the perfect book boyfriend from page one. He fell so hard and so fast and was so sweet and devoted and just damn I want one BUT then he was also this pierced and tatted rock god who could throw out dirty talk and back it up. I didn't know if I was going to swoon or spontaneously combust.

Then of course there was Landry. She was totes adorbs. I really liked that she was part shy, insecure, computer geek with a streak of steel. Like most of Jen's characters she was multifaceted and felt so real. Plus we got all of the other band members and their families and a little bit of the original Woodlands couples to just add another great part of this great series.

If you haven't met the men of Woodlands you have no excuses since Jen has them all on sale and if you're lucky the first one might even still be free. And if you have already met them all then please message me so we can gush over how perfect Adam was as a boyfriend. Oh and you can check out my other reviews for this series right here

Adam finally found the girl he wants to spend forever with. Too bad she comes with a LOT of baggage. Not only does she have a crazy stalker – she's also the sister of his new bandmate Davis!! But all that doesn't stop the insta-attraction they both feel. Even though they think the other could never feel the same .... But they have to fight it – which is not really easy when Landry has to go on tour with them for two months, because her brother doesn't want to leave her alone with her stalker near by!

I really enjoyed this book! Rockstar romances are my absolute favorite! I would've enjoyed it a bit more, had I known that this was book #5 in a series. But all the old couples just show up a few times, it's not really necessary to know their stories. But I personally hate it to not know the first books in a series!

But even without knowing much about anyone and anything, I really liked Adam and Landry. They were so adorable! I love rockstar romances where we're really doing rockstar things like going on tour! And here we have all those adorable and crazy guys on a bus with one girl! Too funny!

Too bad Davis told everyone HANDS OFF HIS SISTER! Poor Adam!

It takes them a while, but of course they can't deny their attraction forever.

I loved reading it! I would've wished for a bit more. A bit faster in the sexiness department. Just a bit more. Not much happens. We're on the bus and fight about music and the band, talk about the stalker and think about feelings. But nobody really does anything. Nothing really happens. BUT, I still liked it... I just wanted a bit more excitement! Not that there's NO excitement. We have some sexy time and some frustrating moments and funny moments and suspensy scenes. It was a really great romance! A #RockstarRomance can't do anything wrong in my eyes. It can always be better, but as long as it's a rockstar romance, I'm pretty happy with it!

UNWRITTEN was a really adorable & funny & frustrating & suspensy rockstar romance! Run to your nearest amazon for your own Adam, this one is MINE!

Jen Frederick rocks the heck out of this rock star romance. All the ingredients are there to make *Unwritten* an entertaining read, and the result is quite successful.

Adam is the lead guitarist/songwriter for an up and coming band. Although women are plentiful and he's no saint, Adam isn't a total horndog. When he meets Landry, the new lead singer's sister, he knows she is the

one for him. It's not technically a case of insta-love since the words, "love," aren't uttered. However, literally the moment he lays eyes on her he becomes convinced she's the woman he will spend the rest of his life with. Insta anything tends to bug me, so I was surprised I was able to overlook it and just enjoy the ride.

Landry is an unadventurous, awkward computer geek who is forced to go on tour with her brother and his band. She is oblivious to her appeal, and Davis is super protective of his sister. His off limits edict, Landry and Adam's growing mutual attraction, and close living quarters make for great some great sexual tension. There's a side plot to add a bit of drama and a colorful cast of band members.

For all of Adam and Landry's secret encounters, the exposure of their relationship is a tad anticlimactic. Nonetheless, this is a fun story that satisfied my taste for a lighthearted romance.

*Unwritten* is a standalone within the *Woodlands* series.

I'm going to stop here! I got to 50% and just can't connect with the characters, so I'm going to stop here and move on. It's probably the case of timing and just me, so don't let this stop you. So until next time. On another note I LOVE Jens writing style on the norm so I will absolutely keep reading her stuff this one just didn't work for me.

That. Is. All

**4 "love behind the music" stars**

I liked this **"off limits romance"** and, for me, the first book I've read in *Woodlands* series, cause it was enjoyable and not blindly linked to the previous books in the mentioned series which is definitely a plus!  
\*wink

You might think this is just another **"forbidden" romance** set in a music world background and you would be right, of course but if you'd decide on passing it by, you would also miss out on a **fantastically portrayed**

**"presence" of the main character** - the band leader songwriter and the lead guitarist **Adam Rees**, then the **absolutely itchy sensation of the angsty anticipation** spread through out the story while the main characters, Adam and Landry (who just happens to be the band's lead vocalist Davis's sister, who joined the band trying to hide from the psycho stalker that is threatening her life, and therefore, she's off limits) **fight against the attraction towards each other**, cause of the fear it might destroy and devide the unity of the band. And then when they finally do succumb to the **carnal desires** it's too late to control the speed of **immense sexual intensity** that is even more evident the more they try to hide it from the rest of the band.

