### **Terence says**

If I recall correctly, I got this book through the Scholastic Book service in the mid to late '70s. Can't remember a thing about it but I do know that I liked it a lot.

### **Bob Rust says**

Dar Tellum: Stranger from a Distant Planet (1973) an effective Picture Book for younger children, in which the eponymous plant-like Alien cures Earth of carbon-dioxide poisoning.

### **Laura says**

This was one of my favorites as a kid. It really made me believe in science, even tho it was sci-fi. The belief that the mind had infinite capabilities was inspiring. I spent many hours attempting to learn telekinesis (no luck yet.)
