Big Java: Early Objects Cay S. Horstmann
Cay Horstmann's sixth edition of *Big Java, Early Objects* provides an approachable introduction to fundamental programming techniques and design skills, helping students master basic concepts and become competent coders. Updates for the Java 8 software release and additional visual design elements make this student-friendly text even more engaging. The text is known for its realistic programming examples, great quantity and variety of homework assignments, and programming exercises that build student problem-solving abilities. This edition now includes problem solving sections, more example code online, and exercise from Science and Business.

Adam Hansen says

Absolutely great book for not just a rookie programmer, but even experienced brewers of Java!

Anton Antonov says

A book that teaches you Java from the zero, to a junior candidate level. Providing you with a lot of exercises and theory, as three semesters of CompSci.
