When Abby's class starts a newspaper, Abby envisions herself as the star reporter. But she's only given an advice column to write - and that is not good. (Dear Abby isn't her first choice in nicknames!) Just as she suspects, the column gets Abby in some trouble with her classmates. But, surprisingly, it also gives her a chance to help a friend.

Anna Bannana says

This is really cool.I loved the diary aspect.

The Amazing Days of Abby Hayes is the series that inspired me to love writing. It was incredibly influential in my early youth and I still own some copies of my favourite books in the series, including this one. I would love it if this series was popular enough that I could mention it and actually have people know what I'm talking about!

Tiffany says

Nothing special. Outdated for sure (floppy discs, etc.). Not recommended, but theme of "never give up and keep trying" is good.

I liked this book so much. I think that it was rude when her father was ignoring her when she was trying to tell him something. The name for Abby's advice column "Gabby Abby" is hilarious. I like when Abby's class is making a newspaper. My favorite part was when Paul ,Abby's dad, finally stopped ignoring Abby.

Abby Hayes is a fifth grader. She finds out that her class is going to publish a newspaper called, "The Lancaster Lark." She is so excited about this. She knew right away what she wanted to do for the paper. She wanted to be the star reporter. Abby didn't get her wish and ended up being the advice columnist. She didn't like this because she was stuck with boring and stupid questions. Eventually she realized she is good at giving advice. She goes through some struggles but is happy because she gets to help people.

Abby is very good at expressing herself. She is kind, caring, and helpful. She loves to help people. She tries really hard to give great advice on the newspaper. Even when it went bad she didn't give up. She just tried harder. By looking at her advice you can tell that she is very smart and responsible for a fifth grader.

I rate this book three stars. Although it is written well it is not my reading level so I didn't enjoy it very much. I didn't like the format of the book either. It was written like a journal.

I recommend this book to male and female elementary kids. The reading level is low and it is very simplified. This is something they can relate to and enjoy.

good book

Abby's class is starting a newspaper called the Lancaster Lark and Abby is the advice columnist and it is hard for her. When Abby decided to do 2 things she made Natalie happy because everyone said great things to her. I learned to be nice to people. Auryn 8yo

Dominique says

I thought that an advice column was a good assignment for Abby because she would give out good and funny answers.

This book is okay. but the other ones in the series are better.

Amy says

Definitely a strong series for kids beginning to read chapter books. Well-written and I think nails the thoughts and emotions of the grade school experience. The journal portions add a nice personal touch as well.

Anne says

Reading Abby's column was so much fun!! Her answers were always quirky and witty. I love that girl! ;)

Ann says

it was very enchanting

Mustang says

i loved this book because she called natalie 7 times and she kept on trying to talk to her and she finally talked to her again. Abby did a spotlight on natalie.

Tt says

It was AWSOME!

I loved this series as a tween, and it might've gotten me through those 3 unbearable years. This book just has one of my favourite quotes as the title, but I'd have to give it the same review as any other book in the series. It's cute, it's fun, and it's addictive. If you're into tweenage drama, and want to get lost in the problems that middle school holds then this series is your holy bliss. Plus, aren't journal based books the best?
