## Penumbra says

I was given this book to read by the author through the *M/M Romance* group, thank you.

Connor Sharp is a rogue wolf shifter and has been on the run from his past for the last six years, a past where his pack attacked him and left him to die. He's now scared physically and emotionally and finds it impossible to trust anyone until he meets Seth Alwen, the partner at his new job as a detective in Haven City.

Seth Alwen has problems of his own. He's a seer and was unable to stop his previous partner's murder. His guilt and the PTSD over not preventing Heather Brady's death are affecting his abilities to 'see' the future. Now he is also very much attracted to his new partner and feels guilty for moving on with his life. Both Connor and Seth try to track down the people responsible for the various murders among the shifters, healers and other magic users, also known as 'shadow people,' while trying to overcome their own personal issues and the growing attraction they have for one another.

## Meep says

Present tense can be very love/hate, if done well it's invisible but when done badly it comes off as awkward. Here it was very awkward, add in first person and descriptions become odd. On top of that there are quite a few editing issues 'Jutebox' is possibly a cultural differential of Jukebox, but the man ate stake and his steak was good!

S (Seth) + C (Conner) = grrrr (Me)

S is supernatural, he knows C is supernatural but can't talk about it because - secret

C is supernatural, he suspects S is supernatural but can't confirm this because - secret

Let the dancing commence!

It all equals rising reader frustration, at least in this reader.

I was not convinced about the *wonderful aroma of blood* and what is the problem with beards? Dreams of a handsome man (aka minus the beard) hiding himself behind the 'thing'?

What's the opposite of a pognophile - is beardist a thing? Cause I got to tell you right now they're kind of a current fashion.

I didn't get that far but it irritated me, can't see me returning to finish this one. (fortunately it was a kiddle-freebie - so that's good)

2.5 Stars

I thought this was a decent introduction to the series. Set in a world where shifters and magic practitioners alike hide who they are, two cops are paired together, each not knowing the other's "secret".

A series of unexplained events force Seth (a seer) and Conner (a werewolf) to reveal their true nature in order to find out what mysterious entity is causing other supernaturals to lose control of their powers. Unfortunately Seth and Conner are not immune themselves. Such close proximity and dangerous situations ignite the underlying attraction these two have for each other, where neither can stay away despite personal reservations.

This story ends with the mystery still unsolved but with these two forming a tenuous truce about their romantic relationship. Like I said, this was a decent intro to a new paranormal series. Nothing new in shifter lore is introduced but it had some nice "mate" issues and adequate steam. It also doesn't hurt that this was a freebie.

This was pretty terrible and cliched and boring. I've liked some of Zoe Perdita's work in the past but this one fell totally flat for me.

### Trisha Harrington says

This was a surprisingly good read. I got it for free and only glanced at the blurb, but it sounded okay so I said I'd give it a go. But this was a lot more than okay. It was sort of sweet, hot and I really liked both MC's.

Considering this is the first book in the series, I'm really happy with how this one ended. For a while I worried it would have a cliffhanger or wouldn't have a happy ending. But the ending was actually perfect considering where the couple are now. It left me wanting more without it feeling incomplete.

I hope more of Conner's past is explored in the next book. It'd be nice to see his family come back into it, even if it's just for him to get closure.

I loved the dual first person present tense POV's. It added to my enjoyment and I liked getting inside both guys heads.

I'll definitely read the next book in the series.

I liked it. I took a chance on this book. This is the first I've read by this author and I was pleasantly surprised. Seth and Conner were robust characters and there was an interesting back story. Seth's visions came at the most (to me) inopportune times but it was part of this book's charm. I loved Connor (sexy wolfie, rowr). As others have mentioned, this is the first in a series so it ended with an HFN but I felt satisfied.

Bottom line: moving on to book 2!

### Tamara says

Solid 3 star book.

### Mandapanda says

The blurb sounded really good but unfortunately the book didn't totally live up to it. It's about Seth, a detective still suffering from guilt and grief after the death of his partner. Seth is also a seer in that he sometimes gets visions of the future which may or may not come true. His melancholy is disturbed when he is assigned a new partner, Conner, a rogue wolf whose family betrayed him and left him for dead. Conner is trying to start a new for himself in Haven.

One of my least favourite sources of conflict for two MC's is the *lack of communication* trope and both Seth

and Conner kept secrets long past the time it would have been sensible to confide in each other. (view spoiler) It frustrated me when they would have such passionate emotional sex scenes then revert to being terse, angry and uncommunicative. The sex scenes were good but they jarred with where the guys were in real life. I also felt there was too much telling of how they were feeling and not enough showing.

I would have preferred more detail in the murder investigation/paranormal part of the story. It looks like this is the start of a series so I'm hoping that these two elements are more complex in book 2. I'll probably buy the sequel because I'm interested to see how the guys come out at work and how they catch the villain.

### **Donna says**

Have to take a break from this one. The way both MCs keep telling themselves they don't trust each other, in their heads, is not making me cheer for them to have a romance. The mystery seems like it will be good, but I have to want the guys together if I am to enjoy this book.

### **Candice says**

2.5

For the most part I did enjoy this story, the whole shadow world concept was interesting. I realize that this is the first book in the series and there was setting up with the world and the players involved, but there was just too much going on and it was little too much. I was a little disappointed because it seemed like the last part of the book was just rushed and then it ended. I realize this is so the reader will continue with the 2nd book, but I prefer a book to end and not to be left hanging.

The author offered this story and asked for a review, so here it goes! :)

Seth Alwen is a cop, a seer, and suffers from PTSD since witnessing his partner Heather Brady shot to death in an alley during an investigation.

The guilt is eating at him, because as a seer he saw her death but was helpless to do anything about it.

He is assigned a new partner Connor Sharp, a huge mountain of a man.

Connor has his own pile of issues, trust being a big one for him after being betrayed by those closest to him.

As the attraction between them sizzles, the murders of people in the 'Shadows' are increasing as well as other unexplained occurrences with them.

Sharp and Alwen work together to try and figure out who is killing healers, mages and shifters and why, all the while working on their own issues with each other.

We get both POV's each one in alternating chapters.

I read it in one sitting and it held my attention and interest all the way through. There is a definite HFN ending but..my only real complaint is that it's the first in a trilogy and left many unanswered questions and I have no patience and want to know NOW! :)

Seth has visions, will they come to pass, is he going to tell Connor? Who is the hooded baddie? Why is he doing it?

Is there a resolution to Connor's family's betrayal? What's up with Seth's family?

ETA and maybe I should mention that Connor isn't a plain ol' human either?

### **Tami says**

Ok, but not exactly thrilling. The writing was a bit clumsy at times and the both MCs were very stereotypical.

They didn't feel like real people - and being a clairvoyant and a werewolf was the least of the problems.

It was a book that mostly left me bored and detached.