Even though this is the high point of the storyline, it doesn't only rest on the romance factor, it's also intertwined with **reflective insights** on the main character's **inner search for the meaning and substance** (here especially through out the music) in life, while he's trying to do what he loves and what makes a huge part of him as an individual and not fall under the pressure of mainstream superficial hardcore capital by selling himself and his essence in the name of the commercial music industry.

But to state again, **Jen Frederick** can write **angsty anticipation and sexual build up** like no one's business, and since I'm a sucker for that notion and feeling and I always feel the itchy, vivid rush from it, that alone is worth 4 stars, if not more. \*wink\*

### Tpagirl says

Unwritten was the fifth book in the Woodlands series by Jen Frederick. Although part of the series, it can be read as a standalone without missing anything.

Adam Rees was the gorgeous leader for an up and coming band. He was born and raised in the music scene through his ridiculously famous dad. Doors could open as a result, but he dedicated himself to earning it in his own right. He was known as a player and heart breaker, but he always knew once he found "the one" that he would know and would settle down. He was right but life couldn't be that easy.

Landry Olsen was the beautiful sister to the new lead singer, Davis. She secretly crushed on Adam but knew it could never go anywhere. He wasn't built for relationships and she would never ruin the good gig her brother had going. She also had her own baggage, which was a little more visible than she liked.

I loved the story. I loved the buildup. The first half of the book was building a friendship and a foundation for the two. It was told in a dual POV but once the stage was set, we heard Landry's POV for awhile, then we heard Adam's for a while and it kept pace so that it wasn't a chapter by chapter volley but more of a time period volley. It kept the pace moving and was an interesting perspective.

Additionally, the suspense started early on with Landry's stalker. It set the stage then went dormant but was always near the surface with the expectation that it would come to a head at some point.

I loved the sibling interaction between Davis and Landry. I also loved the band mates. They were awesome

and interacted like best friends or brothers. It was fun and filled with humor. Frederick set the stage perfectly for a spin off for each band mate to have a story.

Although it was well written there were several editing errors, but nothing too numerous. Additionally, I felt it lagged slightly in the middle, but then picked up nicely again near the end.

All in all, I found it fun, light hearted, entertaining and enjoyable. There's one more roommate from the original Woodland series, Mal, but I'm totally rooting for a band spinoff!

Review @ Vanilla & Spice Books

Don't catch feelings for Adam Rees.

I am a huge fan of this author's writing and I would like to start this review by saying that you please take it with a grain of salt. The things that didn't work for me might totally be your thing.

Adam is mastermind and head of FMK, a rising star in the world of Rock bands. He is pretty much everything you can expect from a rocker, minus the drugs. At a gig in a bar he sees his future, a beautiful redhead who turns out to be his new frontman's sister. When he sees the bruises and cuts in her face and on her body he can barely tame his anger.

Landry feels the instant connection with Adam as well. She has come to the bar because she didn't feel safe at home. She is a walking disaster and a catastrophe to happen. Her stalker came to her house and scared her. Unfortunately her brother is soon leaving for a tour, her parents are on a second honeymoon. Neither Adam nor Davis want to leave her behind. To take her out of the danger zone the band takes Landry with them on tour. While Adam loves having her close for the next two months she is his singer's sister and he and his bandmates have been warned to not touch Landry. How are Adam and Landry supposed to ignore their growing attraction when they are going to be locked up together in a tour bus for the next weeks?

I loved Landry and Adam separately. They were lovely and sweet. Adam is super protective and possessive of the girl he has fallen in love with.

*There are men sniffing around her, though. She's drawing them, like hungry wolves circling a rare piece of meat. I growl into the mic that she's mine, all mine, that her kissing, her loving, her touching is mine, all mine.*

He is also a bit arrogant and follows his gut feeling. Landry is the funny and nerdy heroine you can relate to. There was actually one situation she had experienced in her past that happened to me too and I had a deja vu and I giggled for a couple of minutes at the memory.

