3.5 Stars

This is the first book I have read by Fiona Dunbar and I really enjoyed her writing style. It's witty and fun - making the book a joy to read.

The story follows Kitty and her new found talent of seeing ghosts. Unfortunately the first one she sees is during her biology class! Kind of freaky and somewhat embarrassing since she is the only one who could see him. Also he won't leave her alone. It seems he has unfinished business and wants Kitty to help him....

I loved Kitty. She is very strong minded, which gets her into a tad of trouble, but she's also funny and sweet. I also really liked Sam and Flossie - and really enjoyed that the 'scooby gang' were her brother and sister. There was some really great interaction between all three and I love the way they annoy each other!

The mystery aspect is fun and well plotted. There are snippets of information and clues that have them trying to solve what happened/is happening. Some things happened a little too easily despite the characters putting themselves in potentially dangerous situations - but since this is aimed more at a tween audience I guess that is somewhat expected. I did really like the ending and think it sets up the rest of the series. The opportunities for many more stories feels unlimited and I'm interested to see what what Kitty faces next!

A promising start to what I'm sure will be a fun series! I'm looking forward to Fire and Roses when it's published later in the year.

This is the first Kitty Slade story in a long series of books. I first saw this book mentioned by the author over on Girls Heart Books and I decided to give it a try.

The first thing you should know about this book is that it was written and published in England, so a lot of the vocabulary and spellings are a little different than Americans use. I actually enjoyed that aspect of the writing. I haven't read a book like that since I bought my Harry Potter series in Canada just before I joined the American melting pot.

The next thing you need to know is that this book was a load of fun. Essentially it was The Boxcar Children meets Ghost Whisperer. Kitty discovers that she can see ghosts and is soon involved in an investigation to solve a mystery surrounding a very persistent apparition.

The characters were all well developed and I loved every single one of them. Kitty was spontaneous and headstrong, Sam was level headed and smart, and Flossie was just adorable. Maro (the children's grandmother) is warm and loving, yet pretty awesome too. I enjoyed the kid's plotting and their excursions out to collect evidence. I really enjoyed watching Kitty learn how to use and manipulate her gift of communicating with the dead.

It was pretty freaky in some parts, and I got goosebumps several times. If I were 13, this book would have really freaked me out. There was some mild cursing...a lot more than I expected to be in an Middle Grade novel. And I couldn't help but be frustrated at the very end when the family ends up moving out of their apartment after spending the entire book securing a way to stay in it. But I realize that it was the perfect opportunity for the author to open up sequel story lines.

This was a good book to read right around Halloween. It was totally creepy, but the problems all get resolved in the end. It is available in Kindle format on Amazon or as an audiobook from B&N.

The first thing that I thought of when I first heard of Divine Freaks is that it sounds a lot like Tamsyn Murray's My So-Called series (which I loved). The idea, writing style just seemed very similar and while there are similarities they are very different books.

For a start Divine Freaks is more focused on solving a crime and the ghost part of it is more of a twist, a way of getting a case to investigate if you like. The crime for this book featured around the ghost in her biology classroom – 'Rat Man' (don't you just love that nickname). And I'll leave it at that.

From the very first page Fiona's writing grabbed me and pulled me in, like Tamsyn's writing it is funny and descriptive and makes for quite a light hearted read which whisk past in the blink of an eye.

Kitty herself seems like a fun character – I can easily see her character getting into all sorts of trouble simply by being somewhere without her doing anything. She has that kind of personality which means people (notably teachers) don't instantly trust what she's saying (and lets face it in this kind of book not many people would!). This inevitably leads to some hilarious situations and with ghosts thrown into the mix as well – it is really is very hard to put down.

I just have to mention Maro, the Gran – she was as the blurb says 'Awesome', definitely one of the cooler Grans around.

Overall it's a fun, fast paced read perfect for any lovers of crime with a twist of paranormal – I will certainly be looking out for more Fiona Dunbar books in the future.

I adore this cover. There's something to it that made me know I had to read it.

I would of gave this book five stars if it hadn't been so gory.

But Its still brilliant.

I enjoyed this book, as others have said I liked the fact that although there was a supernatural element to the plot it was also a pretty straight forward crime story. I would recommend this to kids who also like St John's Laura Marlin series as I think it would appeal to a similar audience.

This book was ok. I found it a little bit predictable and slow paced. it didnt really have a shocking- knockout story line but it is an interesting idea. I will probably read the next one. i just hope it has more substance than this one.
