*Danielle Steel*

## **Family Album** Danielle Steel

Through forty years—from Hollywood's golden days in World War II to the present—Faye Price would create first a career as a legendary actress, then a family, and finally she would realize her dream of becoming one of Hollywood's first woman directors. But nothing was more precious to Faye than her five children. In a changing world, a milieu where family values are constantly challenged from without and within, the Thayers would face the greatest challenges and harshest test a family can endure, to emerge stronger, bound forever by loyalty and love. It is only when Faye is gone that they can each assess how far they have come, and how important their family album is.

*From the Paperback edition.*

### **Mary says**

Lord....this was my first Danielle Steel book I've ever read and it was pretty much what I expected. Everyone's beautiful, blonde (or the rare ginger), dazzling, with blue or green eyes. A rags to riches back to rags back to riches story. I don't know if her books have changed over the last 30 years, but she seems to have a weird obsession with disparate age differences when it comes to many of the romantic relationships and sexual encounters in this book. The book covered the 40s through the 80s - predominantly the 40s and 60s. Even so, it definitely had an 80s sensibility. I pictured Danielle Steel typing her manuscript in her big hair and shoulder pads while *Dynasty* or *Falcon Crest* played on her TV. It was so melodramatic, I felt like I was watching a soap opera unfold on paper rather than on TV.

### **Roshni says**

Wonderful book!!! Just loved reading it!!!  
One of my favourites and the best book ever read so far.  
The story is just perfectly complete. One can feel the story and the character.  
Read this book twice and the more I read the more attached I feel to the story.  
Will linger for a long time on my mind.  
Awesome work Danielle Steel, Waiting to read your other books :)

### **(;Alicia™?A constant game of Russian Roulette says**

This has to be one of my favorite Danielle Steel books. It was very interesting and talks about how much a single woman has gone through. The drama she encounters through life is incredible. She still manages to keep a positive attitude and that is what's great.

---

### **Diane Wallace says**

Great story! a fun and interesting read with some good characters and also well written (paperback!)

---

### **Anie says**

This is a nice book that shows how a brave and courageous woman tries very hard to keep her family united in hard times even when her husband left and the way she handles and manages the problems of her children of different age groups. One of the brilliant writings of the author. The story begins in the decades of second world war and goes till next generation. Overall a good read with a nice family oriented theme.

---

### **Brandy says**

I loved every minute of Family Album. One of my favorite books by Danielle Steel. My second novel I've read by her. Great story and characters. I will definitely be reading more by this author.

---

### **Rachel says**

Family Album is one of those story that once you start reading it you will not be able to put it down. You will forget everything and will enter the world of this family!!!!

---

### **Curlyhair says**

Enjoyed this when I read it years ago.

---

### **Taiyaba says**

I read this book again & again because of the courageous women how stive very hard to kept her family together even when her better half left her in hard times all by herself

---

### **Jerald Vernon Torres says**

First Danielle Steel novel I've ever read...

I didn't favor love stories that much but this book give me some chilling sensation throughout my body...

I love the book, the story,...smooth plot...and emotional sensitive book

one of the most brilliant book I ever read

---

### **Jen Lynn says**

This is my first Danielle Steel book that I've ever read, and it wasn't bad. It took me quite a while to get into it, and I almost gave up a few times if I'm honest. There were some really slow parts, there were parts that seemed rushed, for much of it it was obvious how it would turn out, and the characters were hard for me to relate to and connect with. Once it got going though it was alright and I was interested enough to see how it all turned out in the end. So it was just ok in my opinion. Not great, but not horrible.

---

### **Joanne says**

In the past I've read several Danielle Steel books and have always enjoyed them, but it's been ages since I've

read one. The story was the type I like to read - following a family over the years. In this case the time period was the 1940's - 80's starting with WWII and Hollywood glamour. This book was a little more controversial on the family subjects it touched: drugs, homosexuality, flower children in the Haight, May - December romance, teenage pregnancy. Also, it began on a sad note with a funeral and ended with the character's death which wasn't the upbeat happily ever after I remember of DS novels. Overall a good read.

---

### **Randy Wiggins says**

I love this book! I haven't read it in years so I guess it's time for a re-read. Well worth the time.

---

### **Diane says**

Enjoyable read! long lasting storyline...awesome writing (paperback!)

---

### **Jason Ernst says**

I went through a Danielle Steel phase in my prepubescent years. Lining multiple shelves on my mom's bookcase, they were readily available. This is the only one that sticks out in my memory, and that's because I think it actually had more to offer than the quickly-read-and-forget-so-that-you-won't-remember-that-in-the-three-months-time-it-takes-for-the-next-Danielle-Steel-novel-to-come-out-you-won't-recall-that-the-story-has-been-recycled.

Okay, maybe that's a bit unfair. Maybe Danielle Steel isn't that bad. Another book of hers I read around the same time and was moved by just came to mind: Kaleidoscope.