***When I was fifteen, I went for an entire period with my skirt tucked into the back of my tights until a teacher, not even one of my damned friends, pulled it out for me.***

Yup. that right there is me. She is also innocent and naive when it comes to men and her attraction to Adam is a little bit inconvenient since she has been warned that he isn't the relationship kind of guy. It was so sweet to see Adam pine for her. And right there was the problem - you don't get much interaction between the hero and the heroine until you reach the 40% mark. While I can totally get on board with insta-love here it didn't work for me because there was no relationship build-up. There was a lot of band drama and talk about Landry's stalker but not much one-on-one between the main characters which took away a lot of the plausibility of their growing feelings. All this distracted from the romance aspect.

Landry is still traumatized from her experience with her stalker and and this setup in the storyline had so much potential.

***Marrow's stalking did a number on me, scarring me mentally and making me wary of all penis owners.***

The execution was, unfortunately, a little bit lame in the conclusion. I expected more tension and action but that didn't happen. It was over so fast that I had to blink twice and wonder if that was it.

In the chemistry department these two definitely worked. Once they give in to their mutual feelings and attraction it is explosive. Adam is quite the dirty talker! Whew!

This book can be read as a standalone, in case you were wondering. I am definitely going to read the other stories in this series!

Overall I did enjoy this story, as mentioned I loved the main characters, I just didn't feel the love between them. Still, Jen Frederick has a fan in me - she knows how to write likable and relatable characters. I am looking forward to her next book and I would love to get a story about Davis!

***Love is a crazy little thing, but I get to share it with the best man in the world. I caught feelings for Adam Rees. He caught them back.***

## **Lacy Words we love by says**

This book was a light and fun read . So very different from all of Jen's other books that I've read . It's a very sweet story and different from your typical rock star romances . It doesn't dwell on the complicated side of dating a rock star . It focuses more on the relationship of the leading characters .

Adam a very loveable hero an a music genius not very hang up on the glitters of a rock star life . He was very down to earth and very driven and I loved that about him . Landry was just as sweet and not complicated . I loved how their story grew up from attraction to a beautiful love story .

If you are looking for a refreshing and light fun read then this is your book .

## **Kim says**

3.5 stars

I have enjoyed this series and have been looking forward to Adam's book. He is a musician that is finally finding his stride and is ready to go on tour with his new band. But his new lead singer, Davis, can't come on tour unless his sister, Landry, comes with them. For Adam that could be either the best or worst idea since he has been attracted to Landry since he first saw her. She's got a crush on him too. But her brother has already made all of the guys promise to stay away from her and also make Landry promise not to get involved with any of his band. So she is off limits and they are stuck in a tour bus together while they pretend they are not interested in each other.

Adam is charismatic, talented, but controlling and stubborn. He wants to do things his way. So when Landry and the band challenges that, it causes tension. Landry is more a shy, awkward, geek that does not see her own appeal. And her past has traumatized her.

But the more they are together, the more sexual tension, repressed feelings, jealousy, and anger rears its ugly head. Even as they finally admit what they want to each other, Landry still wants to keep them a secret from her brother and the band to avoid conflict.

So it is a precarious situation that could unravel at any time. Not to the mention the really good reason that Landry had to go on tour with them in the first place. Adam has to figure out what is best for him, Landry, and the band.

I had a bit of a disconnect with this couple and story. I am not exactly sure why. The fact that previous playboy Adam took one look at Landry and basically saw "forever" was a bit much. It was definitely a slow build and took quite a while for them to progress past their insta-attraction. And then the whole hiding thing further hindered them. It was a bit hard to get invested in their feelings when they were hiding them so much.

It was told in dual points of view which I did like. I enjoyed the cameos of the other characters from previous books: Bo, Ann Marie, Noah, Grace, Finn, and Mal. And I liked the band Davis, Rudd, and Ian (and his wife, Berry).

It was a love-on-the-road-fledgling-rock-band read with an off-limits-friend's-little-sister component. there was also a bit of suspense due to Landry's past. It was enjoyable enough, but was not that angsty or romantic. It did not have quite the emotional hook or turmoil that some of the other books in this series has had. But I do like the dynamics of the group of characters. Their banter and humor is fun. Mal still needs his story and now she has opened the door for a spin off with Davis or Rudd.

As a very dedicated music junky I greatly appreciated the way this author wrote about music. Jen Frederick created Adam's character brilliantly and the way he spoke about music had me swooning all over the place. I loved that he was so into what he did and that he was very protective over the music he created.

Past his love of music he was also amazing with Landry and I adored these two together. Adam became super protective over her very fast and I loved reading about him pursuing her. I honestly wish we would have gotten more of Adam and Landry together but I think that's just because I loved them as a couple so much. The hot rocker and the computer nerd, what's not to love?

I actually lost track of this series somehow so I haven't read the previous book but I definitely plan on rectifying that soon. I need more of these men!
