In this book are some gorgeously dark fantasy art. There are not only detailed paintings, but plenty of beautiful sketches as well. The art's more towards the gothic side.

There are lots of sexy women with flawless skin wielding swords standing in the darkness, really exquisite, and they all know you're looking at them. My favourite piece is one with a female warrior with strange hairdo bathed in light as black smoke monsters threatens to engulf her. The other piece I like is a dark silhouetted female warrior with an icy stare while she's holding a bleeding monster head, as if it's no big deal — which probably isn't.

All the armour and swords are very cool and beautiful although I have to question how functional some of the armour are.

Recommended to mature fantasy art lovers and artists.

Great art by Royo: the cover, 9 tongues, is one of my favourites of his, and Wings of Reflection is a classic Cinemagraph. Includes a number of covers.

Not a graphic novel. It is fantasy T and A book, not that it wasn't nice, but shouldn't be shelved as a graphic novel.

Luis Royo fantasy art collection dedicated to fantasy women in gothic landscapes, playing about with the concept of beauty and the beast.

This is not my favourite Royo collection by a long shot. Still there are some nice pieces. Includes commercial art for book jackets and Shadowrun RPG.

Each picture has an accompanying piece of abstract text, almost a verse of poetry to help you look the art in a different way.
