### Nikhil Pimputkar says

This is the only book authored by Ranjit Desai that I've read. From whatever I know of him, he has mastery in writing novels which are based on famous historical personalities. (e.g ?????, ??????? ????, ?????? ?.) 'Gandhali' is a collection of five stories based on different historical figures lived in different eras. The common theme of the five stories is love, followed by separation. (which is the inevitable end to every love story in the world)

The author succeeds in taking us back to those (medieval/pre-British) eras. The sad incidents are more intense than the happy, romantic incidents. By what I know of the author, he could have put a little more weight on romance between the two leading characters in each story.

I didn't like the second story in the book as I didn't understand what exactly the author wanted to say and the weak story line.

---

### **Swapnil Bankar says**

Book has 4 stories which is about the love in indian history. According to author love has no age, no religion. and Indian history gives the example of this.
